

ILLINOIS POLLUTION CONTROL BOARD
October 2, 2003

IN THE MATTER OF:)
) R03-15
SDWA UPDATE, USEPA AMENDMENTS) (Identical-in-Substance
(July 1, 2002 through December 31, 2002)) Rulemaking - Public Water Supply)

Adopted Rule. Final Order.

OPINION OF THE BOARD (by W.A. Marovitz):

The Board today adopts amendments to the Illinois regulations that are “identical in substance” to drinking water regulations adopted by the United States Environmental Protection Agency (USEPA). The USEPA rules implement Sections 1412(b), 1414(c), 1417(a), and 1445(a) of the federal Safe Drinking Water Act (SDWA) (42 U.S.C. §§ 300g-1(a), 300g-3(c), 300g-6(a), and 300j-4(a) (1994)). This docket includes federal SDWA amendments that USEPA adopted in the period July 1, 2002 through December 31, 2002. The substantive amendments involved in this proceeding update the analytical methods approved for determining contaminants in drinking water. They also make minor changes to the consumer confidence report rule.

Sections 7.2 and 17.5 of the Environmental Protection Act (Act) (415 ILCS 5/7.2 and 17.5 (2002)) provide for quick adoption by the Board of regulations that are identical in substance to federal regulations that USEPA adopts to implement Sections 1412(b), 1414(c), 1417(a), and 1445(a) of the federal SDWA. Section 17.5 also provides that Title VII of the Act and Section 5 of the Administrative Procedure Act (APA) (5 ILCS 100/5-35 and 5-40 (2002)) do not apply to the Board’s adoption of identical-in-substance regulations. The federal SDWA regulations are found at 40 C.F.R. 141 through 143.

This opinion supports an order that the Board also adopts today. That order includes the text of the adopted amendments. The Board will cause the adopted amendments to be filed no later than October 23, 2003 and published in the *Illinois Register*.

FEDERAL ACTIONS CONSIDERED IN THIS RULEMAKING

The following briefly summarizes the federal actions considered in this rulemaking.

Docket R03-1: July 1, 2002 through December 31, 2002 SDWA Amendments

USEPA amended the federal SDWA regulations on five occasions during the period July 1, 2002 through December 31, 2002. These are summarized below:

67 Fed. Reg. 65220 (October 23, 2002)

USEPA updated the various methods used for analysis of contaminants in wastewater and drinking water. This included amendments to both the methods of 40 C.F.R. 136 and

those referenced in 40 C.F.R. 141.

67 Fed. Reg. 65888 (October 29, 2002)

USEPA approved the analytical method and minimum reporting level for unregulated contaminant monitoring for *Aeromonas* bacteria and the approval of new methods for analysis of various synthetic organic chemical (SOC) contaminants in water.

67 Fed. Reg. 68911 (November 13, 2002)

USEPA corrected the October 29, 2002 action approving new methods for analysis for *Aeromonas* bacteria and the approval of two new methods for analysis of various SOC contaminants in water.

67 Fed. Reg. 70850 (November 27, 2002)

USEPA amended the public notice segments of the consumer confidence report rule (CCR). It revised the mandatory health effects language for two SOC contaminants: di(2-ethylhexyl)adipate and di(2-ethylhexyl)phthalate. USEPA made a small number of minor amendments to the appendix to the CCR.

67 Fed. Reg. 73011 (December 9, 2002)

USEPA corrected a single misspelling in the November 27, 2002 (67 Fed. Reg. 70850) amendments to the public notice segments of the consumer confidence report rule (CCR).

