Hello, my name is Jenn Dever. I care deeply about the environment we all share. I believe that it is Not okay for the folks with the deep pocketbooks -and thus the power- to hold hostage our entire Shared ecosystem by not moving forward with essential clean vehicle and transportation standards. It is imperative now, with federal action likely stymied, that Illinois be a bold leader. We need the Advanced Clean Trucks (ACT), and the Advanced Clean Cars II (ACC II) to be adopted here in our state. Clean cars are already cheaper to maintain and fuel than their gasoline counterparts, there are ample public charging stations and clean cars will bring jobs to Illinois. Several other states have already adopted these standards, and are showing much success. It is embarrassing and unacceptable that Illinois currently emits the 7th most pollution in the U.S. I urge you to adopt these clean vehicle standards and stand at the head of the crowd to combat climate change and improve the quality of life for all Illinoisans.

Thank you for your time and consideration, Jenn Dever
