Federal Update

United States Environmental Protection Agency Adopts Filter Backwash Recycling Rule in Final Rule under Safe Drinking Water Act

On June 8, 2001, USEPA adopted the Filter Backwash Recycling Rule (FBRR) in a final rule. 66 Fed. Reg. 31085.

The purpose of the FBRR is to further protect public health by requiring public water systems (PWS), where needed, to institute changes to the return of recycle flows to a plant's treatment process that may otherwise compromise microbial control. The final rule addresses a statutory requirement of the Safe Drinking Water Act Amendments of 1996 (42 U.S.C. §§ 300f *et seq.* (1998)) to promulgate a regulation which governs the recycling of filter backwash water within the treatment process of a PWS.

The final rule becomes effective August 7, 2001. For further information contact Jeffery Robichaud at 202/260-2568. For general information contact the Safe Drinking Water Hotline at 800/426-4791.

In response to this USEPA action, the Board will include any necessary amendments to its drinking water rules in an upcoming identical in substance rulemaking pursuant to Sections 7.2 and 17.5 of the Environmental Protection Act (415 ILCS 5/7.2, 17.5 (2000)).

United States Environmental Protection Agency Withdraws Two Provisions from Direct Final Rule for Standards of Performance for Electric Utility Steam Generating Units for Which Construction is Commenced after September 18, 1978, and Standards of Performance for Industrial-Commercial-Institutional Steam Generating Units Under the Clean Air Act

On June 11, 2001, USEPA partially withdrew portions of the direct final rule published on April 10, 2001 for Subpart Da - Standards of Performance for Electric Utility Steam Generating Units for Which Construction is Commenced After September 18, 1978, and Subpart Db - Standards of Performance for Industrial-Commercial-Institutional Steam Generating Units (66 Fed. Reg. 18546) as a result of receiving relevant adverse comment. 66 Fed. Reg. 31177 (June 11, 2001). These New Source Performance Standards (NSPS) provisions deal with the revised definition of "boiler operating day" and the data substitution requirement for missing data.

The withdrawal became effective June 11, 2001. The remaining provisions published on April 10, 2001, will also become effective June 11, 2001, as stated in the April 10, 2001 direct final rule. For further information contact James Eddinger at 919/541-5426; e-mail address: eddinger.lim@epa.gov.

Pursuant to Section 9.1(b) of the Environmental Protection Act (Act) (415 ILCS 5/9.1(b) (2000)), once adopted by USEPA, NSPS rules are applicable and enforceable under the Act without further action by the Board. This withdrawal action would be similarly applicable without further action of the Board.

United States Environmental Protection Agency Proposes Revisions to the Federal NOX Budget Trading Program, the Emissions Monitoring Provisions, the Permits Regulation Provisions, and the Appeal Procedures under the Clean Air Act

On June 13, 2001, USEPA proposed revisions to the federal NOX budget trading program, emissions monitoring provisions, permit regulation provisions, and appeal procedures for the NOX program. 66 Fed. Reg. 31977.

USEPA is proposing rule revisions that would modify the existing requirements for sources affected by the Federal NOX Budget Trading Program, the Acid Rain Program, and the October 27, 1998 NOX SIP Call. The proposed revisions are designed to streamline and add flexibility to the monitoring and reporting requirements in response to the significant changes that have occurred in power generation in recent years. These changes are due both to deregulation and recent environmental actions initiated by USEPA to reduce nitrogen oxides emissions. The proposed action would also make certain technical corrections, remove outdated provisions, and correct printing, typographical, and grammatical errors to correct or clarify cross references, and, in a few instances, to ensure that the specific rule language is consistent with USEPA's intent.

Comments must be received by July 30, 2001. Anyone requesting a public hearing must contact USEPA by June 25, 2001. For further information contact Gabrielle Stevens at 202/564-2681 or the Acid Rain Hotline at 202/564-9620. Technical support documents may be accessed through USEPA's Web site at: <http://www.epa.gov/airmarkets>.

