Environmental Register

August 2001 - Number 566

The Environmental Register is a Publication of the Illinois Pollution Control Board

Claire A. Manning, Chairman

Board Members:

Ronald C. Flemal, G. Tanner Girard, Thomas E. Johnson, Elena Z. Kezelis, Samuel T. Lawton Jr., Nicholas J. Melas

Illinois Pollution Control Board James R. Thompson Center 100 W. Randolph, Suite 11-500 Chicago, Illinois 60601 (312) 814-3620 (312) 814-6032 TDD Illinois Pollution Control Board 600 South Second Street Suite 402 Springfield, Illinois 62704 (217) 524-8500

Web Site: http://www.ipcb.state.il.us

Letter from the Chairman

The Pollution Control Board welcomes a new member. Governor George H. Ryan appointed Thomas E. Johnson to a three-year term on the Board. Johnson is quickly adjusting to in his new role as Board Member. Johnson brings to the Board more than a decade of legal experience. He graduated from Northern Illinois University School of Law in 1989. He has a B.S. in Finance from the University of Illinois. Johnson has an extensive background in public service. He has served on the Champaign County Board. He was a Special Assistant Attorney General, a Special Prosecutor for the Secretary of State and a Central Office Director to the Illinois Department of Transportation. Johnson's decision-making experience and governmental background will serve him well during his tenure on the Board.

Johnson replaces former Board Member Marili McFawn. McFawn served on the Board for nearly eight years. Prior to becoming a Board Member, McFawn worked as an Attorney Assistant to several former Board Members. The Board thanks McFawn for her many years of devoted service to the Board and to the people of Illinois. We all wish her well.

Governor Ryan has also reappointed me to another three-year term as Board Chairman. I have enjoyed the past eight years managing the Board and handling its caseload. During that time, the Board promulgated significant environmental regulations and overhauled the Board's procedural rules to make them more user friendly. In addition, the Board has consistently achieved a high percentage of affirmation on court review of Board decisions. Also, the Board launched a Web site that keeps the public informed about cases and rulemakings pending before the Board. Public accessibility to the Board's processes will continue to improve. We are currently working to place on the Board's Web site orders and opinions dating back to the 1970's, when the Board was created. We are also taking steps to place more documents relating to pending cases on the Web site to make it easier to track a case through the Board's process. The next few years should prove to be exciting at the Illinois Pollution Control Board.

Sincerely,

Claire A. Manning, Chairman

Federal Update

United States Environmental Protection Agency Adopts National Emission Standards for Hazardous Air Pollutants for Pharmaceuticals Production Under the Clean Air Act in Final Rule

On August 2, 2001, USEPA adopted national emission standards for hazardous air pollutants (NESHAP) for pharmaceuticals production in a final rule. 66 Fed Reg. 40121.

This direct final rule provides additional compliance options under the Clean Air Act (42 U.S.C. §§ 7401 *et seq*. (1998)) for process vent and storage tank emissions, specifies additional methods that may be used to analyze wastewater, shifts one compound from the list of partially soluble hazardous air pollutants (HAPs) to the list of soluble HAPs, eliminates an unintended restriction on the use of enhanced biological treatment, allows a sewer line between drains and the first downstream junction box to be vented, clarifies how to assign storage tanks that are shared among pharmaceutical manufacturing process units and other types of process units, clarifies the monitoring frequency requirements for connectors, clarifies and simplifies record-keeping and reporting requirements, eliminates inconsistencies, and corrects several referencing and typesetting errors. USEPA views these revisions as minor and non-controversial, and anticipates no adverse comment

The final rule becomes effective October 16, 2001. For further information contact Randy McDonald at 919/541-5402; e-mail address: mcdonald.randy@epa.gov.

Pursuant to Section 9.1(b) of the Environmental Protection Act (Act) (415 ILCS 5/9.1(b) (2000)), once adopted by USEPA, NESHAP rules are applicable and enforceable under the Act without further action by the Board.

