ORDER OF THE BOARD (by R.C. Flemal):

On November 9, 1992, Olin Corporation (Olin) filed a petition for hearing to review the denial by the Illinois Environmental Protection Agency (Agency) of its RCRA closure plan permit involving a waste cyanide storage area and waste ballistics sand storage areas at the East Alton manufacturing facility. On September 20, 1993, pursuant to Board order, the parties filed a joint status report in this proceeding. The parties report that they have been actively pursuing settlement and that they have agreed in principle to coordinate the closure of the ballistics sand storage units with the RCRA Facility Investigation planned as part of the facility's RCRA Part B permit. The parties also state that pursuant to settlement discussions, on September 7, 1993 Olin has submitted to the Agency a modified closure/post-closure plan for the ballistics storage areas. A certificate of clean closure for the waste cyanide storage area was previously submitted to the Agency. The Agency is currently reviewing the modified closure/post-closure plan and the closure certification. Finally, the parties state that if an agreement on the closure of each unit is reached, Olin will move for dismissal of this appeal.

The parties are ordered to file a status report in this matter on or before December 27, 1993, in the event this appeal has not been dismissed.

IT IS SO ORDERED.

I, Dorothy M. Gunn, Clerk of the Illinois Pollution Control Board, hereby certify that the above order was adopted on the 23rd day of September, 1993, by a vote of 7-0.

Dorothy M. Gunn, Clerk
Illinois Pollution Control Board
