

ILLINOIS POLLUTION CONTROL BOARD  
December 2, 1993

IN THE MATTER OF: )  
 )  
SMALLER SOURCE PERMIT RULES: ) R93-11  
AMENDMENTS TO 35 ILL. ADM. CODE ) (Rulemaking)  
PARTS 201 AND 211 )

Adopted Rule.                      Final Order.

OPINION AND ORDER OF THE BOARD (by R.C. Flemal):

By today's action the Board adopts regulations implementing the small-source permit provision of the State's air pollution permit program. The small-source permit provision is at Section 39(a) of the Illinois Environmental Protection Act [415 ILCS 5/1 et seq.] (Act) as added by P.A. 87-1213<sup>1</sup>, effective September 26, 1992, and amended by P.A. 88-464, effective August 20, 1993. The provision is as follows:

After January 1, 1994, operating permits issued under this Section by the Agency for sources of air pollution permitted to emit less than 25 tons per year of any combination of regulated air pollutants, as defined in Section 39.5 of this Act, shall be required to be renewed only upon written request by the Agency consistent with applicable provisions of this Act and regulations promulgated hereunder. Such operating permits shall expire 180 days after the date of such a request. The Board shall revise its regulations for the existing State air pollution operating permit program consistent with this provision by January 1, 1994.

The Board's responsibility in this matter arises from the Act, wherein the Board is charged to "determine, define and implement the environmental control standards applicable in the State of Illinois"<sup>2</sup>. More generally, the Board's rulemaking charge is based on the system of checks and balances integral to Illinois environmental governance: the Board bears responsibility for the rulemaking and principal adjudicatory functions, whereas the Illinois Environmental Protection Agency (Agency) is

---

<sup>1</sup> P.A. 87-1213, in addition to establishing the small-source provision, also established the operating permit program for major sources found at Section 39.5 of the Act and required by Title V of the Clean Air Act Amendments.

<sup>2</sup> Act at Section 5(b).

responsible for carrying out the principal administrative duties. The latter's duties include administering any regulation that may result from today's action.

#### PROCEDURAL HISTORY

This matter originated before the Board on April 2, 1993 upon filing by the Agency of a proposal for rulemaking.

Beginning in October 1992 and prior to filing its proposal with the Board, the Agency conducted outreach sessions with persons potentially affected by the proposed rules. Response from these sessions was used by the Agency to help frame the proposal before the proposal was submitted to the Board. (Statement of Reasons at p. 5-6).

Hearings were held May 25, 1993 in Chicago and May 26, 1993 in DeKalb before hearing officer Michelle Dresdow. Participants at the Chicago hearing in addition to the Agency included Maribeth Flowers of the City of Chicago, Raymond Bodnar of the Illinois State Chamber of Commerce, Victor A. Denslow of Chemical Regulations Services, and Mary Ross of the Sierra Club.

Post-hearing public comments were filed by the City of Chicago and the Agency. The City of Chicago expressed its support for the proposal. The Agency recommended minor amendments to its original proposal. There was also need in the post-hearing period to allow a companion Board rulemaking in which Part 211 was undergoing extensive modification to proceed to the point where today's Part 211 amendment could be framed in context.

By order of July 22, 1993 the Board adopted the Agency's amended proposal for first notice. Publication occurred at 17 Ill. Reg. 13358, August 13, 1993.

Three public comments were received during the post-first notice comment period. The Illinois Department of Commerce and Community Affairs (DCCA) noted that the amendments will impact small businesses and deferred to the findings from the record before the Board. (PC #3.) The Administrative Code Division of the Office of the Secretary of State identified certain changes needed to bring the form of the amendments into acceptable style. (PC #4.) The Pennzoil Company expressed support for the amendments. (PC #5.)

On October 7, 1993 the Board adopted and submitted to the Joint Committee on Administrative Rules (JCAR) a second notice proposal that was substantively unchanged from the first notice proposal. On November 16, 1993 JCAR issued a certificate of no objection to the proposed amendments.

OVERVIEW

The purpose of today's action is to implement the regulatory portion of the State's new small-source air permit program. The program provides that a source that emits less than 25 tons per year of regulated air contaminants will no longer be subject to an automatic five-year renewal cycle for its operating permit. Rather, such permits may be of unlimited duration, subject only to review upon cause.

The major portion of today's provisions implementing the small-source air permit program are located at Subpart E<sup>3</sup> of 35 Ill. Adm. Code 201. For purpose of discussion, these provisions are accordingly in short-form today identified as the "Subpart E provisions".