United States Environmental Protection Agency Proposes National Emission Standards for Hazardous Air Pollutants for New and Existing Reinforced Plastic Composites Production Facilities Under the Clean Air Act

On August 2, 2001, USEPA proposed amendments to the national emission standards for hazardous air pollutants (NESHAP) for new and existing reinforced plastic composites production facilities. 66 Fed. Reg. 40323.

The proposed standards regulate production and ancillary processes used to manufacture products with thermoset resins and gel coats. Reinforced plastic composites production facilities emit hazardous air pollutants (HAPs), such as styrene, methyl methacrylate, and methylene chloride (dichloromethane). These HAPs have adverse health effects including headache, fatigue, depression, irritation of skin, eyes, and mucous membranes. Methylene chloride has been classified as a probable human carcinogen.

These proposed standards will implement Section 112(d) of the Clean Air Act (CAA) (42 U.S.C. §§ 7401 *et seq*. (1998)) by requiring all major sources in this category to meet HAP emission standards reflecting the application of the maximum achievable control technology. USEPA estimates that the proposed NESHAP would reduce nationwide emissions of HAP from these facilities by approximately 14,500 tons per year.

Public comments must be received by October 1, 2001. For further information contact Keith Barnett at 919/541-5605; e-mail address: barnett.keith@epamail.epa.gov.

Pursuant to Section 9.1(b) of the Environmental Protection Act (Act) (415 ILCS 5/9.1(b) (2000)), once adopted by USEPA, NESHAP rules are applicable and enforceable under the Act without further action by the Board.

United States Environmental Protection Agency Proposes National Emission Standards for Hazardous Air Pollutants for Flexible Polyurethane Foam Fabrication Operations Under the Clean Air Act

On August 8, 2001, USEPA proposed amendments to the national emission standards for hazardous air pollutants (NESHAP) for flexible polyurethane foam fabrication operations. 66 Fed. Reg. 41717.

USEPA has identified flexible polyurethane foam fabrication facilities as potential major sources of hazardous air pollutants (HAPs) emissions such as methylene chloride, hydrochloric acid, 2,4-toluene diisocyanate, and hydrogen cyanide. Exposure to these substances has been demonstrated to cause adverse health effects such as irritation of the lung, eye, and mucous membranes, effects on the central nervous system, and cancer.

These proposed NESHAP will implement Section 112(d) of the Clean Air Act (CAA) (42 U.S.C. §§ 7401 *et seq.* (1998)) by requiring flexible polyurethane foam fabrication facilities that are major sources to meet HAP emission standards reflecting the application of the maximum achievable control technology. USEPA estimates that these proposed NESHAP will reduce nationwide emissions of HAPs from flexible polyurethane foam fabrication operations by approximately 6.5 tons per year for each new or reconstructed affected source. The emissions reductions achieved by these proposed NESHAP, when combined with the emissions reductions achieved by other similar standards, will provide protection to the public and achieve a primary goal of the CAA.

Public comments must be received by October 9, 2001. For further information Maria Noell at 919/541-5607; e-mail address: noell.maria@epa.gov.

Pursuant to Section 9.1(b) of the Environmental Protection Act (Act) (415 ILCS 5/9.1(b) (2000)), once adopted by USEPA, NESHAP rules are applicable and enforceable under the Act without further action by the Board.

United States Environmental Protection Agency Proposes Delay of Effective Date of Revisions to the Water Quality Planning and Management Regulation and Revisions to the National Pollutant Discharge Elimination System Program and Revision of the Date for State Submission of the 2002 List of Impaired Waters

On August 9, 2001, USEPA proposed a delay of the effective date of revisions to the Water Quality Planning and Management Regulation and revisions to the National Pollutant Discharge Elimination System (NPDES) Program in support of revisions to the Water Quality Planning and Management Regulations; and revision of the date for state submission of the 2002 list of impaired Waters. 66 Fed. Reg. 41817.

