ILLINOIS POLLUTION CONTROL BOARD
July 9, 2026

IN THE MATTER OF:	)	
	)	
AMENDMENTS TO 35 ILL. ADM. CODE	)	R 25-25
219, ORGANIC MATERIAL EMISSIONS	)	(Rulemaking – Air)
STANDARDS FOR THE METRO EAST	)	
AREA	)	

Adopted Rule. Final Notice.

OPINION AND ORDER OF THE BOARD (by M.D. Mankowski):

The Board today adopts rules amending Part 219 of its air pollution regulations. On June 12, 2025, the Illinois Environmental Protection Agency (IEPA) proposed that the Board revise Part 219, which addresses emissions of volatile organic materials (VOM) from various categories of stationary sources in the Metro East area. IEPA's proposal amended the aerospace coating requirements by adding VOM exemptions for primers, topcoats, and chemical milling maskants that were accidentally omitted from the original aerospace rulemaking in 2021.

On June 26, 2025, the Board accepted IEPA's proposal for hearing and submitted the proposal to first-notice publication without commenting on its substantive merits. *See* 49 Ill. Reg. 8883 (July 11, 2025). On May 7, 2026, the Board submitted the proposal to second-notice publication after reviewing the rulemaking record, discussing disputed issues, and addressing technical feasibility and economic reasonableness. At its June 16, 2026, meeting, the Joint Committee on Administrative Rules (JCAR) issued a Certification of No Objection to the proposal.

GUIDE TO TODAY'S OPINION AND ORDER

The Board's second-notice opinion detailed the regulatory and rulemaking background. Instead of reproducing that opinion here, the Board directs readers to the Clerk's Office On-Line (COOL) on the Board's website (pcb.illinois.gov), where the entire docket – including the second-notice opinion and order – can be viewed under docket number R25-25.

Here, the Board first provides an abbreviated procedural history of this rulemaking. Next, the Board discusses revisions to the second-notice proposal, as well as technical feasibility and economic reasonableness. Finally, the Board directs its Clerk to submit the rules to the Secretary of State for publication in the *Illinois Register*. The Board includes the adopted rules at the end of this order.

ABBREVIATED PROCEDURAL HISTORY

On June 12, 2025, IEPA filed its rulemaking proposal, which included its Statement of Reasons (SR), Technical Support Document (TSD), and proposed revisions to Part 219 (Prop.

219). IEPA also included a 1997 control techniques guideline (CTG) issued by the United States Environmental Protection Agency (USEPA), "Control of Volatile Organic Compound Emissions from Coating Operations at Aerospace Manufacturing and Rework Facilities" (EPA-453/R-97-004).[1]

On June 26, 2025, the Board accepted the proposal for hearing and submitted the proposal to first-notice publication in the *Illinois Register* without commenting on its substantive merits. 49 Ill. Reg. 8883 (July 11, 2025). Notice of the proposal was published in newspapers throughout the State.

On July 11, 2025, the Board requested that the Department of Commerce and Economic Opportunity (DCEO) conduct an economic impact study of the proposal by August 25, 2025. *See* 415 ILCS 5/27(b) (2024). To date, the Board has not received a response from DCEO.

On September 18, 2025, the Board held public hearings on October 2, 2025, and November 17, 2025, and received transcripts for both hearings (respectively, Tr.1 and Tr.2).

On May 7, 2026, the Board adopted a second-notice proposal for review by JCAR. On May 14, 2026, JCAR accepted the Board's second-notice filing.

At its meeting on June 16, 2026, JCAR issued a Certification of No Objection to the Board's proposal.

SUMMARY OF PROPOSED AMENDMENTS TO PART 219

Section 219.204(r) lists VOM content limitations at aerospace facilities for primers, topcoats, and chemical milling maskants in subsection (r)(1) and specialty coatings in subsection (r)(2). 35 Ill. Adm. Code 219.204(r). As noted above, separate formulations of aerospace specialty coatings in volumes less than 50 gallons per year are exempt from the limitations in Section 219.204(r)(2), with a maximum exemption of 200 gallons for all formulations applied annually. *Id*. IEPA proposed to add the same low-volume exemption for primers, topcoats, and chemical milling maskants in Section 219.204(r)(1). SR at 2-3; TSD at 1, 6; Prop. 219 at 33.

