RULEMAKING UPDATE

REVISIONS TO FEDERALLY-DERIVED RCRA SUBTITLE D LANDFILL AMENDMENTS ADOPTED, R93-10

On December 16, 1993, the Board adopted a number of revisions to the RCRA Subtitle D amendments to the Illinois non-hazardous waste landfill regulations. The Board originally adopted the amendments on September 15, 1993 based on October 9, 1991 U.S. EPA rules that apply to municipal solid waste landfill facilities (MSWLFs). Federal law requires that the states must adopt regulations that are no less stringent than the new federal regulations on or before October 9, 1993 in order to maintain state primacy in this area, but U.S. EPA revised that date to April 9, 1994. (See issue 475, Oct. 6, 1993 & lead story: "U.S. EPA Extends Deadline".) P.A. 88-496, effective September 13, 1993, mandated that the Board adopt these amendments using identical-in-substance rulemaking procedures. (See issue 475 lead story: "Governor Signs Major Amendments"; see also issue 471 (June 16, 1993).) The Board adopted the amendments on November 16, 1993, but delayed filing the adopted amendments to allow U.S. EPA further opportunity to comment on the rules. (See issue 477, Dec. 1, 1993.) The December 16, 1993 revisions were in response to those comments and others received.

The amendments affect Parts 810, 811, and 814 of the Illinois landfill rules. The amendments to Part 810 add various definitions relating to MSWLF units and incorporate U.S. EPA test methods for evaluating solid waste and an extensive federal listing of numerous of organic and inorganic contaminants for which these facilities must test groundwater. The amendments to Part 811 include several changes to the existing new landfill standards. Briefly, they amend the landfill location, operating, closure and post-closure care, recordkeeping, groundwater monitoring and corrective action, and financial assurance requirements, as they apply to MSWLFs, to make them as stringent as the federal new rules. The amendments to Part 814 include several similar changes to the standards applicable to existing landfills in order to make them also as stringent as the U.S. EPA Subtitle D regulations. Additionally, they clarify the applicability of Part 814 to existing MSWLFs and to lateral expansions, set forth permitting requirements for existing MSWLF units and for lateral expansions, and establish foundation and mass stability standards, and impose groundwater monitoring, quality, and assessment requirements for these facilities. R93-10.)

SMALLER SOURCE PERMIT RULES ADOPTED, R93-11

On December 2, 1993, the Board adopted amendments to the air pollution control regulations that pertain to permitting smaller air pollution sources than previously subjected to the permitting requirements. The proposed amendments to Parts 201 and 211 of the air pollution control regulations would extend the applicability of the air rules to include smaller sources emitting as little as 25 tons per year of pollutants. The proposed amendments would add new Subpart E to Part 201 and Section 211.5500 to Part 211 of the Illinois air pollution control regulations. The previous threshold for the permit requirements was set at 100 tons per year.

This proceeding was driven by an amendment to Section 39(a) of the Environmental Protection Act made simultaneously with the addition of the "fast-track" procedure of Section 39.5 of the Act.

(See issue 457, Sept. 16, 1992.) The Agency filed the proposal on April 2, 1993. In accepting the proposal by an order dated April 6, 1993, the Board noted that it would not be able meet the March 31, 1993 statutory deadline for adoption of these

ENVIRONMENTAL INFORMATION SERVICES
AVAILABLE FROM THE BOARD

The Board has the following information available:

POLLUTION CONTROL BOARD ELECTRONIC BULLETIN BOARD SYSTEM (BBS). The Pollution Control Board operates an electronic BBS at 312-814-1590. The BBS is available 24 hours a day, 7 days a week, to anyone with access to a computer and a modem - there is no charge for access to the BBS. The best communications settings are 8 data bits (or data length 8), no parity (or parity = none) and 1 stop bit, i.e., 8-N-1. The best terminal emulation is ANSI-BBS or just ANSI. The BBS contains Board Agendas, Environmental Registers, Annual Reports, and various documents about the Board. You may download these documents to your computer. For additional information contact Bill Forcade at the Board Offices 312-814-3620.