The proposal also lays out specific time frames under which USEPA will assure that lists of waters not meeting water quality standards (the 303(d) lists) and total maximum daily loads (TMDLs) are completed as scheduled, and necessary NPDES permits are issued to implement TMDLs. The July 2000 rule generated considerable controversy, as expressed in letters, testimony, public meetings, Congressional action, and litigation. Congress prohibited USEPA from implementing the final rule through a spending prohibition attached to the Military Construction Appropriations Act: FY 2000 Supplemental Appropriations. The spending prohibition is scheduled to expire on September 30, 2001 and, barring further action by Congress or USEPA, the rule will go into effect on October 30, 2001.

Based on the concerns expressed by many interested organizations and in light of a recent report from the National Research Council (NRC), entitled "Assessing the TMDL Approach to Water Quality Management," which recommends changes to the TMDL program, USEPA believes that it is important at this time to reconsider the July 2000 rule, while continuing to operate the program under the 1985 TMDL regulations, as amended in 1992. A

delay of the effective date would allow USEPA to solicit suggestions on how to structure the TMDL program to be effective and flexible and to ensure that it leads to workable solutions that will meet the Clean Water Act (33 U.S.C. §§ 1251 *et seq.* (1998)) goals of restoring impaired waters. In addition, USEPA believes that its decision to voluntarily reconsider the July 2000 rule may result in revisions to the rule that would resolve at least some of the issues raised in pending litigation in the D.C. Circuit Court of Appeals.

In response to the NRC report, this action proposes a revision to the date on which states are required to submit the next list of impaired waters. USEPA is proposing to revise the date from April 1, 2002 to October 1, 2002. This delay is intended to provide time for USEPA to issue guidance incorporating some of the NRC's recommendations regarding the methodology used to develop the list and the content of the list.

Public comments must be received by September 10, 2001. For further information contact Françoise M. Brasier at 202/401-4078.

United States Environmental Protection Agency Removes Certain Provisions of the Nitrogen Oxides New Source Performance Standards for New Electric Utility Steam Generating Units and Industrial-Commercial-Institutional Steam Generating Units

On August 14, 2001, USEPA removed certain provisions of the nitrogen oxides (NOX) new source performance standards (NSPS) for new electric utility steam generating units and industrial-commercial-institutional steam generating units, which were promulgated on September 16, 1998. 66 Fed. Reg. 42608.

Specifically, USEPA removed the provisions of the final rules applicable to electric utility steam generating units and industrial- commercial-institutional steam generating units for which modification was commenced after July 9, 1997.

The removal of the provisions is based on the issuance of an order by the United States Court of Appeals for the District of Columbia Circuit in Lignite Energy Council v. USEPA, No. 98-1525 (and consolidated cases) on September 21, 1999, which granted summary *vacatur* of the provisions. Section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)(B) (1998)), provides that, when an agency for good cause finds that notice and public procedure are impracticable, unnecessary or contrary to the public interest, that agency may issue a rule without providing notice and an opportunity for public comment. USEPA has determined that there is good cause for removal of these provisions without prior proposal and opportunity for comment because the changes to the rules are minor, noncontroversial in nature, and do not substantively change the requirements of the revised NOX NSPS. Thus, notice and public procedure are unnecessary. USEPA finds that this constitutes good cause under the APA.

The removal is effective on August 14, 2001. For further information contact James Eddinger at 919/541-5426; email address: eddinger.jim@epa.gov.

Pursuant to Section 9.1(b) of the Environmental Protection Act (Act) (415 ILCS 5/9.1(b) (2000)), once adopted by USEPA, NSPS rules are applicable and enforceable under the Act without further action by the Board.

