ORDER OF THE BOARD (by J. Theodore Meyer):

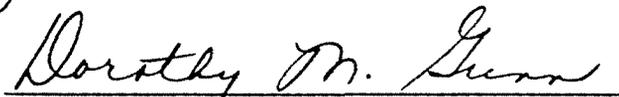

This matter is before the Board on petitioner Camsco Produce Company, Inc.'s (Camsco) February 22, 1988 motion to withdraw petition for variance. Respondent Illinois Environmental Protection Agency (Agency) has stated that it will not file a response to the motion, but has no objection to it.

Camsco filed a petition for variance on December 3, 1985, and an amended petition on January 17, 1986. The petition sought a six-month variance from National Pollution Discharge Elimination System (NPDES) limitations on biochemical oxygen demand (BOD), total suspended solids (TSS), and ammonia-N discharges from Camsco's Prince Crossing mushroom farm. Camsco subsequently filed a number of waivers, waiving its rights to an Agency recommendation and Board decision. In the instant motion to withdraw the variance petition, Camsco states that its mushroom farm has been annexed to the City of West Chicago, Illinois, and that the farm has been allowed to tie into the West Chicago sewer system. The farm now discharges all its wastewater to West Chicago's sewer system. Thus, the farm no longer needs a variance to meet NPDES limitations, and has requested cancellation of its NPDES permits.

The motion to withdraw the petition for variance is granted.

IT IS SO ORDERED.

I, Dorothy M. Gunn, Clerk of the Illinois Pollution Control Board, hereby certify that the above Order was adopted on the 25<sup>th</sup> day of February, 1988, by a vote of 7-0.

Dorothy M. Gunn, Clerk  
Illinois Pollution Control Board
