Subject: [External] Public Comment: CITGO request for adjusted carbon monoxide standard
Date: Thursday, June 25, 2026 12:31:47 PM

Hello members of Illinois Pollution Control Board,

As a constituent of Illinois I earnestly plead you to deny CITGO's petition under Docket No. AS 2026-001, as your board was created to protect this state's environment and its residents. Public health and environmental standards should not be disregarded, especially at a time when many are experiencing excruciating price hikes in health care among many other sectors. You should never allow corporate interests to have more sway in your decisions, and those of our elected officials, than the voices of the people you represent. As a nation we are quickly losing access to clean air and water from AI data center development. CITGO's petition does not establish that they have met requirements for an adjusted standard to be granted, under Illinois state law. For these reasons Illinois Pollution Control Board should deny this petition.

Katrina Bowman
