PC#15*

I would like to go on the record as opposing the expansion of the Waste Management landfill from the now 80 acres to the proposed 382 acres. The location they've chosen is in the immediate water shed of the Iroquois and Kankakee rivers. The water supply for drinking purposes is just upstream from this area. Please consider this landfill has already poisoned many wells surrounding this dump.

The garbage trucks will pose a real congestion problem, presenting a danger to school children on the adjacent bus routes.

This landfill will most definitely deter any real estate or commercial development.

Most of the citizens in this county are against it once they learn we may soon have to be drinking bottled water because of infected metropolitan water supply. We don't want this dump anywhere near the river. People fish there and actually eat these fish. Have mercy on the people who are trusting you to do the right thing. Thank you for your time.

Sincerely,

Mrs. Andrea Taylor
