Hello my name is Mark Williams I live in 595 Hazel Crest Place Rantoul Illinois and I'm sending you this to let you know my great concerns about the garbage company gfl coming to my town. They already collect trash in town and the citizens had no choice on that matter they add the money for that service to our electric bill. And I cannot tell you how many times they've either missed whole areas and Rantoul for pickup and they've let garbage pile up so it blows around the town. And now because the board of Rantoul had a gag order we are getting this company shoved down our throats. The board members and Rantoul know that most people in this town do not want that company to open up the transfer station in the location that it's going to be or people come in and out of our town and businesses are starting to pop up and that's going to stop with this garbage Center being the first thing that they see when they come into our town. They're notorious of not following through with their promises. I can't tell you how many times the trucks that they use just for local pickups leaked fluids on the ground have left huge spots in front of my mom's house as well as others. I bet you please stop this from coming to our town. Before it was announced that gfl was coming in I personally got a hold of several board members and the mayor and was told the board had find an NDA/ gag order so they would not give us any information. Why was the gag order sign cuz they were trying sneak it in before the citizens knew anything about it. Businesses out by the proposed site has said that they do not want it there. But a few people in this town have pushed it through. Please help us I thank you for your time and attention to this matter. God bless