In its proposal, IEPA referred to not only the CTG but also the National Emission Standards for Hazardous Air Pollutants (NESHAP), stating that the latter also includes the exemption. SR at 3; TSD at 3. According to IEPA, the NESHAP below for aerospace manufacturing and rework facilities reinforces that the exemption is intended to apply to both categories of coatings and clarifies that the exemption applies to each separate formulation. SR at 3.

> The requirements for primers, topcoats, specialty coatings, and chemical milling maskants in §§ 63.745 and 63.747 do not apply to the use of low-volume coatings in these categories for which the annual total of each separate formulation used at a facility does not exceed 189 l (50 gal), and the combined annual total of all such

[1] The CTG will be cited as "CTG at __."

primers, topcoats, specialty coatings, and chemical milling maskants used at a facility does not exceed 757 l (200 gal).

Id. at 3, citing 40 CFR 63.741(g). IEPA argued that the current language in Section 219.204(r) "leaves aerospace manufacturing and rework facilities in the Metro-East area vulnerable to exceedances of low-volume primer, topcoat and chemical milling maskant limits, which was not intended by IEPA, the 1997 CTG, or the NESHAP." SR at 3.

IEPA did not propose additional revisions after second notice.

TECHNICAL FEASIBILITY AND ECONOMIC REASONABLENESS

Potentially Affected Sources

The proposed rule will apply to aerospace manufacturing and rework operations that include the manufacture or rework of commercial, civil, or military aerospace vehicles or components at sources located in the Metro East area that have a potential to emit at least 25 tons per year of VOM. SR at 4; TSD at 1-2. The proposed amendment would potentially affect three sources in the Metro East area: Gulfstream in Cahokia; Premiere Air Center Inc. in East Alton; and The Boeing Company (Boeing) in Mascoutah. *Id*. All three sources would be able to use the exemption proposed in the amendment. Tr.1 at 9-10. Boeing commented in support of IEPA's proposed revisions. PC 1.

Request for Economic Impact Study

As required by Section 27(b) of the Act (415 ILCS 5/27(b) (2024)), on July 11, 2025, the Board requested that DCEO conduct an economic impact study of the proposed rules by August 25, 2025. To date, the Board has not received a response from DCEO. However, the Board notes that on August 27, 2025, DCEO responded to JCAR's request for a Small Business Impact Analysis. In that response, DCEO concluded that the proposed rulemaking will not have an economic impact on small businesses.

There was no testimony at either hearing and no public comments filed regarding the Board's request and DCEO's lack of response. Tr.1 at 20-21; Tr.2 at 6.

Technical Feasibility and Economic Reasonableness

Based on the record before it, the Board concluded that its second-notice proposal was technically feasible and economically reasonable. Here, the Board reaches the same conclusion with its adopted rules. *See* 415 ILCS 5/27(a) (2022).

IEPA maintained that, given the limited scope of this proposal, compliance is both technically feasible and economically reasonable. SR at 5. The proposed revisions are technically feasible because they are intended only to make the existing rule language more consistent with the aerospace CTG and the federal aerospace NESHAP, "which was the Agency's intent when the aerospace coatings regulations were originally adopted." TSD at 3.

IEPA believes the proposed revisions will allow an exemption to apply to additional categories of coatings and provide additional flexibility to subject sources. *Id*. IEPA further noted that the amendment was requested by a potentially impacted source. *Id*.

IEPA argued that the proposed revisions are also economically reasonable because the proposed revisions likely will not create any additional costs for the potentially affected sources. SR at 5; TSD at 4. The revisions allow only for exempting a low volume of primers, topcoats, and chemical milling maskants, consistent with the aerospace CTG and applicable aerospace NESHAP. TSD at 4. IEPA believes this will provide subject sources with additional compliance flexibility rather than increase costs. *Id*.

The record continues to support the Board's previous conclusion. Therefore, the Board agrees with IEPA and finds that the proposed revisions are technically feasible and economically reasonable.

CONCLUSION

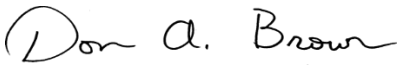
For the reasons above, the Board finds that its proposed rules are technically feasible and economically reasonable. Thus, the Board adopts amendments to Part 219 of its air pollution regulations. The adopted rules appear after this order.

ORDER

The Board directs its Clerk to submit the adopted rules to the Secretary of State for publication in the *Illinois Register*.

