Informational Notes

- [Illinois] Environmental Protection Act: 415 ILCS 5/4.
- Illinois Pollution Control Board: 35 Ill. Adm. Code, Subtitle G.
- Statutory and regulatory references herein are provided for convenience only and should not be construed as legal conclusions of the Agency or as limiting the Agency's statutory or regulatory powers. Requirements of some statutes and regulations cited are in summary format. Full text of requirements can be found in references listed in 1. and 2. above.
- The provisions of subsection (p) of Section 21 of the [Illinois] Environmental Protection Act shall be enforceable either by administrative citation under Section 31.1 of the Act or by complaint under Section 31 of the Act.
- This inspection was conducted in accordance with Sections 4(c) and 4(d) of the [Illinois] Environmental Protection Act: 415 ILCS 5/4(c) and (d).
- Items marked with an "NE" were not evaluated at the time of this inspection.
- Statutory effective date: through 7/9/99.
- Regulatory effective date: through 5/20/99.

NARRATIVE

On December 5, 2000, I received a complaint against Prior Oil Company in Wamac, Illinois. The complainant alleged that Prior Oil Company was dumping oil well development waste in a hole behind the old incinerator behind Prior's shop. I contacted Alan Whitler for the Illinois Department of Natural Resources Office of Mines and Minerals. Mr. Whitler said he would meet me at the site.

Mike Grant and I arrived at Prior Oil Company on December 5, 2000 about 10:30. No one was present. We walked to the rear of the property. We observed an oil stained area about 100 feet south of the rail road tracks. By the growth stage of the vegetation in this area, it appears that this oil was dumped some time ago.

While walking back to the rear of the shop, we met with Mr. Whitler and Mr. Charlie Price, also from the IDNR. Mr. Price had located an area where oil waste was being dumped. This area is a pile of concrete rubble covered by heavy vegetation and trees. I observed vehicle tracks leading up to this dump site. I observed oil stained soil in front of two concrete slabs. I observed oily waste between the concrete slabs. I observed oily waste in a low area in a pile of rubble covered by trees and vegetation. I observed a tanker truck parked next to Prior Oil Company's office. The vehicle's licence number is Illinois 3359. It appears that a hose was used to drain oily waste from a vehicle through two slabs of concrete and into this low area among the vegetation and trees. I could not determine how much oil had been dumped into this low area. Mr. Whitler, estimated that about 3 barrels, 126 gallons, of oil field waste had been dumped. Mr. Prior owns two water input wells for the proper disposal of oil field waste. According to Mr. Whitler, John Prior Oil Company let their oil field waste hauling permit from the IDNR expire. Therefore, it is not legal for Prior Oil Company to haul oil field waste.

