I am officially submitting my public comment opposing CITGO's request for an adjusted carbon monoxide standard.

As officials who are supposed to help protect us - it's your turn to set up. The health of our children and community has been declining. And while we value citgo in the area, they need to follow appropriate guidelines already set to protect the health of those that live near them.

I would like this email as part of the official record that we oppose citgos request.

Thank you,
Lauren Evans