IT IS SO ORDERED.

I, Don A. Brown, Clerk of the Illinois Pollution Control Board, certify that the Board adopted the above opinion and order on July 9, 2026, by a vote of 4-0.



Don A. Brown, Clerk
Illinois Pollution Control Board

TITLE 35: ENVIRONMENTAL PROTECTION
SUBTITLE B: AIR POLLUTION
CHAPTER I: POLLUTION CONTROL BOARD

Reg. 3553, effective March 4, 2021; amended in R25-25 at 50 Ill. Reg. _____, effective _____.

SUBPART F: COATING OPERATIONS

Section 219.204 Emission Limitations

Except as provided in Sections 219.205, 219.207, 219.208, 219.212, 219.215 and 219.216, an owner or operator of a coating line must not apply at any time any coating in which the VOM content exceeds the following emission limitations for the specified coating. Except as otherwise provided in subsections (a), (c), (g), (h), (j), (l), (n), (o), (q), and (r), compliance with the emission limitations marked with an asterisk in this Section is required on and after March 15, 1996, and compliance with emission limitations not marked with an asterisk is required until March 15, 1996. The following emission limitations are expressed in units of VOM per volume of coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied at each coating applicator, except where noted. Compounds which are specifically exempted from the definition of VOM should be treated as water for the purpose of calculating the "less water" part of the coating composition. Compliance with this Subpart must

be demonstrated through the applicable coating analysis test methods and procedures specified in Section 219.105(a) and the recordkeeping and reporting requirements specified in Section 219.211(c) except where noted. (Note: The equation presented in Section 219.206 must be used to calculate emission limitations for determining compliance by add-on controls, credits for transfer efficiency, emissions trades and cross-line averaging.) The emission limitations are as follows:

			kg/l	lb/gal
a)	Automobile or Light-Duty Truck Coating			
	1)	Prior to May 1, 2012:		
		A) Prime coat	0.14	(1.2)
			0.14*	(1.2)*
		B) Primer surface coat	1.81	(15.1)
			1.81*	(15.1)*

BOARD NOTE: The primer surface coat limitation is in units of kg (lbs) of VOM per l (gal) of coating solids deposited. Compliance with the limitation must be based on the daily-weighted average from an entire primer surface operation. Compliance must be demonstrated in accordance with the topcoat protocol referenced in Section 219.105(b)(1)(A) and the recordkeeping and reporting requirements specified in Section 219.211(f). Testing to demonstrate compliance must be performed in accordance with the topcoat protocol and a detailed testing proposal approved by the Agency and USEPA specifying the method of demonstrating compliance with the protocol. Section 219.205 does not apply to the primer surface limitation.

		kg/l	lb/gal
C)	Topcoat		
		1.81	(15.1)
		1.81*	(15.1)*

BOARD NOTE: The topcoat limitation is in units of kg (lbs) of VOM per l (gal) of coating solids deposited. Compliance with the limitation must be based on the daily-weighted average from an entire topcoat operation. Compliance must be demonstrated in accordance with the topcoat protocol referenced in Section 219.105(b)(1)(A) and the recordkeeping and reporting requirements specified in Section 219.211(f). Testing to demonstrate compliance must be performed in accordance with the topcoat protocol and a detailed testing proposal approved by the Agency and USEPA specifying the method of demonstrating compliance with the protocol. Section 219.205 does not apply to the topcoat limitation.

		kg/l	lb/gal
D)	Final repair coat		
		0.58	(4.8)
		0.58*	(4.8)*

2) On and after May 1, 2012, subject automobile and light-duty truck coating lines must comply with the following limitations. These limitations must not apply to materials supplied in containers with a net volume of 0.47 liters (16 oz) or less, or a net weight of 0.45 kg (1 lb) or less:

A) Electrodeposition primer (EDP) operations. For purposes of this subsection (a)(2)(A), "electrodeposition" means a water-borne dip coating process in which opposite electrical charges are applied to the substrate and the coating. The coating is attracted to the substrate due to the electrochemical potential difference that is created.

		kg VOM/l coating solids applied	lb VOM/gal coating solids applied
i)	When solids turnover ratio (R_T) is greater than or equal to 0.160	0.084	(0.7)
ii)	When R_T is greater than or equal to 0.040 and less than 0.160	$0.084 \times 350^{0.160-R_T}$	$(0.084 \times 350^{0.160-R_T} \times 8.34)$

