PCB70-8

Supplementary Order (by Mr. Currie):

Paragraph 4 of our February 17, 1971 order in this case forbade additional sewer connections "until the proposed addition to the sewage treatment plant is completed and certified as capable of operating within the Rules and Regulations". On November 26, 1971 we received certification from the Agency that the expansion, tertiary treatment, and disinfection required, have been accomplished, and therefore the connection ban is hereby formally lifted.

I, Christan L. Moffett, Acting Clerk of the Pollution Control Board, do certify that the Board adopted the Supplementary Order above on the 29 day of November, 1971.

Christan L. Moffett