If USEPA adopts these proposed rules, and amendments to the Illinois air rules become necessary, the Board would expect the Illinois Environmental Protection Agency to propose amendments using the Clean Air Act "fast-track" procedures at Section 28.5 of the Environmental Protection Act (415 ILCS 5/28.5 (2000)).

United States Environmental Protection Agency Proposes Requirements for Small Municipal Waste Combustion Units Constructed before August 30, 1999 under the Clean Air Act

On June 14, 2001, USEPA proposed federal plan requirements for small municipal waste combustion (MWC) units constructed on or before August 30, 1999. 66 Fed. Reg. 32483.

On December 6, 2000, USEPA adopted emission guidelines for existing small MWC units. Existing small MWC units are those units on which construction was commenced on or before August 30, 1999. Sections 111 and 129 of the Clean Air Act (CAA) (42 U.S.C. §§ 7401 *et seq.* (1998)) require states with existing small MWC units subject to the emission guidelines to submit plans to USEPA that implement and enforce the emission guidelines. State plans are due from states with small MWC units subject to the emission guidelines on December 6, 2001. If a state with existing small MWC units does not submit an approvable plan within two years after promulgation of the emission guidelines (December 6, 2002), Sections 111(d) and 129 of the CAA require USEPA to develop, implement, and enforce a federal plan for small MWC units located in that state.

The June 14, 2001 USEPA action proposes a federal plan to implement emission guidelines for small MWC units located in states without USEPA approved and effective state plans. The federal plan, when finalized, will be an interim action because on the effective date of an approved state plan, the federal plan will no longer apply to small MWC units covered by the state plan.

Comments on the proposal must be received by August 13, 2001. A public hearing will be held if requests are received by June 29, 2001. For further information contact Lalit Banker at 919/541-5420; email address: banker.lalit@epa.gov.

If USEPA adopts these proposed rules, and amendments to the Illinois air rules become necessary, the Board would expect the Illinois Environmental Protection Agency to propose amendments using the Clean Air Act "fast-track" procedures at Section 28.5 of the Environmental Protection Act (415 ILCS 5/28.5 (2000)).

Rule Update

Board Adopts Second Notice Proposal in Proposed Regulated Recharge Area for Pleasant Valley Public Water District, Proposed Amendments to 35 Ill. Adm. Code Part 617, R00-17

On June 7, 2001, the Board proposed amendments to 35 Ill. Adm. Code Part 617 for second notice review by the Joint Committee on Administrative Rules. The proposed rules would create a regulated recharge area for the Pleasant Valley Public Water District in Peoria County, Illinois. The Pleasant Valley proposal is the first regulated recharge area proposal brought to the Board, and its adoption would create the State's first regulated recharge area.

The Board's second notice proposal follows substantially the proposal filed by the Illinois Environmental Protection Agency (Agency) on February 14, 2000. The Board adopted first notice rules on August 10, 2000 that were published in the *Illinois Register* on August 30, 2000. 25 Ill. Reg. 13164. The Board held a public hearing on May 9, 2000, in Peoria, Illinois. Two witnesses presented testimony at the public hearing. Seven public comments have been filed with the Board since adoption of the first notice proposal.

Pursuant to Section 17.3 of the Environmental Protection Act (Act) (415 ILCS 5/17.3 (2000)), the Agency may propose regulated recharge area regulations to the Board. The Agency developed its proposal in consultation with the Groundwater Advisory Council (Council), an agency and citizen body established under the Illinois Groundwater Protection Act (415 ILCS 55/1 *et seq.* (2000)) to "review, evaluate and make recommendations regarding State laws, regulations and procedures that relate to groundwater protection." The Agency additionally sought and received advice from the Central Priority Groundwater Protection Planning Region Committee (Committee), a broad-based local government and citizen group as provided for at Section 17.2 of the Act. 415 ILCS 5/17.2(b) (2000). The Agency, Committee, and Council conducted a pre-proposal regulatory development workshop and solicited and obtained additional comments on the proposal from members of various environmental associations and private citizens groups.