B) Primer surfacer operations

		kg VOM/l coating solids deposited	lb VOM/gal coating solids deposited
i)	VOM content limitation	1.44	(12.0)

ii) Compliance with the limitation in subsection (a)(2)(B)(i) must be based on the daily-weighted average from an entire primer surfacer operation. Compliance must be demonstrated in accordance with the topcoat protocol referenced in Section 219.105(b)(1)(B) and the recordkeeping and reporting requirements specified in Section 219.211(f). Testing to demonstrate compliance must be performed in accordance with the topcoat protocol and a detailed testing proposal approved by the Agency and USEPA specifying the method of demonstrating

compliance with the protocol. Section 219.205 does not apply to the primer surfacer limitation.

C) Topcoat operations

		kg VOM/l coating solids deposited	lb VOM/gal coating solids deposited
i)	VOM content limitation	1.44	(12.0)

ii) Compliance with the limitation in subsection (a)(2)(C)(i) must be based on the daily-weighted average from an entire topcoat operation. Compliance must be demonstrated in accordance with the topcoat protocol referenced in Section 219.105(b)(1)(B) and the recordkeeping and reporting requirements specified in Section 219.211(f). Testing to demonstrate compliance must be performed in accordance with the topcoat protocol and a detailed testing proposal approved by the Agency and USEPA specifying the method of demonstrating compliance with the protocol. Section 219.205 does not apply to the topcoat limitation.

D) Combined primer surfacer and topcoat operations

		kg VOM/l coating solids deposited	lb VOM/gal coating solids deposited
i)	VOM content limitation	1.44	(12.0)

ii) Compliance with the limitation in subsection (a)(2)(D)(i) must be based on the daily-weighted average from the combined primer surfacer and topcoat operations. Compliance must be demonstrated in accordance with the topcoat protocol referenced in Section 219.105(b)(1)(B) and the recordkeeping and reporting requirements specified in Section 219.211(f). Testing to demonstrate compliance must be performed in accordance with the topcoat protocol and a detailed testing proposal approved by the Agency and USEPA specifying the method of demonstrating compliance with the protocol. Section 219.205 does not apply to the combined primer surfacer and topcoat limitation.

E) Final repair coat operations

		kg/l coatings	lb/gal coatings
i)	VOM content limitation	0.58	(4.8)

ii) Compliance with the final repair operations limitation in subsection (a)(2)(E)(i) must be on an occurrence-weighted average basis, calculated in accordance with the equation below, in which clear coatings must have a weighting factor of 2 and all other coatings must have a weighting factor of 1. For purposes of this subsection (a)(2)(E)(ii), an "occurrence" is the application of the combination of coatings that constitute a final repair coat for a single automobile or light-duty truck. Section 219.205 does not apply to the final repair coat limitation.

$$VOM_{tot} = \frac{2VOM_{cc} + \sum_{i=1}^{n} VOM_i}{n+2}$$

where:

VOM_{tot} = Total VOM content of all coatings, as applied, on an occurrence weighted average basis, and used to determine compliance with this subsection (a)(2)(E).

i = Subscript denoting a specific coating applied.

n = Total number of coatings applied in the final repair operation, other than clear coatings.

VOM_{cc} = The VOM content, as applied, of the clear coat used in the final repair operation.

VOM_i = The VOM content of each coating used in the final repair operation, as applied, other than clear coatings.

F) Miscellaneous Materials. For reactive adhesives subject to this subsection (a)(2)(F), compliance must be demonstrated in accordance with the methods and procedures set forth in appendix A to Subpart PPPP of 40 CFR 63, incorporated by reference in Section 219.112.

		kg/l	lb/gal
i)	Glass bonding primer	0.90	(7.51)

	ii)	Adhesive	0.25	2.09)
	iii)	Cavity wax	0.65	(5.42)
	iv)	Trunk sealer	0.65	(5.42)
	v)	Deadener	0.65	(5.42)
	vi)	Gasket/gasket sealing material	0.20	(1.67)
	vii)	Underbody coating	0.65	(5.42)
	viii)	Trunk interior coating	0.65	(5.42)
	ix)	Bedliner	0.20	(1.67)
	x)	Weatherstrip adhesive	0.75	(6.26)
	xi)	Lubricating wax/compound	0.70	(5.84)

					kg/l	lb/gal
b)	Can Coating					
	1)	Sheet basecoat and overvarnish				
		A)	Sheet basecoat		0.34 0.26*	(2.8) (2.2)*
		B)	Overvarnish		0.34 0.34	(2.8) (2.8)*
	2)	Exterior basecoat and overvarnish			0.34 0.25*	(2.8) (2.1)*
	3)	Interior body spray coat				
		A)	Two piece		0.51 0.44*	(4.2) (3.7)*
		B)	Three piece		0.51 0.51*	(4.2) (4.2)*
	4)	Exterior end coat			0.51 0.51*	(4.2) (4.2)*

