 ENVIRONMENTAL PROTECTION AGENCY)
)

OPINION and ORDER OF THE BOARD (by Jacob D. Dumelle)

The petitioner was before this Board in an earlier request for variance which was granted subject to a number of conditions (PCB 71-163, September 16, 1971). The instant petition asks that a repair completion date of the "middle of January" be advanced to March 15, 1972 and that Central Soya be allowed to operate boilers No. 2 and No. 3 until that time without performing emission rate tests.

The Environmental Protection Agency (EPA) in its Recommendation expressed a concern that the boilers may be operating in violation of the particulate regulations and further the EPA stated that petitioner had not complied with a condition of our earlier order regarding the control of SO₂.

The extension of time requested in the variance petition has now passed. The request is moot and the petition is therefore and hereby dismissed.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify the Board adopted the above Opinion and Order on the 4th day of April, 1972 by a vote of 4-0.

Christan L. Moffett, Clerk
Illinois Pollution Control Board
