#### **General Comments:**

On January 23, 2004 at 05:10 A.M., I conducted an inspection at the Livingston Landfill, located on the north and south side of Rowe Road at Route 23, in Pontiac, Illinois. This inspection was conducted in response to complaints from local citizens concerning blowing litter at the landfill. The purpose of this inspection was to determine regulatory status and evaluate compliance with the Environmental Protection Act (Act) and Title 35 Illinois Administrative Code, Subtitle G: Land Pollution (Regulations). The inspection consisted of walking around the site and taking pictures, neither the Operations Manager or General Manager was present at the site and the facility office was not yet open. The weather was Partly cloudy, the temperature 15 degrees.

## Background:

Livingston Landfill is an operating Putrescible/Chemical Waste Landfill operating under the Illinois Environmental Protection Agency permit number 1995-337-LF for parcels A, B, and C and 1999-307 for Parcel D and regulated by 35 Illinois Administrative Code, Part 811, Standards for New Landfills. The Landfill is owned by American Disposal Services of Illinois, Inc., a subsidiary of Allied Waste, whose Regional Vice President, Kevin Finn, is located at 13701 Kostner Avenue, Crestwood, Illinois 60445. The site General Manager and Certified Operator is David Bryant, P.O. Box 646, Pontiac, Illinois 61764, phone number 815/844-3911. The Registered Agent for American Disposal Services of Illinois, Inc. is CT Corporation Systems, 208 South Lasalle Street, Suite 814, Chicago, Illinois 60604.

### Inspection:

This inspection addresses only the litter complaints and litter issues at the landfill. No other issues are addressed in this report.

When I arrived at the landfill I noted that no trucks had yet entered the landfill to unload and the wind was calm. I waited until daylight, parked inside the landfill on the east side of cell D-6 then traveled around the landfill looking for litter from the previous day's operation.

I noted that dumping operations had commenced and litter was not blowing from the working face of the landfill.

Inside the fenced in portion of the landfill looking from the northeast corner of cell D-6 I looked north and saw litter in the form of plastic and paper scattered on the ground inside the fence (see photos #1 and #2).

In the perimeter ditch along the east side of cell D-6 the banks and bottom of the perimeter ditch were lined with litter in the form of paper and plastic (see photos #3, #4, #8, #9, #10, #11, and #12). I had been present in this area before the landfill opened and was certain that none of the litter had blown there this operating day.

Driving toward the entrance to the landfill along the east side of cell D-6 I noticed litter in the form of plastic and paper scattered on the east side of the access road between the access road and the perimeter fence (see photos #5, #6 and #7).

I then drove around the facility and a short distance down the county roads surrounding the landfill. I saw a small amount of litter along Rowe Road both on the north and south side near the fence (see photos #13, #14, and #15). I did not see a significant amount of litter in the areas along the various county roads surrounding the landfill. I left the site at 07:02 am.

Subsequent to the inspection, during the following week, I discussed the litter problem with Mr. Bryant to let him know I had been to the site and let him know what I had observed. He stated that he was interested in meeting with Agency Employees to discuss the problem and remedy's to address the litter problem.

Apparent violations observed during this inspection:

Environmental Protection Act. 415 ILCS 5/1 et. seq. (formerly Ill. Rev. Stat. Ch. 111 1/2, 1001 et. seq.) {hereinafter called the "Act"}