	5)	Side seam spray coat	0.66 0.66*	(5.5) (5.5)*
	6)	End sealing compound coat	0.44 0.44*	(3.7) (3.7)*
c)	Paper Coating		kg/l	lb/gal
	1)	Prior to May 1, 2011:	0.28	(2.3)
	2)	On and after May 1, 2011:	kg VOM/kg (lb VOM/lb) solids applied	kg VOM/kg (lb VOM/lb) coatings applied
		A) Pressure sensitive tape and label surface coatings	0.20	(0.067)
		B) All other paper coatings	0.40	(0.08)

3) The paper coating limitation in this subsection (c) does not apply to any owner or operator of any paper coating line on which flexographic, rotogravure, lithographic, or letterpress printing is performed if the paper coating line complies with the applicable emissions limitations in Subpart H. In addition, screen printing on paper is not regulated as paper coating, but is regulated under Subpart TT. On and after May 1, 2011, the paper coating limitation also does not apply to coating performed on or in-line with any digital printing press, or to size presses and on-machine coaters on papermaking machines applying sizing or water-based clays.

d)	Coil Coating	kg/l 0.31 0.20*	lb/gal (2.6) (1.7)*
e)	Fabric Coating	0.35 0.28*	(2.9) (2.3)*
f)	Vinyl Coating	0.45 0.28*	(3.8) (2.3)*
g)	Metal Furniture Coating		
	1) Prior to May 1, 2011:	kg/l	lb/gal
	A) Air dried	0.34	(2.8)

	B)	Baked	0.28	(2.3)
2)	On and after May 1, 2011:		kg/l (lb/gal) solids applied	kg/l (lb/gal)
	A)	General, One Component	0.275 (2.3)	0.40 (3.3)
	B)	General, Multi-Component		
		i) Air dried	0.340 (2.8)	0.55 (4.5)
		ii) Baked	0.360 (3.0)	0.61 (5.1)
	C)	Extreme High Gloss		
		i) Air dried	0.340 (2.8)	0.55 (4.5)
		ii) Baked	0.360 (3.0)	0.61 (5.1)
	D)	Extreme Performance		
		i) Air dried	0.420 (3.5)	0.80 (6.7)
		ii) Baked	0.360 (3.0)	0.61 (5.1)
	E)	Heat Resistant		
		i) Air dried	0.420 (3.5)	0.80 (6.7)
		ii) Baked	0.360 (3.0)	0.61 (5.1)
	F)	Metallic	0.420 (3.5)	0.80 (6.7)
	G)	Pretreatment Coatings	0.420 (3.5)	0.80 (6.7)

H) Solar Absorbent

i)	Air dried	0.420 (3.5)	0.80 (6.7)
ii)	Baked	0.360 (3.0)	0.61 (5.1)

3) On and after May 1, 2011, the limitations in this subsection (g) do not apply to stencil coatings, safety-indicating coatings, solid-film lubricants, electric-insulating and thermal-conducting coatings, touch-up and repair coatings, or coating applications utilizing hand-held aerosol cans.

h) Large Appliance Coating

1) Prior to May 1, 2011:		kg/l	lb/gal
A)	Air dried	0.34	(2.8)
B)	Baked	0.28	(2.3)
2) On and after May 1, 2011:		kg/l (lb/gal)	kg/l (lb/gal) solids applied
A)	General, One Component	0.275 (2.3)	0.40 (3.3)
B)	General, Multi-Component		
i)	Air dried	0.340 (2.8)	0.55 (4.5)
ii)	Baked	0.275 (2.3)	0.40 (3.3)
C)	Extreme High Gloss		
i)	Air dried	0.340 (2.8)	0.55 (4.5)
ii)	Baked	0.360 (3.0)	0.61 (5.1)
D)	Extreme Performance		

