 Respondent.)

ORDER OF THE BOARD (by B. Forcade):

On December 13, 1989, the Village of Shorewood filed a petition for variance for its facility located in Shorewood, Illinois. That petition is deficient in that it fails to provide:

- 1) A detailed description of the existing and proposed equipment or proposed method of control to be undertaken to achieve full compliance with the Act and regulations, including a time schedule for the implementation of all phases of the control program from initiation of design to program completion and the estimated costs involved for each phase and the total cost to achieve compliance, as required by 35 Ill. Adm. Code 104.121(f);

As it pertains to deficiency number one, the Board seeks clarification on the following: when was or when will the \$1.5 million grant be received from the Build Illinois program; what is the full schedule for upgrading the sewage treatment plant and what is the new capacity.

- 2) An assessment, with supporting factual information, of the environmental impact that the variance will impose on human, plant and animal life in the affected area, including, where applicable, data describing the existing air and water quality which the discharge may affect, as required by 35 Ill. Adm. Code 104.121(g);

As it pertains to deficiency number two: (1) what is the current capacity of the sewers between the development (twelve

new residences) and the sewage treatment plant; (2) what are the existing flows in those sewers; (3) what impact will an additional 4,550 gallons per day have on the sewers in question; and (4) are there any reported cases of sewer surcharging or basement back-up on these sewer lines.

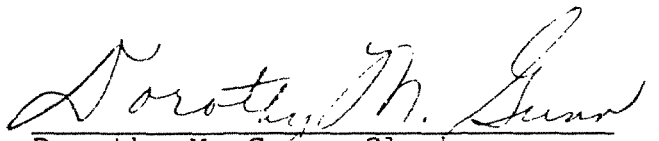

- 3) A statement of the measures to be undertaken during the period of the variance to minimize the impact of the discharge of contaminants on human, plant and animal life in the affected area, including the numerical interim discharge limitations which can be achieved during the period of the variance, as required by 35 Ill. Adm. Code 104.121(j);

As it pertains to deficiency number three; what water conservation measures have been or could be employed in the twelve home development.

Unless an amended petition is filed within 45 days of the date of this Order, curing the above-noted defects, this matter will be subject to dismissal. The Board notes the motion for expedited consideration. Once an amended petition is received, the Board will make every attempt to expedite this matter as quickly as possible.

IT IS SO ORDERED.

I, Dorothy M. Gunn, Clerk of the Illinois Pollution Control Board, hereby certify that the above Order was adopted on the 20th day of December, 1989, by a vote of 7-0.

Dorothy M. Gunn, Clerk
Illinois Pollution Control Board
