Good afternoon,

I am writing today as a Lemont resident living near the Citgo refinery to oppose a petition filed in Sept of 2025 allowing increased emissions from the refinery. I ask that you please consider the residents who are affected by increased pollution and an increasingly contentious relationship with the refinery and its lack of transparency. It is my understanding that the proper notification was published, however in a small Joliet publication. It is these types of actions that have contributed to tension between residents who have already started to collect health data and attempt to have conversations with the village and the refinery.

I urge you to consider those that live so close and do not want to risk increased exposure at their own homes.

Thank you for your time