The Agency estimates that approximately 6000 air emission sources are eligible under the Subpart E provisions. (Tr. at 51.) All of these currently hold permits for which renewal must be made on no less than a five-year cycle. (Tr. at 52.) This automatic renewal process constitutes a time, expense, and paperwork burden for both the affected sources and the Agency. Elimination of the automatic need for renewal will therefore provide an economy for all concerned.

The economy generated by the Subpart E provisions will not be offset by a crucial loss of oversight. All other existing rules that pertain to operating permits other than the duration and renewal provisions will continue to apply to all small sources<sup>4</sup>; among such continuing provisions are annual reporting requirements. Additionally, all requirements for construction permits will remain in place<sup>5</sup>. Moreover, the statute and Subpart E provide that the Agency can require an affected source to seek renewal of its operating permit, and exercise oversight thereby.

---

<sup>3</sup> Subpart E previously had been held in reserve for provisions dealing with conditions attached to permits. There is no longer any need seen for holding the subpart in reserve, and accordingly its use is proposed to be given over to today's new rules.

<sup>4</sup> See proposed Section 201.180(d).

<sup>5</sup> See proposed Section 201.180(c). Note also that a corollary to the obligation to obtain a construction permit is the obligation to obtain a revised operating permit that covers the new equipment (see proposed Section 201.187).

## DISCUSSION

### 25-ton Limit

These rules, by statute, apply to sources where the amount of emissions the source is permitted to emit is less than twenty-five (25) tons per year (TPY) of regulated air pollutants.

Historically in the Illinois air permitting process the emissions that a source is "permitted to emit" is the amount of emissions that a source is authorized to emit as specified by a permit, including any allowance for excess emissions during startup, but not including excess emissions during malfunction or breakdown.

If the permit for the source does not contain an emission limit, then the source's permitted emissions are considered to be its potential to emit. The Board notes that a definition of "potential to emit" exists in federal air regulations, and that this same definition has been proposed for inclusion in Illinois' air regulations at 35 Ill. Adm. Code 211.4970. The Board sent this proposed definition to second notice on November 18, 1993<sup>6</sup>; adoption is anticipated in early 1994.

If a source does not wish to be constrained to the 25 TPY limit, it would remain eligible for the standard air operating permit with a maximum term of five years.

### Regulated Air Pollutant

The term "regulated air pollutant" is defined at Section 39.5 of the Act. The Agency observes that, as a practical matter, a regulated air pollutant is one of the "five historic criteria air contaminants, i.e., particulate matter, sulfur dioxide, nitrogen oxide, volatile organic material/organic material and carbon monoxide" (Exh. 1 at 8). The Agency further observes that:

[T]he current definition of regulated air pollutant under Section 39.5 of the Act was intended to apply to sources required to obtain permits under Title V of the Clean Air Act and includes air pollutants for which the Board has no emission standards. It would be inappropriate to include in a calculation of eligibility for a Smaller Source Permit emissions from air pollutants for which the State has no emission standards. Therefore, the definition of regulated air

---

<sup>6</sup> In the Matter of: Reasonably Available Control Technology for Major Sources Emitting Volatile Organic Materials in the Chicago Ozone Nonattainment Area: 25 Tons (Amendments to 35 Ill. Adm. Code 211 and 218), Board Docket R93-14.

pollutant for purposes of the Smaller Source rules should include the same pollutants as are presently included under the State program. (PC #2 at ¶4.)

Today's regulation adds the definition for "regulated air pollutant" at new Section 211.5500.

#### CAAPP Exception

Neither the Section 39 statutory small-source provision nor today's implementation of the Subpart E provisions apply to a source that is required to obtain a Clean Air Act Permit Program (CAAPP) permit under Section 39.5 of the Act<sup>7</sup>. An example would be a source that, although it emits less than 25 TPY total, emits more than 10 TPY of a hazardous air pollutant and is thereby a "major source" pursuant to Section 39.5.

#### Permit Termination

The statute and Subpart E provide that the Agency may cause a Subpart E permit to terminate by exercising its authority to have the permittee submit a renewal application. A permit for which renewal has been requested by the Agency expires 180 days after the Agency sends its renewal notice<sup>8</sup>. If the permittee in turn submits a renewal application at least 90 days prior to expiration, Section 9.1(f) of the Act provides that the terms and conditions of the old permit remain in effect until the final administrative action on the application has been taken, including any appeals to this Board.

A Subpart E permit also terminates if it is withdrawn upon written request by the permittee or is superseded by a revised permit issued for the source<sup>9</sup>.

#### Grounds for Agency Request of Renewal

Although Section 39 clearly gives the Agency broad authority to request permit renewal, that authority is explicitly limited to be "consistent with applicable provisions of this Act and regulations promulgated" thereunder. As the Agency itself observes, it "cannot arbitrarily request that a smaller source operating permit be renewed" (Statement of Reasons at p. 3).

