**Subject:** [External] Lexington Trace Complaints

The above case where we have been discussing unethical behavior by Brad within his role has been forwarded to FBI along with information regarding the other case where Brad failed to report wire fraud and harassment of me and my parents via text and telephone by Earthworks Environmental. all clear and undeniable fraud within a federal program implemented by a state agency. Which would at the absolute bare minimum require reporting to OIG.

The FBI seems interested in speaking with Brad.

A separate complaint for corrupt public officials will be filled today. I plain as day watched him over the period of years conspire with the Illinois EPA, and attorneys for permit violators to have cases dismissed and penalties minimized to the point of nobody finding out about the massive fraud. And zero permits being pulled to protect the Illinois EPA from being held accountable for turning the program into a continuing criminal enterprise as prohibited by the RICO Act.

every attorney who made materially false statements on behalf of a permit holder, who was bound by a sign certification, under penalty of law, will also be forwarded to the disciplinary board for review. The entire point of the signed certification is to not deal with these attorneys and these corrupt hearing officers, but to keep the integrity of the natural environment And intervene immediately when permits are violated. It is the epitome of "just the facts ma'am".

Brad has definitely found a way to prevent that.
