RE: Continuing Education Requirements

Dear Chairman and Board Members:

We sincerely appreciate the opportunity to review the Drycleaner Environmental Response Trust Fund Act Proposal and provide our insights and comments. We have reviewed the document, and we have some questions and need further clarification on the following items:

(1) CEU Program Subject Matter Contents and Materials:

- How will the contents of the CEU program be established?
- Who will provide the materials for the CEU programs?
- Will the EPA provide the materials?

(2) CEU Program Instructors' Qualifications:

- Who will be qualified to teach the CEU program?
- How will their qualifications be verified?
- Will they be certified or licensed by the EPA?

(3) CEU Program Verified Attendance:

- How will the course attendance be verified?
- Will you require a formal picture ID?
- If the course is conducted online, how will you verify the identity of the actual person taking the online course?
- What kind of measures will be established to prevent or limit fraud?

These are some of the preliminary questions we have, and depending on how the board answers these questions, we may have further questions and request more detailed clarifications. Again, we greatly appreciate your efforts to learn and understand our concerns and input for consideration and further discussion.

Jae Ung Yoon  
The 27<sup>th</sup> KADA President
