Chicago, IL 60601-3218

PC#25

Case Number 2004-186

Attention: Dorothy Gunn, IPCB Clerk:

On May 25, 2005 the Kankakee County Board called a special meeting to consider a new proposal from Waste Management regarding siting an expansion to their landfill near the Iroquois/Kankakee River. This latest proposal is very different from the Waste Management application now on appeal in the above case.

At this special meeting the Kankakee County board, with advice from their attorney Mr. Charles Helsten, voted to file a stipulation of remand to the County Board for a re vote of the present application which is currently on appeal with the IPCB.

There are no grounds for this stipulation. There was no fundamental unfairness brought out during the appeal hearing. All the County Board members testified they made their decision on the record without outside influence from the public. There is no justification for this remand request and I respectfully ask that you deny the County's stipulation of remand.

I also request the IPCB to continue the appeal process which has been in process for almost a year and to uphold the County's denial which was done in full compliance of the law.

The 39.2 law requires any new landfill proposals, such as the one presented to the County Board May 25 by Waste Management, must be made with a new application and requires a whole new 172 hearing. Therefore Waste Management must make a new application and a new 172 hearing must be held.

Sincerely,

Darrel W. Bruck, Jr.