At the Agency's request, the Board today maintains in the rules three examples of conditions under which a renewal request

---

<sup>7</sup> See proposed Section 201.180(a)(2).

<sup>8</sup> Section 39 of the Act and proposed 35 Ill. Adm. Code 201.181(a).

<sup>9</sup> Ibid.

explicitly may be made. These are a change in law applicable to the source, inaccuracy in the information upon which the permit was granted, and information that the source may not be in compliance with the Act, Board regulations, or an existing permit condition<sup>10</sup>.

In other respects the renewal procedures for Subpart E sources will continue to be governed by the existing rules for air permit processing, including the permit application and review process rules found at Subpart D of 35 Ill. Adm. Code 201 and the revocation and revisions rules found at Subpart F of 35 Ill. Adm. Code 201.

### Appeal Rights

Today's rules are intended to comport with the standard provisions regarding appeal of permit decisions that are articulated at Section 40 of the Act. Among the central provisions found there is the statement at 40(a)(1) that:

If the Agency refuses to grant or grants with conditions a permit under Section 39 of this Act, the applicant may, within 35 days, petition for hearing before the Board to contest the decision of the Agency.

In general the Board will entertain review of an Agency action only when that action is a final action, complete as regards Agency decision in all respects except for consequences that flow from exercise of appeal rights. In the instant context, an appeal to the Board will not be ripe until the Agency has taken final action by (a) denying a permit outright, (b) denying a permit based on a determination of insufficiency of information in the application or failure of the applicant to supplement the application as requested by the Agency<sup>11</sup>, or (c) issuing a permit with conditions<sup>12</sup>.

An Agency notice that renewal is required is by itself not a final Agency action, and will not be entertained by the Board as a basis for appeal until the Agency has taken one of the final actions listed above.

### Permittee's Obligation to Obtain a Revised Permit

Today's rules impose an affirmative obligation upon a permittee to obtain a new or revised permit if operations change

---

<sup>10</sup> See proposed Section 201.181(b).

<sup>11</sup> See proposed Section 201.181(c).

<sup>12</sup> See proposed Section 201.181(d).

at the source<sup>13</sup>. This obligation must be discharged prior to the occurrence of the changes. Events considered to be "changes" in this context are:

- 1) An increase in emissions above the amount the source is permitted to emit; or
- 2) A modification; or
- 3) A change in operations which will result in the source's noncompliance with a condition in the existing permit; or
- 4) A change in ownership, company name, or address, so that the application or existing permit is no longer accurate.

The term "modification" listed above is a term-of-art used in the State's air program relating to alteration in the nature of air emissions; "modification" is defined at 35 Ill. Adm. Code 201.102.

If a person fails to apply for a new permit where a change requires obtaining a revised permit, the source and the permittee remain subject to the conditions of the existing Subpart E permit. However, the permittee is in violation of the obligation to have a new or revised permit and thereby open to an enforcement action.

#### ORDER

The Board directs the Clerk of the Board to submit the text of the following amendments to the Secretary of State for final notice pursuant to Section 6 of the Illinois Administrative Procedure Act.

TITLE 35: ENVIRONMENTAL PROTECTION  
SUBTITLE B: AIR POLLUTION  
CHAPTER I: POLLUTION CONTROL BOARD  
SUBCHAPTER a: PERMITS AND  
GENERAL PROVISIONS

PART 201  
PERMITS AND GENERAL PROVISIONS

AUTHORITY: Implementing Sections 10 and 39 and authorized by Section 27 of the Environmental Protection Act (Ill. Rev. Stat. 1991, ch. 111 1/2, pars. 1010, 1027, and 1039) [415 ILCS 5/10, 27, and 39].

SOURCE: Adopted as Chapter 2: Air Pollution, Part I: General Provisions, in R71-23, 4 PCB 191, filed and effective April 14, 1972; amended in R78-3 and 4, 35 PCB 75 and 243, at 3 Ill. Reg. 30, p. 124, effective July 28, 1979; amended in R80-5, at 7 Ill. Reg. 1244, effective January 21, 1983; codified at 7 Ill. Reg. 13579; amended in R82-1 (Docket A) at 10 Ill. Reg. 12628, effective July 7, 1986; amended in R87-38 at 13 Ill. Reg. 2066, effective February 3, 1989; amended in R89-7(A) at 13 Ill. Reg. 19444, effective December 5, 1989; amended in R89-7(B) at 15 Ill. Reg. 17710, effective November 26, 1991; amended in R93-11 at 17 Ill. Reg. \_\_\_\_\_, effective \_\_\_\_\_.

