

ILLINOIS POLLUTION CONTROL BOARD
November 1, 1979

IN THE MATTER OF:)
EMISSIONS OF CARBON MONOXIDE) R78-1
FROM STEEL MILLS)

OPINION AND ORDER OF THE BOARD (by Mr. Dumelle):

On October 18, 1979 the Agency asked the Board to refrain from taking final action in this matter until Petitioners had supplied the Board with dispersion models consistent with USEPA guidelines. The Agency felt that the Board should not reach a decision which could not be approved as a revision to the Illinois Implementation Plan by the Federal government.

On October 23, 1979 Interlake, Inc., US Steel Corporation, and WSC Corporation (Chicago Petitioners) responded by stating that the Agency was not raising any issue which had not already been reviewed by the Board. Chicago Petitioners felt that USEPA would approve the Board's decision to delete Rule 206(d) based on the present record. In the event that additional modelling is necessary, Chicago Petitioners are already prepared to supply it to USEPA.

The Board remains convinced that Rule 206(d) should be deleted. All of the Petitioners' modelling results were evaluated in the Board's Proposed Opinion dated September 20, 1979. The Agency has not presented any new information to dissuade the Board. If additional documentation is needed for Federal approval, the Board is confident that Petitioners will supply it.

The Board hereby adopts its Proposed Opinion and this Opinion as its Opinion in this proceeding.

ORDER

Rule 206(d) of the Air Pollution Control Regulations is hereby deleted.

IT IS SO ORDERED.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify the above Opinion and Order were adopted on the 4th day of November, 1979 by a vote of 4-0.

Christan L. Moffett, Clerk
Illinois Pollution Control Board
