ORDER OF THE BOARD (by C.A. Manning):

On January 26, 2000, the Illinois Environmental Protection Agency (Agency) filed a request for provisional variance and notification of recommendation. The Agency recommends that the Board grant a provisional variance, commencing January 27, 2000, which shall continue for 45 days, or until the Agency issues a modified National Pollutant Discharge Elimination System (NPDES) permit to Libbey-Owens-Ford Company (petitioner) for its Ottawa facility. The provisional variance would allow petitioner's LaSalle County facility to temporarily use make-up river or well water in its wastewater collection system during sub-freezing weather conditions in order to prevent the wastewater force main from freezing and causing potential pipe ruptures and overflow conditions at the sump. In making its recommendation, the Agency states that failure to grant the requested provisional variance will result in an arbitrary or unreasonable hardship on petitioner.

The Board grants petitioner a provisional variance from 35 Ill. Adm. Code 304.141(b), subject to the following conditions:

1. The provisional variance shall begin January 27, 2000, and shall continue for 45 days, or until the Agency issues a modified NPDES permit authorizing this make-up water use to prevent freezing, whichever occurs first;
2. Petitioner shall notify Chuck Corley of the Agency's Rockford regional office via telephone at 815-987-7755 when make-up water is added to petitioner's waste line and again when make-up water is no longer added to the waste line.

Written confirmation of each occurrence shall be sent within five days to the following address:
