

EXH. 4

MTBE Groundwater Clean-up Levels for LUST Sites: Current & Proposed

January 2001

- MTBE Cleanup / Action Level (ug/L)
- Site-Specific MTBE Cleanup Level (ug/L)
- Projected 2001 MTBE Cleanup Level (ug/L)
- Waiting for EPA MCL

FOOTNOTE LEGEND:

- (1) - Clean-up level dependent on GW use as potable/non-potable
- (2) - Clean-up level/enforceable site-specific standard possible for drinking water
- (3) - Tier 1-RBSL clean-up/action level/Tier 2 drinking water cleanup level
- (4) - Public Health Goal (PHG)/enforceable secondary standard
- (5) - Action level
- (6) - WDNR NR 140 Enforcement Standard/Preventative Action Limit goals
- (7) - Health-risk guidance level; not enforced for LUST cleanup
- (8) - Groundwater resource used as drinking water
- (9) - Clean-up level/action level (i.e., ME 35/25)
- (10) - No PST cleanup level/non-PST aesthetic guideline level at 15 ug/L
- (11) - Method A MTBE groundwater clean-up level at 20 ug/L
- (12) - Tier 1 RBSL level based on aesthetics, effective March 2000
- (13) - (OR): drinking water guidance standard; (FL): rule - potable/non-potable
- (14) - Interim action MTBE levels (i.e., NV 20/200)
- (15) - Unenforceable guidance criteria/enforceable drinking water standard
- (16) - Proposed closure level: residential/non-residential