United States Environmental Protection Agency Proposes a Modification to Significant New Use Rules for Two Substances Under the Toxic Substances Control Act

On August 16, 2001, USEPA proposed a modification to significant new use rules (SNURs) for two substances promulgated under Section 5(a)(2) of the Toxic Substances Control Act (TSCA) based on new data. 66 Fed. Reg. 42978.

Based on the new data, USEPA finds that activities not described in the corresponding TSCA Section 5(e) consent orders for the chemical substances may result in significant changes in human or environmental exposure.

Public comments must be received by September 17, 2001. For further information contact Barbara Cunningham at 202/554-1404; e-mail address: TSCA-Hotline@epa.gov.

United States Environmental Protection Agency Promulgates National Emission Standards for Hazardous Air Pollutants for New and Existing Boat Manufacturing Facilities Under the Clean Air Act in Final Rule

On August 22, 2001, USEPA promulgated national emission standards for hazardous air pollutants (NESHAP) for new and existing boat manufacturing facilities. 66 Fed. Reg. 44217.

The processes regulated include fiberglass resin and gel coat operations, carpet and fabric adhesive operations, and aluminum recreational boat painting operations. USEPA has identified boat manufacturing as a major source of hazardous air pollutants (HAPs), such as styrene, methyl methacrylate, methylene chloride (dichloromethane), toluene, xylene, n-hexane, methyl ethyl ketone, methyl isobutyl ketone, and methyl chloroform (1,1,1-trichloroethane).

The NESHAP will implement Section 112(d) of the Clean Air Act (CAA) (42 U.S.C. §§ 7401 *et seq.* (1998)) by requiring all major sources to meet HAP emission standards reflecting the application of the maximum achievable control technology (MACT). USEPA estimates the final NESHAP will reduce nationwide emissions of HAPs from these facilities by 3,450 tons per year (approximately 35 percent from the 1997 level of emissions).

The rule becomes effective August 22, 2001. For further information contact Mark Morris at 919/541-5416; e-mail address: morris.mark@epa.gov.

Pursuant to Section 9.1(b) of the Environmental Protection Act (Act) (415 ILCS 5/9.1(b) (2000)), once adopted by USEPA, NESHAP rules are applicable and enforceable under the Act without further action by the Board.

United States Environmental Protection Agency Proposes Amendments to Guidelines Establishing Test Procedures for the Analysis of Pollutants Under the Clean Water Act

On August 30, 2001, USEPA proposed regulation that would amend the "Guidelines Establishing Test Procedures for the Analysis of Pollutants" under Section 304(h) of the Clean Water Act (33 U.S.C. §§ 1251 et seq. (1998)), by adding to the list of USEPA-approved methods several analytical test procedures for enumerating certain bacteria (Escherichia coli (E. coli) and enterococci) and protozoans (Cryptosporidium and Giardia) in ambient water. 66 Fed. Reg. 45811.

These amendments would make available a suite of most probable number (*i.e.*, multiple-tube, multiple-well) and membrane filter methods for enumerating E. coli and enteroccoci bacteria in ambient water. Both culture-based and enzyme-substrate techniques are included. Some test methods are also applicable to total coliform determinations when these are the preliminary or concurrent steps for E. coli enumeration. The amendments also propose new methods for detecting Cryptosporidium and Giardia in ambient water. Regulators may use these test procedures to assess Cryptosporidium and Giardia concentrations in ambient waters.

Public comments must be received by October 29, 2001. For further information contact Maria Gomez-Taylor at 202/260-1639.

If USEPA adopts these rules, the Board would anticipate that the Illinois Environmental Protection Agency (Agency) will determine, as part of the triennial review of the State's water rules required by the Clean Water Act, whether any amendments to the State's water rules are necessary. If so, the Board would expect to receive a regulatory proposal from the Agency under Section 27 or 28.20f the Environmental Protection Act (415 ILCS 5/27, 28.2 (2000)).

