Respondent.)

ORDER OF THE BOARD (by J. D. Dumelle):

This matter comes before the Board upon a May 11, 1984 motion to correct inadvertent error filed on behalf of the Ford Motor Company. Ford points out that the Board's April 27, 1984 Order in this matter grants Ford, among other things, variance from 35 Ill. Adm. Code 215.204(a)(1) conditioned upon compliance with certain emission limitations. Section 215.204 (a)(1) establishes emission limitations applicable to prime, prime surfacer, top and final repair coatings. The emission limitations contained in the variance, however, are applicable to prime coats and prime surfacer coats only, thereby effectively deleting any limitations applicable to top coats and final repair coats. Such relief was not requested and was not intended by the April 27, 1984 Order. Therefore, Ford's motion is granted and the Board hereby deletes condition 1(a) of that Order and replaces it with the following:

- a) Ford shall not cause or allow the emission of volatile organic materials to exceed the following limitations on coating application:

Automobile or Light Duty Truck Manufacturing Plants

In Cook County	<u>Kg/l</u>	(lb/gal.)
Prime Coat	0.14	(1.2)
Prime surfacer coat	0.34	(2.8)

(This limitation is based upon a transfer efficiency of 30 percent.)