SUBSCRIPTION SERVICE OF BOARD OPINIONS AND ORDERS. The subscription service comprises all the Opinions and Orders issued by the Pollution Control Board in a fiscal year (July 1 through June 30). The Board meets approximately twice monthly in order to issue Opinions and Orders.. Usually no later than the end of each month, a volume is issued containing the Opinions and Orders of the Board from the preceding month.

HARD COPIES OF BOARD OPINIONS AND ORDERS FOR FISCAL YEAR 1992 (July 1, 1991 through June 30, 1992) ARE AVAILABLE FOR IMMEDIATE DELIVERY. The cost is \$350.00 per set.

Two formats will be offered starting July 1 of this year (FY93): a hard paper copy for \$350.00 per year and an electronic version for \$275.00 per year. The electronic version will consist of Opinions and Orders in the WordPerfect 5.1 format on either 3.5" or 5.25" inch diskettes. The electronic format will allow for word searches and other useful tools provided by the WordPerfect software.

When ordering, please specify the choice of either the hard copy or electronic version. If ordering the electronic version, please specify 3.5" or 5.25" diskettes.

amendments. (See issue 469, Apr. 21, 1993.) The Board proposed these amendments for First Notice on July 22, 1993 (see issue 473, Aug. 4, 1993) and for Second Notice on October 7, 1993

(see issue 476, Nov. 3, 1993). The Board held public hearings in this matter on May 25, 1993, in Chicago, and on May 26, 1993, in DeKalb. For further information contact Michelle C. Dresdow, at

815-753-0947. (Please refer to docket R93-11.)

AMENDMENTS TO EXISTING SITE-SPECIFIC RULE ADOPTED, R93-8

On December 16, 1993, the Board adopted amendments to a site-specific rule. The site-specific water pollution control rule involved applied to UNO-VEN's predecessor-in-interest, Union Oil Co. of California, for the effluent from a refinery located in Will County, near Lemont. The Chicago Sanitary and Ship Canal is the receiving stream.

The adopted amendments change the rule to reflect the change in ownership of the facility to the petitioner, UNO-VEN Co.; they add a monthly-averaged concentration-based effluent limitation for ammonia nitrogen; the amendments require annual reporting of nitrogen in feedstock; and they extend the ultimate expiration date of the rule until December 31, 2001.

The Board proposed the amendments on August 26, 1993 for First Notice publication in the *Illinois Register* and for Second Notice review by the Joint Committee on Administrative Rules (JCAR) on November 18, 1993. (See issues 474, Sept 9, 1993 & 477 (Dec. 1, 1993).) Direct questions to Diane O'Neill, at 312-814-6062. (Please refer to docket R93-8.)

CORRECTIONS TO WASTE MANAGEMENT REMAND AMENDMENTS ADOPTED, R92-19

On December 16, 1993, the Board adopted corrections to the amendments to the landfill regulations made in response to a remand by the First District appellate court in *Waste Management of Illinois, Inc. v. IPCB* (1st Dist. 1992), 231 Ill. App. 3d 278, 595 N.E.2d 1171. The Board order will allow the Board to formally submit a request for expedited correction with the Joint Committee on Administrative Rules (JCAR) pursuant to Section 5-85 of the Administrative Procedure Act. The Board order intended to correct an inadvertent typographical error: the Notices of Adopted Amendments published in the *Illinois Register* indicated the intended deletions, but the copies placed on file with the Secretary of State still included the deleted language.

On June 17, 1993, the Board adopted a final opinion and order deleting three provisions from the Illinois non-hazardous landfill regulations. This was in response to the June 11, 1992 appellate court decision in *Waste Management of Illinois, Inc. v. IPCB* (1st Dist. 1992), 231 Ill. App. 3d 278, 595 N.E.2d 1171, which affirmed those regulations in all respects but two. The *Waste Management* court invalidated two of the landfill provisions: the requirement of Section 811.310(d)(1)(F) for monitoring air toxics, based on a legislatively-mandated but yet then yet-to-be-adopted list of chemicals, and the provision in Section 813.106(b) that provided, for the purposes of an appeal to the Board of an Agency action, the Agency's final action will be that taken on reconsideration if the permittee submitted a request for Agency reconsideration. The appellate court issued its mandate on August 13, 1992, and the Board initiated this proceeding by proposing amendments on October 1, 1992. (See issues 459 (Oct. 15, 1992), 464 (Feb. 3, 1993), 470 (May 19, 1993) & 472 (June 30, 1993).)

