

ILLINOIS POLLUTION CONTROL BOARD
January 25, 1990

IN THE MATTER OF:)
)
UIC UPDATE, USEPA REGULATIONS) R89-11
(1-1-89 THROUGH 11-30-89)) (Identical in Substance Rulemaking)

PROPOSAL FOR PUBLIC COMMENT

PROPOSED ORDER OF THE BOARD (By J. Anderson):

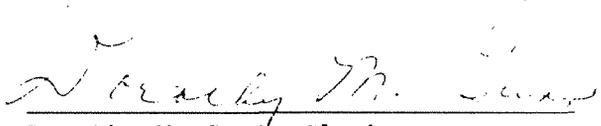

Pursuant to Sections 13(c) and 22.4(a) of the Environmental Protection Act (Act), the Board is amending the Underground Injection Control (UIC) regulations.

Both Sections provide for quick adoption of regulations which are "identical in substance" to federal regulations and that Title VII of the Act and Section 5 of the Administrative Procedure Act (APA) shall not apply. Because this rulemaking is not subject to Section 5 of the APA, it is not subject to first notice or to second notice review by the Joint Committee on Administrative Rules (JCAR). The federal UIC regulations are found at 40 CFR 144, 146 and 148. This rulemaking updates UIC rules to correspond with major federal amendments more fully outlined in the accompanying Proposed Opinion.

This Order is supported by a Proposed Opinion adopted on the same day. The Board will receive public comment on the proposal for a period of 45 days following publication in the Illinois Register. Because of its length, the text of the proposal will not be published in the Environmental Register or appear in the Opinion volumes. The complete text of the proposed rules follow.

IT IS SO ORDERED.

I, Dorothy M. Gunn, Clerk of the Illinois Pollution Control Board, hereby certify that the above Proposed Order was adopted on the 25th day of January, 1990, by a vote of 7-0.

Dorothy M. Gunn, Clerk
Illinois Pollution Control Board

SUBPART A: GENERAL

Section 730.108 Mechanical Integrity

- a) The applicant or permittee must demonstrate mechanical integrity when required by other sections. An injection well has mechanical integrity if:
- 1) There is no significant leak in the casing, tubing or packer; and
 - 2) There is no significant fluid movement into an underground source of drinking water through vertical channels adjacent to the injection bore.
- b) One of the following tests may be used to demonstrate the absence of significant leaks under ~~paragraph~~subsection (a)(1):

- 1) Monitoring of annulus pressure; or
 - 2) Pressure test with liquid or gas; or
 - 3) Until September 18, 1991, for Class III salt solution mining injection wells, the Water-Brine Interface Test described at 54 Fed. Reg. 34169, August 18, 1989, incorporated by reference at 35 Ill. Adm. Code 720.111.
- c) One of the following methods may be used to determine the absence of significant fluid movement under ~~paragraph~~subsection (a)(2):
- 1) The results of a temperature or noise log; or
 - 2) For Class III wells where the nature of the casing precludes the use of the logging techniques prescribed at ~~paragraph~~subsection (c)(1), cementing records demonstrating the presence of adequate cement to prevent migration; or
 - 3) For Class III wells where the Agency elects to rely on cementing records to demonstrate the absence of significant fluid movement, the monitoring program prescribed by 35 Ill. Adm. Code 730.113(b) shall be designed to verify the absence of significant fluid movement.
- d) The Agency may allow the use of a test to demonstrate mechanical integrity other than those listed in ~~paragraphs~~subsections (b) and (c). To obtain approval, the owner or operator shall submit a written request to the Agency, which ~~shall~~ sets forth the proposed test and all technical data supporting its use. The Agency shall approve the request if ~~it~~the test will reliably demonstrate the mechanical integrity of wells for which its use is proposed.
- e) In conducting and evaluating the tests enumerated in this ~~s~~Section or others to be allowed by the Agency, the owner or operator and the Agency shall apply methods and standards generally accepted in the industry. When the owner or operator reports the results of mechanical integrity tests to the Agency, ~~he~~it shall include a description of the test and the method used. In making its evaluation, the Agency shall review monitoring and other test data submitted since the previous evaluation.
