Hey Lyn,

I went to donate plasma today in Bolingbrook. It is my main source of income.

Afterwards I wanted to go take a look at the prominently placed SWPPP sign at the above location.

First, there are severe accessibility issues with accessing the SWPPP sign. It is definitely not available for viewing by all of the public. Particularly, individuals with disabilities.

Second, like the mafia, there is no SWPPP information. The sign is blank.

Given how they just received a letter of compliance on 6/24/2022 and today the site has a pervasive pattern of violations throughout the site. I would have to make an informal complaint regarding their continued disregard for the spirit of The Clean Water Act NPDES Permit Program.

I would take special note of the concrete washout on the ground in the public area of the parking lot, where every time I have been to this site, someone was walking their dog.

Kind Regards,

Paul Pratapas