In addition to the two provisions held invalid by the First District, the Board also deleted a third provision from the rules. In the initial stages of this proceeding, the Board requested comment as to whether it should do so. That third provision, Section 811.310(c)(5), which related to monitoring air toxics, was closely tied to Section 811.310(d)(1)(F), which the court held invalid. Direct questions to Marie E. Tipsord, at 312-814-4925 or 618-498-9803. (Please refer to docket R92-19.)

HAZARDOUS WASTE PROHIBITIONS DOCKET DISMISSED,

R86-9(B)

On December 16, 1993, the Board dismissed an older proceeding that would have clarified Section 39(h) of the Environmental Protection Act, which requires Agency authorization of the generator's wastestream prior to deposit of the hazardous wastes in a hazardous waste site. The Board dismissed the proceeding because it was dormant for so long with the receipt of no expressions of public interest. The Board further cited that the record included no updated information on Agency implementation of Section 39(h).

In 1986, the Board adopted an emergency rule that essentially circumscribed the Agency's interpretation of Section 39(h) in its implementation of that provision. The Board was concerned that the Agency's implementation would intrude on the industrial processes generating the wastes. The First District appellate court dismissed the emergency rule in an appeal filed by the Citizens for a Better Environment, (*CBE v. PCB* (1st Dist. 1987), 152 Ill. App. 3d 105, 504 N.E.2d 166), stating that no emergency existed. In 1990, the Board decided that clarification of Section 39(h) was necessary and opened docket number R86-9(B).

questions to Marie E. Tipsord, at 312-814-4925 or 618-498-9803. (Please refer to docket R86-9(B).)

ARMY CORPS. DREDGING WATER QUALITY RULE PROPOSED FOR SECOND NOTICE, R92-17

On December 2, 1993, the Board proposed a rule for Second Notice review by the Joint Committee on Administrative Rules (JCAR) that would govern the placement of dredged material along the Illinois River between miles 80.2 and 291 by the Army Corps. of Engineers during dredging operations. The Board issued a supplemental opinion on December 16, 1993, in which it considered an additional public comment filed without changing the language of the proposed rule.

The Army Corps. filed a proposal on September 17, 1992, and the Board proposed the rule for First Notice publication in the *Illinois Register* on September 26, 1993. (See *issue 475, Oct. 6, 1993*.) The Board held public hearings on June 22, 1993, in Peoria, and June 23, 1993, in Morris. Following the hearings, the Board received public comments in favor of the proposal.

This rule would impose alternative limitations on the placement of dredged material, in place of the current prohibition against causing offensive conditions or a violation of the water quality limitations for dissolved oxygen, total, lead, total zinc, and ammonia nitrogen and un-ionized ammonia. The alternative limitations would allow bankline deposition during dredging operations, and would govern the percent of fine-grained material in the dredge cut and the area of the water that does not comply with the water quality standards. The limitations would require the Army Corps. to hold a Water Quality Certification for the dredging operations issued by the Agency pursuant to Section 401 of the Clean Water Act (33 U.S.C. § 1341). Direct questions to Michelle C. Dresdow, at 815-753-0947. (Please refer to docket R92-17.)

SECOND FIRST NOTICE PROPOSED FOR STEEL AND FOUNDRY LANDFILL AMENDMENTS, R90-26

On December 2, 1993, the Board proposed corrections to the second First Notice for segments of the proposed steel and foundry industry landfill amendments. The Board did this in response to indications by the staff of the Joint Committee on Administrative Rules (JCAR) that it was possible that two related segments of the regulations were incomplete.