Rule Update

Board Adopts Amendments to the Illinois Wastewater Pretreatment Regulations in <u>Wastewater</u> Pretreatment Update, USEPA Amendments (July 1, 2000 through December 31, 2000), R01-25

On August 9, 2001, the Board adopted amendments to the Illinois wastewater pretreatment regulations pursuant to Sections 7.2 and 13.3 of the Environmental Protection Act (Act) (415 ILCS 5/7.2, 13.3 (2000)). Section 13.3 of the Act provides for quick adoption of regulations that are identical-in-substance to federal wastewater pretreatment regulations adopted by the United States Environmental Protection Agency (USEPA) pursuant to Sections 307(b), (c), and (d) and 402(b)(8) and (9) of the Federal Water Pollution Control Act (FWPCA) (33 U.S.C. §§ 1317(b), (c), (d), 1342(b)(8), (9) (1998)). The federal wastewater pretreatment regulations are found at 40 C.F.R. §§ 400-499.

Section 13.3 of the Act provides that Title VII of the Act and Sections 5-35 and 5-75 of the Administrative Procedure Act (5 ILCS 100/5-35, 5-75 (2000)), do not apply to this rulemaking. Accordingly, this rulemaking is not subject to first or second-notice review by the Joint Committee on Administrative Rules.

USEPA amended its wastewater pretreatment regulations twice during that period. Section 7.2(b) of the Act (415 ILCS 5/7.2(b) (2000)) requires the Board to complete its identical-in-substance rulemaking actions within one year of the date of the earliest federal amendments. This rulemaking incorporates certain federal amendments that occurred during the period July 1, 2000 through December 31, 2000. In this docket, the earliest federal action requiring Board action occurred on August 14, 2000.

On May 17, 2001, the Board adopted a proposal for public comment in this matter. The proposal appeared in the June 8, 2001 issue of the *Illinois Register*. The Board accepted public comments on the proposal for a 45-day period following publication in the *Illinois Register*. The public comment period expired on July 23, 2000. No comments were received during the public comment period.

For additional information contact Joel Sternstein at 312/814-3665; e-mail address: sternstj@ipcb.state.il.us.

Board Adopts Final Rules in <u>UIC Corrections, USEPA Amendments (July 1, 1999 through June 30, 2000),</u> R01-30

On August 9, 2001, the Board adopted final rules in response to concerns over the Illinois Class V injection well requirements, which were raised by the United States Environmental Protection Agency (USEPA) after the Board's adoption last year of the underground injection control (UIC) update dockets <u>UIC Update, USEPA Amendments</u> (July 1, 1999, through December 31, 1999) and <u>UIC Update, USEPA Amendments (January 1, 2000 through June 30, 2000)</u>, R00-11/R01-1 (December 7, 2000) (consolidated). The rules adopted by the Board made some of the changes as requested by USEPA, but declined to make others the Board found unnecessary or contrary to state law.

By way of background, most of the amendments to the Illinois UIC regulations involved in the R00-11/R01/1docket related to the first installment of significant new federal requirements applicable to Class V injection wells. The two types of Class V injection wells affected by the new regulations are large-capacity cesspools and automobile waste disposal wells.

The Board adopted amendments to the Illinois UIC regulations in R00-11/R01-1 on December 7, 2000. The Board received only one comment during the 45-day public comment period. This comment, filed by the Illinois Environmental Protection Agency (Agency), did not comment on the particulars of the rule proposal. Instead, the Agency expressed concern at the increased financial burden that implementing the rule amendments would cause. The Agency noted that it had advised USEPA that additional federal funding would be needed. USEPA did not comment on the proposed amendments during the public comment period. The final rules adopted by the Board on December 7, 2000 were published by the Secretary of State in the December 22, 2001 issue of the *Illinois Register* at 24 Ill. Reg. 18585.

