Bradley Halloran
Hearing Officer

RE: PCB No. 05-217

Mr. Halloran:

This letter is in response to the affirmative defense written for TNT Logistics North America Inc. dated August 18th, 2005. The defense denied or simply acknowledged my original complaints before the Pollution Control Board PCB No. 05-217. Although TNT Logistics North America Inc. cannot find support for the complaints, a sound study has been conducted to document noise levels at several sites.

TNT Logistics North America Inc. further states that the trucks causing most of the noise are not owned nor operated by TNT Logistics North America Inc. It is my contention that the noise is emanating from their property, and are therefore they are responsible for its control.

The letter written for TNT Logistics North America Inc. dated August 18th, 2005, phone conversations with representatives for TNT Logistics North America Inc., and subsequent letters written for TNT Logistics North America Inc. dated October 14th, 2005 have failed to adequately satisfy my complaints of noise pollution. No actions offered to this date have caused me to alter or discontinue my original complaint.

Sincerely,

Ken Blouin