		i) Air dried	0.420 (3.5)	0.80 (6.7)
		ii) Baked	0.360 (3.0)	0.61 (5.1)
	E)	Heat Resistant		
		i) Air dried	0.420 (3.5)	0.80 (6.7)
		ii) Baked	0.360 (3.0)	0.61 (5.1)
	F)	Metallic	0.420 (3.5)	0.80 (6.7)
	G)	Pretreatment Coatings	0.420 (3.5)	0.80 (6.7)
	H)	Solar Absorbent		
		i) Air dried	0.420 (3.5)	0.80 (6.7)
		ii) Baked	0.360	0.61

3) The limitations in this subsection (h) do not apply to the use of quick-drying lacquers for repair of scratches and nicks that occur during assembly, provided that the volume of coating does not exceed 0.95 1 (1 quart) in any one rolling eight-hour period. On and after May 1, 2011, these limitations also do not apply to stencil coatings, safety-indicating coatings, solid-film lubricants, electric-insulating and thermal-conducting coatings, touch-up and repair coatings, or coating applications utilizing hand-held aerosol cans.

		kg/l	lb/gal
i)	Magnet Wire Coating	0.20 0.20*	(1.7) (1.7)*
j)	Prior to May 1, 2012: Miscellaneous Metal Parts and Products Coating		
	1) Clear coating	0.52 0.52*	(4.3) (4.3)*

2)	Extreme performance coating			
	A)	Air dried	0.42 0.42*	(3.5) (3.5)*
	B)	Baked	0.42 0.40*	(3.5) (3.3)*
3)	Steel pail and drum interior coating		0.52 0.52*	(4.3) (4.3)*
4)	All other coatings			
	A)	Air dried	0.42 0.40*	(3.5) (3.3)*
	B)	Baked	0.36 0.34*	(3.0) (2.8)*
5)	Metallic Coating			
	A)	Air dried	0.42 0.42*	(3.5) (3.5)*
	B)	Baked	0.36 0.36	(3.0) (3.0)*

6) For purposes of subsection (j)(5), "metallic coating" means a coating which contains more than ¼ lb/gal of metal particles, as applied.

BOARD NOTE: On and after May 1, 2012, the limitations in Section 219.204(q) apply to this category of coating.

k)	Heavy Off-Highway Vehicle Products Coating		kg/l	lb/gal
1)	Extreme performance prime coat		0.42 0.42*	(3.5) (3.5)*
2)	Extreme performance topcoat (air dried)		0.42 0.42*	(3.5) (3.5)*
3)	Final repair coat (air dried)		0.42 0.42*	(3.5) (3.5)*

4) All other coatings are subject to the emission limitations for miscellaneous metal parts and products coatings in subsection (j).

l) Wood Furniture Coating

1) Limitations before March 15, 1998:

		kg/l	lb/gal
A)	Clear topcoat	0.67	(5.6)
B)	Opaque stain	0.56	(4.7)
C)	Pigmented coat	0.60	(5.0)
D)	Repair coat	0.67	(5.6)
E)	Sealer	0.67	(5.6)
F)	Semi-transparent stain	0.79	(6.6)
G)	Wash coat	0.73	(6.1)

BOARD NOTE: Prior to March 15, 1998, an owner or operator of a wood furniture coating operation subject to this Section must apply all coatings, with the exception of no more than 37.8 l (10 gal) of coating per day used for touch-up and repair operations, using one or more of the following application systems: airless spray application system, air-assisted airless spray application system, electrostatic spray application system, electrostatic bell or disc spray application system, heated airless spray application system, roller coating, brush or wipe coating application system, dip coating application system or high volume low pressure (HVLP) application system.)

2) On and after March 15, 1998, wood furniture sealers and topcoats must comply with one of the limitations specified in subsections (l)(2)(A) through (E):

			kg VOM/kg solids	lb VOM/lb solids
A)	Topcoat		0.8	(0.8)
B)	Sealers and topcoats with the following limits:			
	i)	Sealer other than acid-cured alkyd amino vinyl sealer	1.9	(1.9)

ii)	Topcoat other than acid-cured alkyd amino conversion varnish topcoat	1.8	(1.8)
iii)	Acid-cured alkyd amino vinyl sealer	2.3	(2.3)
iv)	Acid-cured alkyd amino conversion varnish topcoat	2.0	(2.0)

C) Meet the provisions of Section 219.215 for use of an averaging approach;

D) Achieve a reduction in emissions equivalent to the requirements of subsection (l)(2)(A) or (B), as calculated using Section 219.216; or

E) Use a combination of the methods specified in subsections (l)(2)(A) through (D).

