ILLINOIS ENVIRONMENTAL PROTECTION AGENCY RESPONSE

NOW COMES the Illinois Environmental Protection Agency (“Illinois EPA”), pursuant to 35 Ill. Adm. Code 104.535, and hereby files its Response to the Petition for a Time-Limited Water Quality Standard (“TLWQS”) filed by the Village of Frankfort.

In accordance with 35 Ill. Adm. Code 104.535(b), the Illinois EPA states as follows:

1. Discharger: The discharger affected by the water quality standard from which relief is sought is the Village of Frankfort Regional Wastewater Treatment Plant, operating under NPDES Permit No. IL0072192, Outfall 001.

2. Watershed and Receiving Water: The receiving water is Hickory Creek, Waterbody Segment IL_GG-06, located within the Lower Des Plaines watershed.

Hickory Creek (Segment IL_GG-06) is not listed on the 2024 Integrated Water Quality Report and Section 303(d) List. Aesthetic quality and aquatic life uses are fully supported.

3. Type of TLWQS: The appropriate type of TLWQS is a single-discharger TLWQS for chloride.

The applicable water quality standard from which relief is sought is 500 mg/L, as set forth in 35 Ill. Adm. Code 302.208(g).

4. Deadline for Other Dischargers: The petition applies only to the Village of Frankfort Regional Wastewater Treatment Plant. No other dischargers are identified.

Accordingly, no deadlines are recommended for additional dischargers to file petitions under 35 Ill. Adm. Code 104.530, and no stay under Section 104.525 is applicable.

WHEREFORE, the Illinois EPA respectfully submits this response to the Illinois Pollution Control Board in accordance with 35 Ill. Adm. Code 104.535.

Respectfully submitted,

ILLINOIS ENVIRONMENTAL PROTECTION
AGENCY