Board Adopts Second Notice Proposal in Proposed Amendments to Tiered Approach to Corrective Action Objectives (TACO): 35 Ill. Adm. Code 742, R00-19(B)

On June 7, 2001, the Board proposed rules to amend 35 Ill. Adm. Code Part 742 for second notice review by the Joint Committee on Administrative Rules. On May 15, 2000, the Illinois Environmental Protection Agency (Agency) filed a proposal to amend the Board's land regulations at 35 Ill. Adm. Code 742, commonly referred to as the Tiered Approach to Corrective Action Objectives (TACO) rules. The TACO rules were originally adopted by the Board on June 5, 1997, in Tiered Approach to Corrective Action Objectives (TACO): 35 Ill. Adm. Code 742, R97-12(A). Part 742 contains procedures for developing remediation objectives based on risks to human health and the environment posed by environmental conditions at sites undergoing remediation in the Site Remediation Program, the Leaking Underground Storage Tank Program, and pursuant to Resource Conservation and Recovery Act Part B permits and closures.

On July 27, 2000, the Board moved the Agency's proposed rulemaking to first notice. In doing so, the Board divided the proposal into two subdockets, A and B. The first notice rules were published in the *Illinois Register* on August 18, 2000. 25 Ill. Reg. 12225. Three hearings were held in this matter during the first notice period. In addition to the testimony and exhibits presented at hearing, the Board has also received numerous public comments in this matter.

For additional information contact Amy Jackson at 217/524-8507; e-mail address: jacksona@ipcb.state.il.us.

Board Creates Docket in Proposed Amendments to Tiered Approach to Corrective Action Objectives (TACO): 35 Ill. Adm. Code 742, R00-19(C)

On May 15, 2000, the Illinois Environmental Protection Agency (Agency) filed a proposal to amend 35 Ill. Adm. Code 742 of the Board's land regulations, commonly referred to as the Tiered Approach to Corrective Action Objectives (TACO) rules. On June 7, 2001, the Board created this Subdocket C to address proposed clean up standards for methyl tertiary-butyl ether (MTBE).

The Board determined that this subdocket is necessary in light of another pending Agency proposal that would add groundwater quality standards for MTBE. See Proposed MTBE Groundwater Quality Standards Amendments: 35 Ill. Adm. Code 620, R01-14. Additionally, the Board noted recent action in the State legislature to ban the use of MTBE in Illinois. Specifically, the General Assembly has sent to the Governor for his action House Bill 171, which would

prohibit the use, sale, distribution, blending, or manufacturing of MTBE as a fuel additive in Illinois. If signed by the Governor, the ban would become effective in three years.

Board Adopts First Notice Proposal in Revisions to Antidegradation Rules: 35 Ill. Adm. Code 302.105, 303.205, 303.206, 102.800, 102.810, 102.820 and 102.830, R01-13

On June 21, 2001, the Board proposed rules to amend 35 Ill. Adm. Code 302.105, 303.205, 303.206 and 102.800-830 for first notice publication in the *Illinois Register*. On August 30, 2000, the Illinois Environmental Protection Agency (Agency) filed a proposal for rulemaking to amend the Board's water "nondegradation" rules to more accurately implement the required federal concepts of antidegradation and outstanding resource waters for the State of Illinois. The Agency also proposed amendments to the Board's procedural rules to include provisions for designating outstanding resource waters in Illinois. On September 7, 2000, the Board accepted the proposal for hearing.

The Board has held three hearings in this matter. Several participants testified at the hearings, and the Board has received a total of 47 comments in this proceeding.

The State of Illinois' antidegradation policy and implementation procedures must be consistent with the components detailed in the federal regulations. The components of the federal plan included a three-tiered approach. Currently, the Agency reviews applications for NPDES permits to determine if the discharges to be permitted will degrade the waters of the State. The Agency will continue to review antidegradation as part of the NPDES permit application process.

The Board's first notice proposal is similar to that filed by the Agency. However, the Board has proposed amendments to its procedural rules in Part 102, rather than to Part 106 as suggested by the Agency. The first notice proposal will be published in the *Illinois Register* on July 13, 2001. The Board will accept written public comment for at least 45 days after the date of publication.

