Respondent.)

CONCURRING OPINION (by Chairman Dumelle):

I fully agree with the need for this variance. My reason for concurring is that the four years granted (to April 1, 1984) seem excessive.

The Petitioner states that "it will take four (4) years to complete the inflow correction program." (Pet. p.5). No substantiation is given for the need for that length of time. The solutions studied involve sanitary relief sewer construction or footing tile disconnection with individual sump pump installation. It would seem that two full years would be an ample time to do whichever solution is chosen.

Respectfully submitted

Jacob D. Dumelle

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify that the above Concurring Opinion was filed on the 15th day of May, 1980.

Christan L. Moffett, Clerk
Illinois Pollution Control Board