SUBPART D: PERMIT APPLICATIONS  
AND REVIEW PROCESS

Section 201.162 Duration

No operating permit shall be valid longer than five years or such shorter period as the Agency may specify in the operating permit as necessary to accomplish the purposes of the Act and this Chapter unless the source is subject to Subpart E of this Part. Applications for renewal of an operating permit shall be submitted to the Agency at least 90 days prior to the expiration of the prior permit, and shall conform to Sections 201.157, 201.158 and 201.159. The standards for issuance of renewal of operating permits shall be as set forth in Section 201.160.

(Source: Amended at 17 Ill. Reg. \_\_\_\_\_, effective  
\_\_\_\_\_)

Section 201.163 Joint Construction and Operating Permits

In cases where the Agency determines that an emission source or air pollution control equipment is sufficiently standard so as to obviate the need for separate construction and operating permits, the Agency may issue a joint construction and operating permit. The Agency may adopt procedures which: set forth the circumstances under which joint construction and operating permits may be issued; require data and information designed to determine compliance with this Chapter, and ambient air quality standards; and which set forth the format by which all data and information shall be submitted. The standards for issuance of joint construction and operating permits shall be as set forth in Sections 201.155 and 201.160. Except as herein provided, nothing in this Chapter shall be deemed to limit the power of the Agency in this regard. No joint construction and operating permit shall be valid for longer than five years or such shorter period as the Agency may specify the joint construction and operating permit as necessary to accomplish the purposes of this Chapter unless the source is subject to Subpart E of this Part. Applications for renewal of a permit shall be submitted to the Agency at least 90 days prior to the expiration of the prior permit, and shall conform to such procedures as may have been adopted by the Agency; and the standards for issuance of renewal permits shall be as set forth in Sections 201.155 and 201.160. The term "operating permit" as used elsewhere in this Chapter shall be deemed to include a joint construction and operating permit.

\_\_\_\_\_)

SUBPART E:

SPECIAL PROVISIONS FOR OPERATING PERMITS FOR  
CERTAIN SMALLER SOURCES

Section 201.180 Applicability

- a) Persons required to obtain operating permits under Part 201 are subject to this Subpart if:
- 1) The total emissions of all regulated air pollutants, as defined by 35 Ill. Adm. Code 211.5500(b), that the source is permitted to emit on an annual basis are less than 25 tons; and
  - 2) The source is not subject to the operating permit requirements under Section 39.5 of the Act.

- b) This Subpart only applies to sources which meet the requirements of subsection (a) above and whose permit has not expired pursuant to a renewal request under Section 201.181(a) of this Subpart. If this Subpart no longer applies to a source and its permit has not expired pursuant to a renewal request under Section 201.181(a) of this Subpart, the terms and conditions of the permit shall remain in effect until the permit is superseded by a new or revised permit or it is withdrawn.
- c) Nothing in this Subpart shall be construed as exempting persons with permits issued pursuant to this Subpart from the requirements of Section 201.142 of this Part requiring a construction permit or from review under Part 203 procedures for new and modified emission units.
- d) Unless specifically stated otherwise in this Subpart, all rules in this Part apply.

(Source: Added at 17 Ill. Reg. \_\_\_\_\_, effective \_\_\_\_\_)

Section 201.181

Expiration and Renewal

- a) Notwithstanding Section 201.162 of this Part, an operating permit subject to this Subpart shall expire 180 days after the Agency sends a written request for renewal of the permit. A permit shall also terminate if it is withdrawn upon written request by the permittee or is superseded by a revised permit issued for the source.
- b) The Agency may request the renewal of an operating permit subject to this Subpart for reasons including, but not limited to, a change in the requirements applicable to the source; an indication that the information on the source's application is inaccurate; or information that the source may not be in compliance with the Act, a Board regulation or an existing permit condition.
- c) In its request for renewal pursuant to subsection (a) above, the Agency may include a request for any supplemental information that the Agency may need to determine the continued applicability of this Subpart or the ability of the source to comply with any applicable requirement.
- d) An owner or operator may appeal to the Board only a final determination by the Agency to deny a permit or to include conditions as provided by Section 40 of the

Act and Section 201.210 of this Part, or a determination that a permit application is incomplete based upon, but not limited to, a failure to submit information requested under subsection (c) above or Section 201.158 of this Part.

