(NEW SOURCE PERFORMANCE STANDARDS:)
PHOSPHATE FERTILIZER INDUSTRY:)
WET PROCESS PHOSPHORIC ACID PLANTS;)
SUPERPHOSPHORIC ACID PLANTS;)
DIAMMONIUM PHOSPHATE PLANTS; TRIPLE)
SUPERPHOSPHATE PLANTS, respectively))

RESOLUTION AND ORDER OF THE BOARD (By J.D. Dumelle):

On February 17, 1983 the United States Environmental Protection Agency published a revision notice (48 Fed. Reg. 7128) to 40 CFR Part 60 -- Standards of Performance for New Stationary Sources - Phosphate Fertilizer Industry: Subpart T -- Wet Process Phosphoric Acid Plants; Subpart U -- Superphosphoric Acid Plants; Subpart V -- Diammonium Phosphate Plants; Subpart W -- Triple Superphosphate Plants.

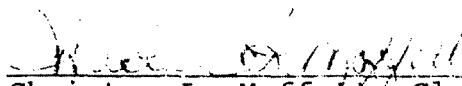

These revisions limit the applicability of standards to plants with a capacity of more than 15 tons of equivalent phosphorus pentoxide (P_2O_5) feed per day. The effect of these revisions is to exempt from the standard small plants used for research and development of production processes.

Pursuant to Section 9.1 of the Illinois Environmental Protection Act, the Board hereby adopts the above-noted revisions to Rules 918, 919, 920 and 921 of Part IX: New Source Performance Standards of Chapter 2: Air Pollution.

IT IS SO ORDERED.

Mr. Nega abstained.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify that the above Resolution and Order was adopted on the 13 day of March, 1983 by a vote of 7-0.

Christan L. Moffett, Clerk
Illinois Pollution Control Board
