BOARD ADOPTS NEW DRINKING WATER RULES (R88-26)

On May 24, 1990, in R88-26, the Board adopted new drinking water rules. The vote was 7 to 0, with Mr. Forcade concurring.

The new rules are mandated by Section 17.5 of the Act, which requires the Board to adopt regulations which are "identical in substance" to regulations adopted by USEPA pursuant to the Safe Drinking Water Act. "Identical in substance" is defined by Section 7.2 of the Act.

The Order adds a new Part 611, which closely tracks the USEPA primary drinking water rules in 40 CFR 141. The Order also repeals portions of Parts 604 through 607 which are superseded by the new Part 611.

Most of the USEPA requirements are already reflected in existing Parts 604 through 607. However, format differences made it difficult to conduct comparisons with the USEPA rules. This action mainly consists of moving existing State requirements into a format which will allow routine amendment of the "identical in substance" rules to maintain consistency with USEPA rules.

The main difference between the new and old drinking water rules is the addition of the filtration and disinfection requirements from the June 29, 1989, Federal Register. The Agency believes that these will also have little practical impact, since the Agency has long required all affected supplies to filter and disinfect.

A major complexity arises because of delayed effective dates for many of the filtration and disinfection requirements. The Board has left many of the basic existing rules in place, with provisions to the effect that PWSs must continue to follow the old rule until they become subject to the new filtration and disinfection requirements.

The Board has allowed time for post-adoption comments by the agencies involved in the authorization process. If none are received, the Board will file the rules on or about June 25, 1990. However, the Board may delay this date if comments are received.

Interested persons may obtain copies of the Opinion and Order from the Clerk. Questions should be directed to Morton Dorothy or Anne Manly at (21) 333-5575.

BOARD PROPOSES RCRA TCLP TEST (R90-10)

On May 24, 1990, the Board (7-0) proposed to update the RCRA hazardous waste rules to include the new toxicity characteristic leaching procedure (TCLP) as part of the definition of "hazardous waste". The rulemaking will also update the RCRA rules to include USEPA amendments during the period 1/1 through 3/31/90.

The TCLP is a waste extraction test which will replace the EP toxics test in the definition of "hazardous waste". The main difference is the addition of many organic contaminants.

The Board has departed from the usual 6 month RCRA update cycle. This update will involve only three months of USEPA amendments. The Board has advanced the schedule so as to be able to adopt the TCLP test before it becomes effective as federal law in September, 1990. Because the TCLP test is HSWA-driven, it will become effective in authorized states pending adoption by the States. This would result in two different definitions of hazardous waste in Illinois pending Board action.

The Board had also proposed in R90-2 to update the RCRA rules to correspond with USEPA rules adopted in the second half of 1989. Public comment is due by June 18, 1990. R90-10 is complicated by the fact that several Sections are also proposed for amendment in R90-2.

The proposal will appear in the Illinois Register in the near future. The Board will receive written public comment for 45 days after the date of publication in the Illinois Register.

Persons who wish to be placed on the mailing list should contact Morton Dorothy at (217) 333-5575.

BOARD FINDS NO ECIS NECESSARY IN USED AND WASTE TIRES PROPOSAL, R90-9

On June 7, 1990 the Board found that an economic impact study (EciS) was not necessary in the regulatory proposal governing used and waste tires (R90-9) presently before it. A 45-day written public comment period began on the publication date of this proposal in the Illinois Register, May 25, 1990. Hearings are presently scheduled for June 22, 1990 in Room 8-031, State of Illinois Center, 100 W. Randolph Street, Chicago, Illinois. This proposal is subject to modification based on testimony and comments received during the comment and hearing process. Copies of the Board's June 7, 1990 Order are available upon request from the Clerk of the Board. Questions on this proposal may be directed to Mark P. Miller at 217/333-5574. Additions to the notice list for future mailings may also be made by calling this number.

BOARD PROPOSES SITE-SPECIFIC RELIEF FROM PHOSPHORUS STANDARDS FOR CITY OF PANA IN R84-44

On June 7, 1990 the Board proposed for First Notice site-specific relief for the City of Pana from the effluent limitations set forth at 35 Ill. Adm. Code 304.123. The proposal allows Pana to discharge from Pana's wastewater treatment plant 2.9 mg/l of phosphorus as P into the Lake Carlyle Reservoir. The current standard is 1.0 mg/l.

The Board has held two hearings on the proposal to date. No additional hearings are scheduled. A 45-day written public comment period will begin on the date of publication in the Illinois Register. (Publication is scheduled for late June/early July). For further information concerning this proposal, contact Mark P. Miller at 217/333-5574.

LANDFILL REGULATIONS ADOPTED FOR SECOND NOTICE (R88-7)

At its June 7, 1990 meeting, the Board adopted for Second Notice its proposed 180 page landfill regulations, "Development, Operating and Reporting Requirements for Non-Hazardous Waste Landfill, R88-7. The proposed regulations will now be submitted to the Legislature's Joint Committee on Administrative Rules for its review prior to final action by the Board. Those on the R88-7 notice list also will receive the regulatory package, consisting of the Board's Second Notice proposed Opinion and Order and the response of the Board's Scientific and Technical Section to additional comments and hearing testimony received during the second First Notice period. For others, the package is available at the Clerk's office. For questions, contact the Hearing Officer, Kathleen Crowley, (312)814-4629. We note that this R88-7 rulemaking, and its predecessor docket R84-17, represents an enormous commitment of time and resources, both by the Board and the participants. We believe that the "up-front" scrutiny has been of unusual assistance in an undertaking of this magnitude.

BOARD UPDATES UST RULES (R90-3)

On June 7, 1990, the Board updated the UST (Underground Storage Tank) rules to correspond with USEPA amendments during the period July 1 through December 31, 1989. The amendments mainly concern technical changes to the financial assurance forms, involving termination of coverage. The Board will file the amendments around June 26, 1990. Questions should be directed to Morton Dorothy at (217) 333-5575.

BOARD AND STAFF ACTIVITIES

On May 30th, Board Member Jacob D. Dumelle appeared in a one-hour documentary "Coming Clean" on WTTW-TV in Chicago which reviewed 20 years of environmental protection.

On June 12th Mr. Dumelle met with two visitors from Ireland, Ken Macken and Anthony Stapleton, and briefed them on Illinois environmental rules and concerns.

On May 29th, Timothy P. Dwyer began his duties as assistant to Mr. Dumelle. He is a 1990 graduate of the John Marshall Law School and a 1985 graduate of the University of Illinois. Mr. Dwyer had been a legal research assistant in the Illinois Department of Corrections for almost two years prior to coming to the Board.

Illinois Pollution Control Board Fiscal Year 1989 Annual Report Now Available

The Illinois Pollution Control Board's Annual Report for Fiscal Year 1989 (July 1, 1988 through June 30, 1989) is now available, free, from the Clerk's Office. The 1989 Annual Report contains a special section on the history, changes, and present operations of the Board. The Report also includes a note from Chairman John Marlin, the Judicial Review section, and helpful charts in the Appendices which summarize the Board's activities.
