 ) Respondent. )

ORDER OF THE BOARD (by B. Forcade):

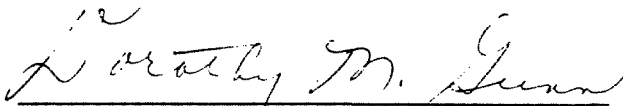

On March 30, 1987, the Village of Roselle filed a Petition for Variance, seeking relief from regulations on restricted status and standards for permit issuance as those regulations pertain to limitations on combined Radium-226 and 228. That petition is deficient in that:

It asserts that Well No. 5 is the only high radium well and produces approximately 26% of the total pumping capacity. The petition fails to provide sufficient information on the location of wells, blending capacities, and distribution system to allow the Board to determine whether blending could be used to reduce the contamination levels, and additional information on past levels of radium sampling and analysis or a statement that no additional data exist.

Unless an amended petition is filed within 45 days of the date of this Order, curing the above-noted defect, this matter will be subject to dismissal.

IT IS SO ORDERED.

I, Dorothy M. Gunn, Clerk of the Illinois Pollution Control Board, hereby certify that the above Order was adopted on the 1<sup>st</sup> day of April, 1987, by a vote of 6-0.

  
Dorothy M. Gunn, Clerk  
Illinois Pollution Control Board