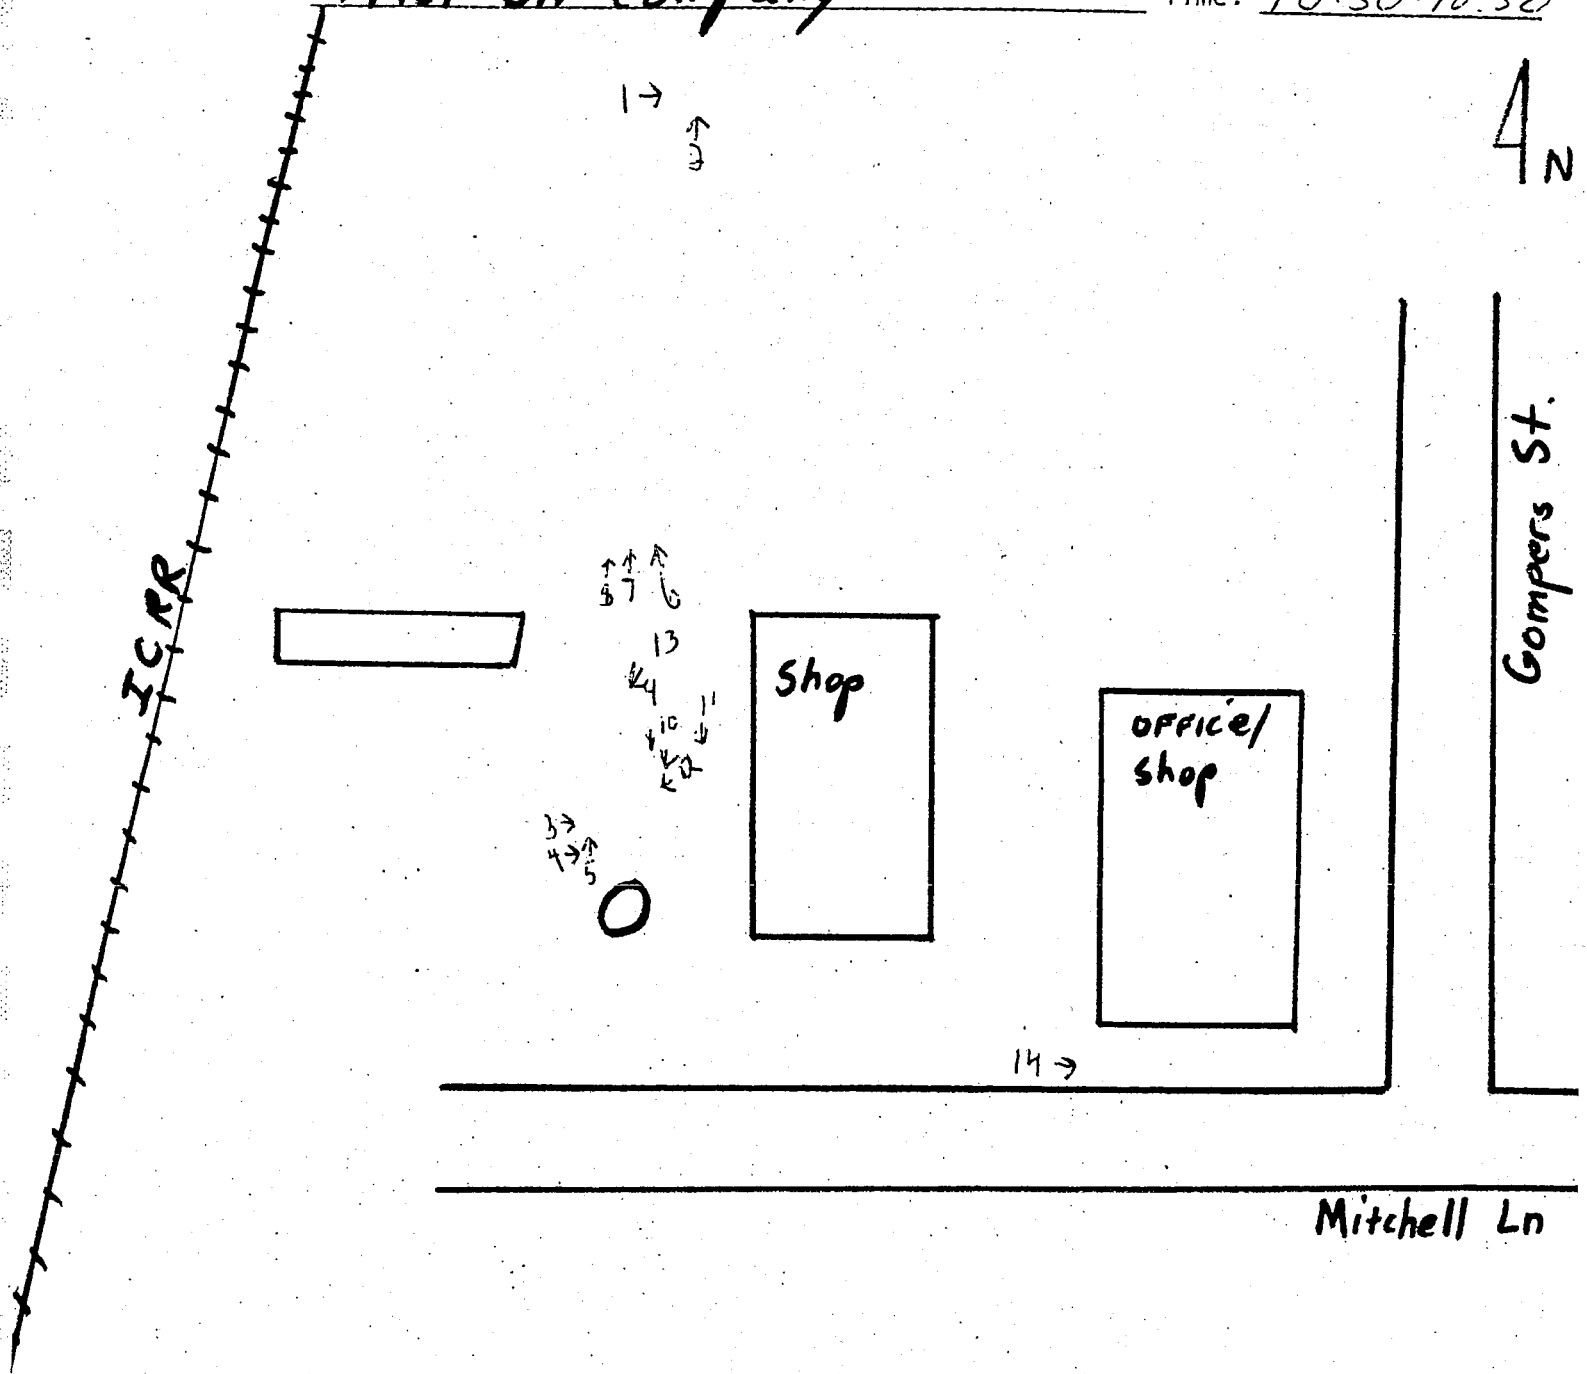

On the northwest side of the property I observed a large pile of soil. This pile of soil contained oil filters, oily material and an old gas BBQ grill. This appears to be the soil that was removed from the pit containing oil that the Agency observed during an August 22, 2000 inspection. On August 31, 2000, the Agency observed the soil from the oil pit in a 20-yd³ roll-off box. I did not observe this roll-off box during this inspection. It appears that some of the waste from the roll-off box has been redeposited upon the land.

On December 13, 2000, I spoke telephonically with John Shamo of Hopper Environmental. Mr. Shamo is Mr. Prior's environmental consultant. Mr. Shamo told me that the landfill would not accept the Agency's sample results because of the way the units were report by the laboratory. He stated that the waste may need to be resampled.