Board Adopts Proposal for Public Comment in Safe Drinking Water Act (SDWA) Update, USEPA Regulations (July 1, 2000 through December 31, 2000), R01-20

On June 21, 2001, the Board proposed for public comment amendments to the Illinois regulations that are identical in substance to the National Primary Drinking Water regulations adopted by the United States Environmental Protection Agency (USEPA). These regulations implement Sections 1412(b), 1414(c), 1417(a), and 1445(a) of the Safe Drinking Water Act (SDWA) (42 U.S.C. §§ 300g-1(b), 300g-3(c), 300g-6(a), and 300j-4(a)).

The amendments were proposed pursuant to Section 17.5 of the Environmental Protection Act (Act) (415 ILCS 5/17.5 (2000)), which provides for quick adoption of regulations that are "identical in substance" (IIS) to federal regulations that USEPA adopts to implement Sections 1412(b), 1414(c), 1417(a), and 1445(a) of the SDWA. Section 17.5 also provides that Title VII of the Act and Section 5 of the Administrative Procedure Act (5 ILCS 100/5-35, 5-40 (2000)) do not apply to the Board's adoption of IIS regulations. The federal SDWA regulations are found at 40 C.F.R. §§ 141 and 142. This docket includes federal SDWA amendments that USEPA adopted in the period July 1, 2000 through December 31, 2000.

In this action, the Board proposed new monitoring requirements for uranium, a previously unregulated contaminant, combined radium, and gross alpha particle, beta particle, and photon radioactivity. The proposal will be published in the *Illinois Register* on July 13, 2001, commencing the 45-day public comment period.

Listing of Adjusted Standards

LISTINGS OF ADJUSTED STANDARDS AND COMBINED SEWER

OVERFLOW EXCEPTIONS GRANTED BY THE BOARD DURING
FISCAL YEAR 2001

Section 28.1(d)(3) of the Environmental Protection Act (Act) (415 ILCS 5/28.1(d)(3) (2000)) requires the Board to annually publish in the *Illinois Register* and *Environmental Register* a listing of all determinations made pursuant to Section 28.1 at the end of each fiscal year. This notice sets forth all adjusted standards and combine sewer overflow exception determinations made by the Board during the fiscal year 2001 (July 1, 2000 through June 30, 2001).

Final Actions Taken by the Pollution Control Board in Adjusted Standards Proceedings During Fiscal Year 2001 (July 1, 2000 through June 30, 2001)

<u>Docket/Docket Title</u>	<u>Final Determination</u>
<u>In the Matter of: Petition of Illinois -American Water Company's Alton Public Water Supply Replacement Facility Discharge to the Mississippi River for an Adjusted Standard from 35 Ill. Adm. Code 304.124, 304.106, and 302.203</u> (September 7, 2000), AS 99-06	The Board granted this Madison County facility an adjusted standard, subject to conditions, from the effluent discharge requirements in 35 Ill. Adm. Code 302.203, 304.106, and 304.124 subject to conditions. The Board denied petitioner's request for an adjusted standard from Section 304.124 of the Board's rules as it applies to iron as unnecessary.
<u>In the Matter of: Petition of Borden Chemicals & Plastics Operating Limited Partnership for an Adjusted Standard from 35 Ill. Adm. Code 304.105 as it Applies to 35 Ill. Adm. Code 302.211 (B)-(E)</u> (October 19, 2000), AS 01-04	The Board entered an order dismissing this petition for an adjusted standard from the general use water quality standards for temperature for Borden's facility in Illiopolis, Sangamon County. Petitioner failed to file the certificate of publication within 14 days as required by Section 28.1(d)(1) of the Environmental Protection Act (415 ILCS 5/28.1(d)(1) (2000)).
<u>In the Matter of: Petition of Bema Film Systems, Inc. for an Adjusted Standard from 35 Ill. Adm. Code 218.401(a), (b), and (c) (the "Flexographic Printing Rule")</u> (January 18, 2001), AS 00-11	The Board granted this DuPage County facility an adjusted standard, subject to conditions, from the volatile organic material emission control requirements found at 35 Ill. Adm. Code 218.401(a), (b), and (c).