The Board proposed the amendments for second First Notice

without substantive review on September 23, 1993. (*Issue 475, Oct. 6, 1993*.) In the text of the amendments submitted for First Notice publication in the *Illinois Register*, the Board inserted terms for later definition, in definitions Section 810.103 and the definitions segments of Section 817.102. The Board felt that addition of the definitions would be necessary for understanding and implementing the proposed amendments, if adopted. In place of the missing definitions for the terms, the Board inserted language, indicated as proposed amendments, that anticipated the provision of the definitions by the proponents of the amendments (members of the steel and foundry industries) before the Board proceeded with the amendments.

After the Notices of Proposed Amendments appeared in the *Illinois Register* on October 15, 1993, JCAR staff communicated to the Board that it understood the Board's desire to enhance the clarity of any amendments that might flow from the proposal, but also indicated that JCAR might ultimately object to any amendments that flowed from an incomplete proposed rule. The Board proposed the corrections so that a Notice of Corrections to Proposed Rules

could appear in the *Illinois Register*. Direct questions to Kathleen M. Crowley, at 312-814-6929. (Please refer to docket R90-26.)

RCRA SUBTITLE C HAZARDOUS WASTE UPDATE PROPOSED FOR PUBLIC COMMENT, R93-16

On December 16, 1993, the Board proposed identical-in-substance amendments to the Illinois RCRA Subtitle C regulations for the update period of January 1 through June 30, 1993. During that time U.S. EPA amended its RCRA Subtitle C regulations five times. U.S. EPA adopted its corrective action management unit (CAMU) and temporary unit (TU) regulations applicable to RCRA Subtitle C corrective actions, amended the land disposal restrictions for Third Third wastes, adopted technical amendments to the used and waste oil management standards, renewed a case-by-case capacity variance from the land disposal restrictions for hazardous debris, and amended land disposal restrictions for ignitable and corrosive wastes whose treatment standards were vacated by the court in *Chemical Waste Management v. EPA*, 976 F.2d 2 (D.C. Cir. 1992). The Board adopted the used and waste oil regulations, the subject of the present amendments, in R93-4, on September 26, 1993. (See *issue 475, Oct. 6, 1993*.) The Board also adopted the amended land disposal restrictions for ignitable and corrosive wastes in R93-4, thus obviating further action in this docket, except as to certain corrections submitted by U.S. EPA by way of public comment.

Essentially, all the proposed amendments involved some form of relaxation of standards that would otherwise apply to regulated facilities. However, many would impose some requirements as a condition to the relaxation. Direct questions to Michael J. McCambridge, at 312-814-6924. (Please refer to docket R93-16.)

PM₁₀ CONTINGENCY MEASURES RULEMAKING PROPOSAL FILED, R93-30

On December 30, 1993, the Agency filed a new Clean Air Act (CAA) rulemaking proposal with the Board. The new proposal, which is docket R93-30, seeks to add regulations establishing PM₁₀ contingency measures. Those measures would provide for additional reductions of PM₁₀ emissions for a specific area in the event a PM₁₀ nonattainment area attain compliance with the PM₁₀ standard by December 31, 1994.

This rulemaking was filed pursuant to the "fast-track" rulemaking provisions of Section 28.5 of the Environmental Protection Act. As previously reported for earlier-filed CAAA proceedings, (See

Environmental Register issues 461 (Dec. 2, 1992), 462 (Dec. 16, 1992), 465 (Feb. 24, 1993), 467 (Mar. 24, 1993), and 468 (Apr. 7, 1993)), Section 28.5 requires the Board to proceed within set time-frames toward the adoption of the proposed amendments. The Board lacks any discretion under the statute to adjust these time-frames under any circumstances.

The statute requires the Board to schedule three hearing dates in this matter, each for a prescribed purpose. The first day of hearing is reserved for presentation by the Agency and questions of Agency witnesses. The second scheduled day of hearing, if it occurs, is reserved for presentation by affected entities and all other interested persons. The third scheduled day of hearing, if it occurs, is reserved for any Agency response and responses of other parties. The hearings will be continued from day to day, as necessary, until all business is completed. However, the second and third hearing dates are subject to cancellation if the level of public interest and participation so warrant. The Board had not yet formally accepted the proposal and set hearings by the end of December. Direct questions to Elizabeth M. Harvey, at 312-814-6921. (Please refer to docket R93-30.)