3) Other wood furniture coating limitations on and after March 15, 1998:

		kg/l	lb/gal
A)	Opaque stain	0.56	(4.7)
B)	Non-topcoat pigmented coat	0.60	(5.0)
C)	Repair coat	0.67	(5.6)
D)	Semi-transparent stain	0.79	(6.6)
E)	Wash coat	0.73	(6.1)

4) Other wood furniture coating requirements on and after March 15, 1998:

A) A source subject to the limitations of subsection (l), (2) or (3) and utilizing one or more wood furniture coating spray booths must not use strippable spray booth coatings containing more than 0.8 kg VOM/kg solids (0.8 lb VOM/lb solids), as applied.

B) Any source subject to the limitations of subsection (l)(2) or (3) must comply with Section 219.217.

C) Any source subject to the limitations of subsection (l)(2)(A) or (B) and utilizing one or more continuous coaters, must for each

continuous coater, use an initial coating which complies with the limitations of subsection (l)(2)(A) or (B). The viscosity of the coating in each reservoir must always be greater than or equal to the viscosity of the initial coating in the reservoir. The owner or operator must:

i) Monitor the viscosity of the coating in the reservoir with a viscosity meter or by testing the viscosity of the initial coating and retesting the coating in the reservoir each time solvent is added;

ii) Collect and record the reservoir viscosity and the amount and weight of VOM per weight of solids of coating and solvent each time coating or solvent is added; and

iii) Maintain these records at the source for a period of three years.

m)	Prior to May 1, 2012: Plastic Parts Coating: Automotive/Transportation		kg/l	lb/gal
	1)	Interiors		
		A) Baked		
		i) Color coat	0.49*	(4.1)*
		ii) Primer	0.46*	(3.8)*
		B) Air dried		
		i) Color coat	0.38*	(3.2)*
		ii) Primer	0.42*	(3.5)*
	2)	Exteriors (flexible and non-flexible)		
		A) Baked		
		i) Primer	0.60*	(5.0)*
		ii) Primer non-flexible	0.54*	(4.5)*
		iii) Clear coat	0.52*	(4.3)*
		iv) Color coat	0.55*	(4.6)*

	B)	Air dried		
		i) Primer	0.66*	(5.5)*
		ii) Clear coat	0.54*	(4.5)*
		iii) Color coat (red & black)	0.67*	(5.6)*
		iv) Color coat (others)	0.61*	(5.1)*
3)	Specialty			
	A)	Vacuum metallizing basecoats, texture basecoats	0.66*	(5.5)*
	B)	Black coatings, reflective argent coatings, air bag cover coatings, and soft coatings	0.71*	(5.9)*
	C)	Gloss reducers, vacuum metallizing topcoats, and texture topcoats	0.77*	(6.4)*
	D)	Stencil coatings, adhesion primers, ink pad coatings, electrostatic prep coatings, and resist coatings	0.82*	(6.8)*
	E)	Head lamp lens coatings	0.89*	(7.4)*

BOARD NOTE: On and after May 1, 2012, the limitations in Section 219.204(q) apply to this category of coating.

n)	Prior to May 1, 2012: Plastic Parts Coating: Business Machine		kg/l	lb/gal
1)	Primer		0.14*	(1.2)*
2)	Color coat (non-texture coat)		0.28*	(2.3)*
3)	Color coat (texture coat)		0.28*	(2.3)*
4)	Electromagnetic interference/radio frequency interference (EMI/RFI) shielding coatings		0.48*	(4.0)*
5)	Specialty Coatings			

A)	Soft coat	0.52*	(4.3)*
B)	Plating resist	0.71*	(5.9)*
C)	Plating sensitizer	0.85*	(7.1)*

BOARD NOTE: On and after May 1, 2012, the limitations in Section 219.204(q) apply to this category of coating.

o) Flat Wood Paneling Coatings. On and after August 1, 2010, flat wood paneling coatings must comply with one of the following limitations:

1) 0.25 kg VOM/l of coatings (2.1 lb VOM/gal coatings); or

2) 0.35 kg VOM/l solids (2.9 lb VOM/gal solids).