In the Matter of: Petition of Vonco Products, Inc. for an Adjusted Standard from 35 Ill. Adm. Code 218.401(a), (b), and (c) (the "Flexographic Printing Rule") (January 18, 2001), AS 00-12

The Board granted this Lake County facility an adjusted standard, subject to conditions, from the volatile organic material emission control requirements found at 35 Ill. Adm. Code 218.401(a), (b), and (c).

In the Matter of: Petition of Formel Industries, Inc. for an Adjusted Standard from 35 Ill. Adm. Code 218.401(a), (b), and (c) (the "Flexographic Printing Rule") (January 18, 2001), AS 00-13

The Board granted this Cook County facility an adjusted standard, subject to conditions, from the volatile organic material emission control requirements found at 35 Ill. Adm. Code 218.401(a), (b), and (c).

In the Matter of: Petition of Heritage Environmental Services, Inc. for an Adjusted Standard from 35 Ill. Adm. Code 702.126(d)(1) (February 1, 2001), AS 00-15

The Board granted this Cook County facility an adjusted standard, subject to conditions, from certain requirements concerning certification of landfill permit applications found at 35 Ill. Adm. Code 702.126(d)(1).

In the Matter of: Petition of The City of Geneva for an Adjusted Standard from 35 Ill. Adm. Code 807.104 (May 17, 2001), AS 01-02

The Board denied this Kane County petitioner's request for an adjusted standard from the Board's waste disposal regulations, finding that Geneva had not demonstrated that an adjusted standard was warranted considering the factors of Section 28.1 of the Act (415 ILCS 5/28.1 (2000)).

Final Actions Taken by the Board in Combine Sewer Overflow Exception Proceedings During Fiscal Year 2001 (July 1, 2000 through June 30, 2001)

The Board took no action in combined sewer overflow exception proceedings during fiscal year 2001.

IEPA Restricted Status List

Division of Public Water Supplies
 Restricted Status List -- Public Water Supplies
 July, 2001

The Restricted Status List was developed to give additional notification to officials of public water supplies which are in violation of 35 Ill. Adm. Code, Subtitle F: Public Water Supplies, Chapter I or the Illinois Environmental Protection Act.

The Restricted Status List will include all Public Water Supplies for which the Agency has information indicating a violation of any of the following requirements: Finished water quality requirements of 35 Ill. Adm. Code, Part 604, Subparts B and C; maintenance of adequate pressure on all parts of the distribution system under all conditions of demand; meeting raw water quantity requirements of 35 Ill. Adm. Code 604.502; or maintenance of treatment facilities capable of providing water "assuredly adequate in quantity" as required by Section 18 of the Illinois Environmental Protection Act.

A public water supply on the Restricted Status List will not be issued permits for water main extensions, except for certain limited situations, or unless the supply has been granted a variance from the Illinois Pollution Control Board for the violation, or from permit issuance requirements of Section 39 of the Act.

This list is continually being revised as new information becomes available, and therefore, specific inquiries as to the status of any public water supply should be directed to the Division of Public Water Supplies for final determination. This list reflects the status as of July, 2001.

*Indicates public water supplies which have been added to the list since the previous publication.

IEPA Critical Review List

Illinois Environmental Protection Agency
Division of Public Water Supplies
Critical Review List -- Public Water Supplies
July 1, 2001

The Critical Review List was developed to give additional notification to officials of public water supplies which may be close to being in violation of 35 Ill. Adm. Code, Subtitle F: Public Water Supplies, Chapter I or the Illinois Environmental Protection Act.

A supply will be placed on the Critical Review List when Agency records indicate that it is approaching any of the violations, which would place it on the Restricted Status List.

This list is continually being revised as new information becomes available, and therefore, specific inquiries as to the status of any public water supply should be directed to the Division of Public Water Supplies for final determination. This list reflects the status as of July 1, 2001.

· Indicates public water supplies that have been added to the list since the previous publication.