On March 16, 2001, the Board received a copy of a March 12, 2001 letter from David A. Ullrich, Acting Regional Administrator, USEPA Region V, addressed to James Ryan, Attorney General of the State of Illinois. In that letter, USEPA commended the State on being the first in USEPA Region V to adopt the Class V injection well rules. Additionally, USEPA submitted substantive comments on the text of the adopted Class V well rules. USEPA raised two areas of major concern over the rules, four areas of minor concern, and four general observations on the rules. USEPA requested that the Attorney General prepare and submit to USEPA within 45 days a supplemental statement on the basis for the rule in the specified areas of concern.

On May 3, 2001, the Board proposed amendments to the Illinois UIC rules in the present docket, R01-30, based on the USEPA letter. The Board's May 3, 2001 proposal was published in the May 25, 2001 issue of the *Illinois Register*, at 25 Ill. Reg. 6599. The only public comment received was filed on July 17, 2001, by the Illinois Environmental Protection Agency (Agency).

Under Sections 7.2 and 13(c) of the Environmental Protection Act (Act) (415 ILCS 5/7.2 and 13(c) (2000)), the Board proposes amendments to the Illinois regulations that are "identical in substance" to UIC regulations that USEPA adopted to implement Section 1421 of the federal Safe Drinking Water Act (SDWA) (42 U.S.C. § 300h (1998)). Sections 7.2 and 13(c) of the Act provide for quick adoption of regulations that are identical in substance to federal regulations that USEPA adopts to implement Section 1421 of SDWA. Section 13(c) also provides that Title VII of the Act and Section 5 of the Administrative Procedure Act (5 ILCS 100/5-35, 5-40 (2000)) do not apply to the Board's adoption of identical-in-substance regulations. The federal UIC regulations are found at 40 C.F.R. 144 through 148.

For additional information contact: Michael McCambridge at 312/814-6924; e-mail: mccambm@ipcb.state.il.us.

Board Dismisses UST Update, USEPA Regulations (January 1, 2001 through June 30, 2001), R02-2

Section 22.4(d) of the Environmental Protection Act (Act) (415 ILCS 5/22.4(d) (2000)) requires the Board to adopt regulations which are "identical in substance," as defined at Section 7.2 of the Act (415 ILCS 5/7.2 (2000)), to underground storage tank (UST) regulations promulgated by the United States Environmental Protection Agency (USEPA) pursuant to Section 9003 of the federal Resource Conservation and Recovery Act of 1976 (RCRA) as amended, 42 U.S.C. § 6993 (1998), to implement Subtitle I of RCRA (42 U.S.C. §§ 6991 *et seq.* (1998)), with certain limitations. USEPA has codified its UST regulations at 40 C.F.R. 281 through 283. During the period January 1 through June 30, 2001, USEPA did not amend its UST regulations. Therefore, no action was necessary, and the Board dismissed the docket.

For additional information contact Mike McCambridge at 312/814-6924; e-mail address: mccambm@ipcb.state.il.us.

Board Dismisses <u>Exemptions from the Definition of VOM Update, USEPA Regulations (January 1, 2001 through June 30, 2001)</u>, R02-4

Section 9.1(e) of the Environmental Protection Act (Act) (415 ILCS 5/9.1(e) (2000)) requires the Board to adopt regulations which are "identical in substance," as defined at Section 7.2 of the Act (415 ILCS 5/7.2 (2000)), to exemptions from the definition of "volatile organic material" (VOM), those compounds that the United States Environmental Protection Agency (USEPA) has found to be exempted from regulation under state implementation plans for ozone due to negligible photochemical reactivity. USEPA has codified these exemptions as part of its definitions at 40 C.F.R. § 51.100(s). During the period January 1 through June 30, 2001, USEPA did not amend its definition of VOM. Therefore, no action was necessary, and the Board dismissed the docket.

For additional information contact Mike McCambridge at 312/814-6924; e-mail address: mccambm@ipcb.state.il.us.

