PROTECTION AGENCY, )  
 )  
Respondent. )

ORDER OF THE BOARD (by B. Forcade):

On May 16, 1986, the Army Corps of Engineers and Alton Packaging Corporation filed a petition for variance from certain regulations pertaining to Water Pollution Control. That Petition is deficient in that:

1. More information is required on the quality of effluent that will be temporarily discharged to the "drainage ditch," as well as more information on the ditch itself (including length, flow, present water quality and any anticipated adverse impact from the additional effluent); and
2. Greater specificity is required respecting the term of the variance. The present petition appears to request variance for one month at some time over the next two years; this should be clarified.

Unless an amended petition is filed within the next 45 days curing these deficiencies, this matter will be subject to dismissal.

The Board notes that the variance petition appears to seek relief for both the Army Corps of Engineers and Alton Packaging. If both entities are not "petitioners," the Board should be so advised.

IT IS SO ORDERED.

I, Dorothy M. Gunn, Clerk of the Illinois Pollution Control Board, hereby certify that the above Order was adopted on the 22<sup>nd</sup> day of May, 1986, by a vote of 7-0.

---

Dorothy M. Gunn, Clerk  
Illinois Pollution Control Board
