As a resident of Homer Glen, Illinois, I strongly oppose any action that would permit CITGO to emit pollutants that could degrade our air quality in Lemont, Lockport, Homer Glen and surrounding areas. Clean air is essential to protecting public health, preserving our environment, and maintaining a high quality of life for current and future generations. I ask the appropriate authorities to deny any request that would allow increased air pollution and to ensure that CITGO complies with the strictest environmental and public health protections.

Thank you