APPELLATE UPDATE

FIRST DISTRICT REVERSES BOARD: THE LAW IN EFFECT AT THE TIME OF UNDERTAKING REMEDY APPLIES

The First District appellate court reversed a Board denial of eligibility for reimbursement from the Underground Storage Tank Fund, in Chemrex v. PCB (1st Dist. Dec. 28, 1993), No. 1-93-804. In Chemrex v. IEPA (Feb. 4, 1993), PCB 92-123, the Board had affirmed an Agency denial of eligibility for reimbursement for the costs it incurred in undertaking corrective action related to releases from multiple underground tanks.

The tank owner discovered releases from multiple registered tanks in early 1991. The owner promptly reported the releases, complied with all pertinent statutory and other requirements, and undertook corrective action. Later in 1991, the General Assembly amended the reimbursement provisions so that the tanks were no longer eligible for reimbursement based on their prior contents. The Agency denied reimbursement based on the statutory

change. The owner appealed to the Board, stating that the law in effect at the time it notified the Agency of the release should have applied to determine eligibility. The Board agreed with the Agency's interpretation and affirmed the Agency denial.

The owner appealed to the First District, arguing that the application of the later statutory amendments amounted to a retroactive application of the law that deprived it of a vested right. The Board and the Agency countered that rather than retroactive application of the law, the denial applied the law in effect at the time of the reimbursement request. The appellate court agreed with the tank owner. The court stated that where "a law affects vested rights, our public policy against retroactive application must be invoked." It further observed that a general rule of statutory construction requires prospective application of Illinois statutes. The court stated that since the tank owner had "performed every task required by statute and rules", so the Agency should have allowed reimbursement without regard to the intervening statutory changes. The court observed, based on the statutory language, that an Agency grant of reimbursement is a discretionary act. It concluded as follows:

[W]e conclude that [the Board and Agency] abused their discretion in applying the September 1991 amendment retroactively. ChemRex's assertion, that it had a right to reimbursement because it satisfied the eligibility criteria prior to its application and after the casualties occurred, must be sustained.

Illinois Environmental Protection Agency

Division of Public Water Supplies

Restricted Status List -- Public Water Supplies

The Restricted Status List was developed to give additional notification to officials of public water supplies which are in violation of 35 Ill. Adm. Code, Subtitle F: Public Water Supplies, Chapter I or the Illinois Environmental Protection Act.

The Restricted Status List will include all Public Water Supplies for which the Agency has information indicating a violation of any of the following requirements: Finished water quality requirements of 35 Ill. Adm. Code, Part 604, Subparts B and C; maintenance of adequate pressure on all parts of the distribution system under all conditions of demand; meeting raw water quantity requirements of 35 Ill. Adm. Code 604.502; or maintenance of treatment facilities capable of providing water "assuredly adequate in quantity" as required by Section 18 of the Illinois Environmental Protection Act.

A public water supply on the Restricted Status List will not be issued permits for water main extensions, except for certain limited situations, or unless the supply has been granted a variance from the Illinois Pollution Control Board for the violation, or from permit issuance requirements of Section 39 of the Act.

This list is continually being revised as new information becomes available, and therefore, specific inquiries as to the status of any public water supply should be directed to the Division of Public Water Supplies for final determination. This list reflects the status as of January 1, 1994.

- * Indicates public water supplies which have been added to the list since the previous publication.
- ** Indicates actions are being taken by officials to bring the public water supply into compliance.

Critical Review List -- Public Water Supplies

The Critical Review List was developed to give additional notification to officials of public water supplies which may be close to being in violation of 35 Ill. Adm. Code, Subtitle F: Public Water Supplies, Chapter I or the Illinois Environmental Protection Act.

A supply will be placed on the Critical Review List when Agency records indicate that it is approaching any of the violations which would place it on the Restricted Status List.

This list is continually being revised as new information becomes available, and therefore, specific inquiries as to the status of any public water supply should be directed to the Division of Public Water Supplies for final determination. This list reflects the status as of January 1, 1994.

- * Indicates public water supplies which have been added to the list since the previous publication.
- ** Indicates actions are being taken by officials to bring the public water supply into compliance.
