 v. ) PCB 73-99  
 )  
 )  
 ENVIRONMENTAL PROTECTION AGENCY )  
 )

OPINION AND ORDER OF THE BOARD (by Mr. Dumelle)

The petition was filed on February 21, 1973 with the Agency to extend a variance granted in PCB 71-392 on March 28, 1972 which permitted the use of an air curtain destructor to burn crafting and building lumber and landscape waste near South Beloit.

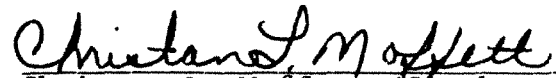

The Agency's recommendation filed March 20, 1973 recommends the grant of the variance with which we agree. The Agency states that no adverse comments have been received from the public and that slight visual emissions appear only when new material is charged into the destructor. The nearest residence is more than 1000 feet away and the occupant had no objection to the burning.

Since Nickel Bros. Tree Service is eligible to obtain a permit from the Agency to burn landscape wastes in an air curtain destructor the variance will be just to allow the burning of building and crating material free of asphalt subject to the following conditions.

ORDER

1. The variance shall run until March 28, 1974, and will allow the burning of building and crating material free of asphalt in the air curtain destructor.
2. Application for an extension of this variance shall be made at least 90 days prior to the expiration date.
3. Within 30 days of this date, the petitioner shall submit a program to the Agency for alleviating leaks around access doors to the destructor.
4. Petitioner shall load the air curtain destructor in a manner to alleviate emissions.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify the above Opinion and Order were adopted on the 17<sup>th</sup> day of April, 1973 by a vote of 3-0.
