NARRATIVE INSPECTION REPORT DOCUMENT

Date of Inspection: 06/29/05

Inspector: Joy Bliton

Site Code: 1418175004

County: Ogle

Site Name: Oregon Iron Metal Reclaimers, Inc. Time: 10:25 – 10:55 a.m.

GENERAL REMARKS

Weather Conditions: Mostly sunny, 84 Degrees, Winds E @ 8 MPH

I arrived at Oregon Iron Metal Reclaimers, Inc. at 10:25 a.m. I stopped by the office and told them I was here for an inspection. I walked up to the wooded area and looked at the pile of capacitors. These PCB containing capacitors are the subject of a separate investigation being conducted by the IEPA and USEPA, and will be addressed by them.

There were old barrels around the area that I had not seen at the last inspection. I continued into the woods and noted many tires and barrels along the way. I walked back down on the other roadway leading to the northwest corner of the site.

At the last inspection on December 29, 2004, scrap metal and tires were buried. This waste, along with plywood, vinyl, plastic, carpeting, metal springs, car parts and demolition waste, continues to be buried and has not been cleaned up. The leveled area has expanded to the northwest. Waste was sticking out from the bank and from the leveled area.

I walked to the south side of the site. A tire was sticking out from the berm. I walked around the scrap pile which has grown considerably, especially in white goods. I did not see any evidence that Freon is being removed from the appliances.

I walked back to the truck and left at 10:55 a.m.