BOARD NOTE: The Board has omitted subsection (p) and adopted a subsection (q) in order to preserve consistent labeling with similar requirements in 35 Ill. Adm. Code 218.

q) Miscellaneous Metal Parts and Products Coatings and Plastic Parts and Products Coatings On and After May 1, 2012. On and after May 1, 2012, the owner or operator of a miscellaneous metal or plastic parts coating line must comply with the limitations in subsection (q). The limitations in subsection (q) do not apply to aerosol coating products, powder coatings, or primer sealants and ejection cartridge sealants used in ammunition manufacturing. Primer sealants and ejection cartridge sealants are regulated under Subpart TT.

1) Metal Parts and Products. For purposes of this subsection (q)(1), "corrosion resistant basecoat" means a water-borne epoxy coating applied via an electrodeposition process to a metal surface prior to spray coating, for the purpose of enhancing corrosion resistance. The limitations in subsection (q)(1) do not apply to stencil coats, safety-indicating coatings, solid-film lubricants, electric-insulating and thermal-conducting coatings, magnetic data storage disk coatings, and plastic extruded onto metal parts to form a coating. The limitations in Section 219.219 apply to these coatings unless specifically excluded.

2) Plastic Parts and Products: Miscellaneous. For purposes of this subsection (q)(2), miscellaneous plastic parts and products are plastic parts and products that are not subject to subsection (q)(3), (q)(4), (q)(5), or (q)(6). The limitations in subsection (q)(2) do not apply to touch-up and repair coatings; stencil coats applied on clear or transparent substrates; clear or translucent coatings; coatings applied at a paint manufacturing facility while conducting performance tests on the coatings; any individual coating category used in volumes less than 189.2 liters (50 gallons) in any one calendar year, if the total usage of all such coatings does not exceed 756.9 liters (200 gallons) per calendar year per source and substitute compliant coatings are not available; reflective coatings applied to highway cones; mask coatings that are less than 0.5 mm thick (dried) if the area coated is less than 25 square inches; electromagnetic interference/radio frequency interference (EMI/RFI) shielding coatings; and heparin-benzalkonium chloride (HBAC)-containing coatings applied to medical devices if the total usage of all such coatings does not exceed 378.4 liters (100 gallons) per calendar year per source. The limitations in Section 219.219 apply to these coatings unless specifically excluded.

		kg/l (lb/gal) coatings	kg/l (lb/gal) solids

	ii)	Vacuum metallizing topcoats	0.77 (6.4)	6.06 (49.1)

F) Red, yellow, and black coatings: Subject coating lines must comply with a limit determined by multiplying the appropriate limit in subsections (q)(3)(A) through (q)(3)(C) by 1.15.

4) Plastic Parts and Products: Business Machine. The limitations of this subsection (q)(4) do not apply to vacuum metallizing coatings, gloss reducers, texture topcoats, adhesion primers, electrostatic preparation coatings, stencil coats, and resist coats other than plating resist coats. The limitations in Section 219.219 apply to these coatings unless specifically excluded.

		kg/l (lb/gal) coatings	kg/l (lb/gal) solids
A)	Primers	0.35 (2.9)	0.57 (4.80)

H)	Lubricating wax/compound	0.70 (5.84)

r) Aerospace Facilities. On and after July 1, 2021, the owner or operator of an aerospace facility must comply with the coating limitations in this subsection (r). The limitations in this subsection (r) do not apply to the following activities in which coating of aerospace components and vehicles may take place: research and development, quality control, laboratory testing, and electronic parts and assemblies (except for coating of completed assemblies). The limitations in this subsection (r) also do not apply to aerospace facility operations involving space vehicles or rework operations performed on antique aerospace vehicles or components. The coating limitations in subsections (r)(1) and ~~subsection~~ (r)(2) do not apply to ~~aerosol coatings, Department of Defense classified coatings, or~~ the use of separate formulations of primers, topcoats, and chemical milling maskants, or the use of separate formulations of ~~aerospace~~ specialty coatings, in volumes of less than 50 gallons per year, subject to a maximum exemption of 200 gallons for all such formulations applied annually. The coating limitations in subsection (r)(2) do not apply to aerosol coatings or Department of Defense classified coatings.
