

ILLINOIS POLLUTION CONTROL BOARD
December 1, 1983

IN THE MATTER OF:)
)
PETITION OF THE VILLAGE OF SAUGET) R81-12
AND CITY OF EAST ST. LOUIS RE:)
SITE-SPECIFIC COMBINED SEWER)
OVERFLOW TREATMENT,)
35 ILL. ADM. CODE 306.501)

Proposed Rule. Second Notice.

ORDER OF THE BOARD (by J. Anderson):

The rule, as proposed in the Board's Order of September 23, 1983, was published at 7 Ill. Reg. 13338, October 21, 1983. The only comment received was from the State Library concerning source notes.

The Board on its own motion is making one change to Section 306.501(a), correcting the description of the discharge location. In proposing the rule, the Board had failed to notice the petitioners' error made in the proposal which had transposed the latitude/longitude descriptors. (The rule as drafted has the discharge located in the 90° latitude of the North Pole.) Aside from this technical correction no other changes are necessary.

The rule, as follows, shall be submitted to the Joint Committee on Administrative Rules for Second Notice:

TITLE 35: ENVIRONMENTAL PROTECTION
SUBTITLE C: WATER POLLUTION
CHAPTER I: POLLUTION CONTROL BOARD

PART 306
PERFORMANCE CRITERIA

SUBPART F: SITE SPECIFIC RULES AND EXCEPTIONS

Section 306.501 East St. Louis-Sauget Site-Specific Discharges

- a) The discharge from the sewer system of the City of East St. Louis, as described below, shall not be subject to the treatment requirements and timetables of Sections 306.305(b), and 306.306. The discharge is located in Lots 305 and/or 306 of Sixth Subdivision

of Cahokia Commons and also in the Northwest Quarter Section 23, Township Two North, Range Ten West, of the Third Principal Meridian, and can be defined as being at Mississippi River Mile Number 178.7 and further can be defined as being located at North ~~90~~⁹⁰ ~~38~~³⁸, ~~10~~³⁶ 36 minutes, 40 seconds latitude and west ~~30~~³⁰ 90, ~~36~~³⁶ 10 minutes, 40 seconds longitude.

- b) The first flush of storm flows shall meet the applicable effluent standards, except when such flows would cause the treatment plant to operate beyond design capacity.
- c) Overflows in excess of plant treatment capacity shall be passed through a 1/2 inch bar screen prior to discharge.
- d) Overflows shall not cause accumulation of unnatural sludge deposits in the receiving stream.

IT IS SO ORDERED.

Board Members J. Marlin and B. Forcade abstained.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify that the above Opinion and Order was adopted on the 1st day of December, 1983 by a vote of 5-0.

Christan L. Moffett, Clerk
Illinois Pollution Control Board
