ORDER OF THE BOARD (by J. Theodore Meyer):

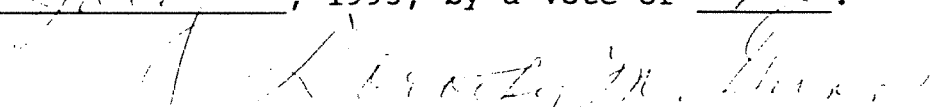

On July 8, 1993, petitioner Acme Steel Company (Acme) filed a status report in this proceeding, and a motion to file that report instanter. The status report is in response to the Board's April 22, 1993 order. The motion to file instanter states that the status report was delayed for completion of a thermal study in order to determine the appropriate course of action in this case. The motion to file instanter is granted.

This status report states that Acme has been investigating the possibility of seeking permanent relief from more stringent thermal and other effluent standards imposed when the Board reclassified Acme's receiving water. Acme states that it is preparing a petition for adjusted standard and supporting documentation, which will be submitted to the Illinois Environmental Protection Agency (Agency) for discussions. Acme states that it will then file the adjusted standard petition with the Board. Acme believes that it will have these discussions with the IEPA and submit its petition within 90 days.

The Board accepts Acme's status report, and directs Acme to file an additional status report by November 1, 1993.

IT IS SO ORDERED.

I, Dorothy M. Gunn, Clerk of the Illinois Pollution Control Board, hereby certify that the above order was adopted on the 23rd day of July, 1993, by a vote of 7-0.

Dorothy M. Gunn, Clerk
Illinois Pollution Control Board