(Source: Added at 17 Ill. Reg. \_\_\_\_\_, effective \_\_\_\_\_)

Section 201.187                      Requirement for a Revised Permit

- a) Persons with operating permits subject to this Subpart must obtain a revised permit prior to any of the following changes at the source:
- 1) An increase in emissions above the amount the emission unit or the source is permitted to emit; or
  - 2) A modification; or
  - 3) A change in operations which will result in the source's noncompliance with a condition in the existing permit; or
  - 4) A change in ownership, company name, or address, so that the application or existing permit is no longer accurate.
- b) If changes in the source's emission units or control equipment remove a source from the applicability of this Subpart, an owner or operator shall apply for a revised permit under Subpart D of this Part or under Section 39.5 of the Act.

Section 211.APPENDIX B Section into Rule Table

AUTHORITY: Implementing Sections 9 and 10 and authorized by Section 27 and 28.5 of the Environmental Protection Act (Ill. Rev. Stat. 1991, ch. 111½, pars. 1009, 1010 and 1027), (P.A. 87-1213, effective September 26, 1992) [415 ILCS 5/9, 10, 27 and 28.5].

SOURCE: Adopted as Chapter 2: Air Pollution, Rule 201: Definitions, R71-23, 4 PCB 191, filed and effective April 14, 1972; amended in R74-2 and R75-5, 32 PCB 295, at 3 Ill. Reg. 5, p. 777, effective February 3, 1979; amended in R78-3 and 4, 35 PCB 75 and 243, at 3 Ill. Reg. 30, p. 124, effective July 28, 1979; amended in R80-5, at 7 Ill. Reg. 1244, effective January 21, 1983; codified at 7 Ill. Reg. 13590; amended in R82-1 (Docket A) at 10 Ill. Reg. 12624, effective July 7, 1986; amended in

R85-21(A) at 11 Ill. Reg. 11747, effective June 29, 1987; amended in R86-34 at 11 Ill. Reg. 12267, effective July 10, 1987; amended in R86-39 at 11 Ill. Reg. 20804, effective December 14, 1987; amended in R82-14 and R86-37 at 12 Ill. Reg. 787, effective December 24, 1987; amended in R86-18 at 12 Ill. Reg. 7284, effective April 8, 1988; amended in R86-10 at 12 Ill. Reg. 7621, effective April 11, 1988; amended in R88-23 at 13 Ill. Reg. 10862, effective June 27, 1989; amended in R89-8 at 13 Ill. Reg. 17457, effective January 1, 1990; amended in R89-16(A) at 14 Ill. Reg. 9141, effective May 23, 1990; amended in R88-30(B) at 15 Ill. Reg. 5223, effective March 28, 1991; amended in R88-14 at 15 Ill. Reg. 7901, effective May 14, 1991; amended in R91-10 at 15 Ill. Reg. 15564, effective October 11, 1991; amended in R91-6 at 15 Ill. Reg. 15673, effective October 14, 1991; amended in R91-22 at 16 Ill. Reg. 7656, effective May 1, 1992; amended in R91-24 at 16 Ill. Reg. 13526, effective August 24, 1992; amended in R93-11 at 17 Ill. Reg. , effective .

SUBPART B: DEFINITIONS

Section 211.5500

Regulated Air Pollutant

- a) "Regulated air pollutant" means the following:
- 1) Nitrogen oxides (NO<sub>x</sub>) or any volatile organic compound.
  - 2) Any pollutant for which a national ambient air quality standard has been promulgated.
  - 3) Any pollutant that is subject to any standard promulgated under Section 111 of the Clean Air Act.
  - 4) Any Class I or II substance subject to a standard promulgated under Section 112 of the Clean Air Act, including Sections 112(g), (j) and (r).
    - A) Any pollutant subject to requirements under Section 112(j) of the Clean Air Act. Any pollutant listed under Section 112(b) shall be considered to be regulated 18 months after the date on which United States Environmental Protection Agency ("USEPA") was required to promulgate an applicable standard pursuant to Section 112(e) of the Clean Air Act, if USEPA fails to promulgate such standard.
    - B) Any pollutant for which the requirements of Section 112(g)(2) of the Clean Air Act have been met, but only with respect to the

individual source subject to Section 112(g)(2) requirement.

- b) "Regulated air pollutant" shall, for the purposes of 35 Ill. Adm. Code 201.180(a), mean any air contaminant as to which this Subtitle contains emission standards or other specific limitations and any contaminant regulated in Illinois pursuant to Section 9.1 of the Act.

(Source: Added at 17 Ill. Reg. \_\_\_\_\_, effective \_\_\_\_\_)

IT IS SO ORDERED.

I, Dorothy M. Gunn, Clerk of the Illinois Pollution Control Board, hereby certify that the above opinion and order was adopted on the 3rd day of December, 1993, by a vote of 6-0.
