Hello,

My name is Tracy, I live approximately 3 miles from the Lemont location. I have lived in Romeoville for 40 years. My parents, brother, sister in law and now a niece and nephew. I oppose the request by Citgo for an adjusted carbon monoxide standard for our health and the communities health.

Long term effects include neurological deficits (not good for developing brains), memory loss, motor impairment and personality changes. Citgo should follow the established Illinois law.

Please take this advisement from a concerned resident of 40 years.

Thank you
Tracy
