

ILLINOIS POLLUTION CONTROL BOARD  
March 22, 1990

IN THE MATTER OF: )  
 )  
PROPOSED SITE-SPECIFIC LIMITATION )  
FOR THE MODINE MANUFACTURING COMPANY ) R87-36  
FACILITY, RINGWOOD, ILLINOIS ) (Site-Specific)

PROPOSED RULE.            SECOND NOTICE.

SUPPLEMENTAL OPINION AND ORDER OF THE BOARD (by R.C. Flemal):

On February 22, 1990 the Board proposed the rule in this matter for Second Notice with the provision that filing of the Second Notice rule would be deferred pending comment from Modine and the Agency. Comment was specifically requested regarding placement of the fluoride exemption.

On March 8, 1990 both Modine and the Agency filed comments which persuade the Board that the form of the fluoride exemption as proposed as First Notice is preferable to the form proposed in the Board's February 22 Opinion and Order. Accordingly, the Board today adopts the earlier form, and will proceed to file that form for Second Notice. Additionally, repositioning of the fluoride portion of the rule into Section 303.430 allows the remaining two subsections of Section 304.221 to be combined; that economy of construction is today adopted.

Inasmuch as the Board stands by the analysis made in the February 22 Opinion except for the issue of the fluoride exemption placement, that analysis will not be repeated here.

ORDER

The Board hereby proposes for Second Notice the following additions to 35 Ill. Adm. Code, Subtitle C: Water Pollution. The Board directs that these additions be submitted to the Joint Committee on Administrative Rules.

TITLE 35: ENVIRONMENTAL PROTECTION  
SUBTITLE C: WATER POLLUTION  
CHAPTER I: POLLUTION CONTROL BOARD

PART 303  
WATER USE DESIGNATIONS AND SITE  
SPECIFIC WATER QUALITY STANDARDS

Section 303.430 Unnamed Tributary to Dutch Creek

The general use water quality standard for fluoride contained in Section 302.208 shall not apply to the unnamed tributary of Dutch Creek which receives discharges from the manufacturing facility located on Ringwood Drive in Ringwood in McHenry County from the outfall of that facility for a distance of 1200 yards downstream. Instead this water shall comply with a fluoride standard of 5.6 mg/l not to be exceeded at any time.

PART 304  
EFFLUENT STANDARDS

Section 304.221 Ringwood Drive Manufacturing Facility in  
McHenry County

The general effluent standards for deoxygenating wastes contained in Section 304.120 shall not apply to discharges from the manufacturing facility located on Ringwood Drive in Ringwood, McHenry County, which discharges to an unnamed tributary of Dutch Creek. Instead these discharges shall comply with the following effluent limitations as measured at the point of discharge after the third lagoon and prior to discharge to the unnamed tributary:

TSS	12 mg/l	Monthly average
	30 mg/l	daily maximum
BOD <sub>5</sub>	25 mg/l	May to September monthly average
	35 mg/l	May to September daily maximum
	60 mg/l	October to April monthly average
	70 mg/l	October to April daily maximum

IT IS SO ORDERED.

I, Dorothy M. Gunn, Clerk of the Illinois Pollution Control Board, hereby certify that the above Supplemental Opinion and Order was adopted on the 22<sup>nd</sup> day of March, 1990, by a vote of 7-6.