Board Dismisses UIC Update, USEPA Regulations (January 1, 2001 through June 30, 2001), R02-6

Section 13(c) of the Environmental Protection Act (Act) (415 ILCS 5/13(c) (2000)) requires the Board to adopt regulations that are "identical in substance," as defined at Section 7.2 of the Act, to underground injection control (UIC) regulations that the United States Environmental Protection Agency (USEPA) adopted to implement provisions of the Safe Drinking Water Act (42 U.S.C. § 300h *et seq.* (2000)). USEPA has codified its UIC regulations at 40 C.F.R. 144 through 148. During the period January 1, 2001 through June 30, 2001, USEPA did not amend its UIC rules. Therefore, no action was necessary, and the Board dismissed the docket.

For additional information contact Mike McCambridge at 312/814-6924; e-mail address: mccambm@ipcb.state.il.us.

Board Dismisses <u>RCRA Subtitle D Update, USEPA Regulations (January 1, 2001 through June 30, 2001)</u>, R02-7

Section 22.40(a) of the Environmental Protection Act (Act) (415 ILCS 5/22.40(a) (2000)) requires the Board to adopt regulations that are "identical in substance," as defined at Section 7.2 of the Act, to municipal solid waste landfill (MSWLF) regulations that the United States Environmental Protection Agency (USEPA) adopted to implement Subtitle D of the Resource Conservation and Recovery Act of 1976 (42 U.S.C §§ 6941-6949 (1998)). USEPA has codified the federal MSWLF rules as 40 C.F.R. 258. During the period January 1 through June 30, 2001, USEPA did not amend its MSWLF rules. Therefore, no action was necessary, and the Board dismissed the docket.

For additional information contact Mike McCambridge at 312/814-6924; e-mail address: mccambm@ipcb.state.il.us.

Board Accepts for Hearing Enhanced Vehicle Inspection and Maintenance (I/M) Regulations: Amendments to 35 Ill. Adm. Code Part 240, R02-8

On August 23, 2001, the Board accepted for hearing a regulatory proposal for Enhanced Vehicle Inspection and Maintenance (I/M) Regulations: Amendments to 35 Ill. Adm. Code Part 240, R02-8. On August 20, 2001, the Illinois Environmental Protection Agency (Agency) filed a proposal to amend the Board's regulations on inspecting and maintaining vehicles to control air emissions. Under Section 13B-20(a) of the Vehicle Emissions Law (625 ILCS 5/13B-20(a) (2000)), the Agency proposed amendments to 35 Ill. Adm. Code 240 with respect to the enhanced I/M program for the Chicago metropolitan and Metro-East St. Louis nonattainment areas. Through the proposed amendments, the Agency intends to provide flexibility pursuant to recent USEPA rules for On Board Diagnostic test standards.

The Vehicle Emission Law exempts this rulemaking from the rulemaking requirements of the Illinois Administrative Procedure Act and Section 27(b) of the Environmental Protection Act (415 ILCS 5/27(b) (2000)). But, it requires that the Board complete this rulemaking within 120 days of the proposal's filing. On August 23, 2001, the Board therefore, without commenting on the merits of the Agency's proposal, adopted the proposal for public comment and publication in the *Illinois Register*. To complete the rulemaking process by December 18, 2001, the Board anticipates adopting final rules at its December 8, 2001 meeting.

The Board will accept written public comment on these proposed rules for at least 45 days after publication of the proposal in the *Illinois Register*. The Board has also scheduled two hearings. The first hearing is scheduled for October 12, 2001, at 9:30 a.m. at the IDOT Classroom, Regional Headquarter Complex, 1100 E. Port Plaza Dr., Collinsville. The second hearing will be October 19, 2001, at 9:30 a.m. in room 9-040 of the James R. Thompson Center in Chicago. Persons that want to testify at these hearings are encouraged to pre-file testimony., The procedure for doing so is explained in the hearing officer order dated August 31, 2001.

For additional information contact: John Knittle at 217/384-7535; e-mail address: knittlej@ipcb.state.il.us.