No Board Action on Certain Aspects of the Federal Actions

Certain aspects of two of the federal actions that occurred during the period of July 1, 2002 through December 31, 2002, will require no action on the part of the Board to amend the Illinois drinking water regulations. Major segments of the federal action of October 29, 2002 (67 Fed. Reg. 65888), related to monitoring for the unregulated microbiological contaminant, *Aeromonas* bacteria. On November 13, 2002 (67 Fed. Reg. 68911), USEPA adopted corrections to the October 29, 2002 amendments, including segments relating to the *Aeromonas* bacteria monitoring requirements. As stated in SDWA Update, USEPA Regulations (July 1, 1999 through December 31, 1999), R00-10 (Aug. 24, 2000), USEPA and the Agency have both commented that the unregulated contaminant monitoring provisions are not segments of the federal SDWA rules that the Board is required to adopt and maintain. The Board will take no action on the aspects of these two sets of amendments that relate to unregulated contaminant monitoring for *Aeromonas* bacteria.

Other Federal Actions Having a Direct Impact on the Illinois SDWA (Drinking Water) Regulations

In addition to the amendments to the federal SDWA regulations, amendments to certain other federal regulations occasionally have an effect on the Illinois hazardous waste rules. Most notably, 35 Ill. Adm. Code 611.102 includes the incorporation of Appendices B and C of 40 C.F.R. 136 by reference. These are federal Clean Water Act methods for analysis of contaminants in water.

As of the date of adopting the amendments involved in this docket, the Board has found three sets of amendments to the analytical methods for analysis of contaminants in water in 40 C.F.R. 136, but none of those amendments affected the text of the incorporated materials of Appendices B and C. The three sets of amendments are the following: October 23, 2002 (67 Fed. Reg. 65220), October 29, 2002 (67 Fed. Reg. 65876), and November 19, 2002 (67 Fed. Reg. 69952). Segments of the USEPA amendments of October 23, 2002 and October 29, 2002, also involved drinking water methods, but the segments relating to 40 C.F.R. 136 will not require Board attention. The federal amendments of November 19, 2002, are similarly irrelevant to drinking water regulation; they pertain to whole effluent toxicity (WET) testing.

None of these will require the Board to update the version of 40 C.F.R. 136 incorporated by reference in Section 611.102 to include the amendments.

Summary Tabulation of the Federal Actions Included in This Docket

October 23, 2002 (67 Fed. Reg. 65220)	Updated methods for analysis of drinking water contaminants.
October 29, 2002 (67 Fed. Reg. 65888)	Two new methods for analysis of SOC contaminants in drinking water.
November 13, 2002 (67 Fed. Reg. 68911)	Correction of the October 29, 2002 new methods for analysis of SOC contaminants in drinking water.
November 27, 2002 (67 Fed. Reg. 70850)	Revised mandatory health effects language for di(2-ethylhexyl)-adipate and di(2-ethylhexyl)phthalate and minor amendments to the appendix to the CCR.
December 9, 2002 (67 Fed. Reg. 73011)	Correction to the November 27, 2002 CCR amendments.

PUBLIC COMMENTS

The Board proposed the present amendments for public comment on July 10, 2003. A Notice of Proposed Amendments appeared in the July 25, 2003 issue of the *Illinois Register*, at 27 Ill. Reg. 11389. The Board received public comments on this proposal for 45 days following that publication, until September 8, 2003. USEPA filed a September 9, 2003 request for additional time, until September 30, 2003, to file its comments. USEPA filed its comments on October 1, 2003. The Board hereby accepts the USEPA comments. The Board will file the adopted amendments with the Secretary of State no later than October 23, 2003.

During the public comment period the Board received two comments, as follow:

- PC 1 September 8, 2003 letter from Lou Allyn Byus, Assistant Manager, Field Operations, Division of Public Water Supplies, Illinois Environmental Protection Agency, with attached July 17, 2003 letter from Charlene Denys, Chief, Ground Water and Drinking Water Branch, USEPA Region 5 to Roger Selburg, Manager, Division of Public Water Supplies.

PC 2 September 30, 2003 letter from Charlene J. Denys, Chief, Ground Water and Drinking Water Branch, USEPA, Region 5.

In PC 1, the Agency requests that the Board delete segments of the regulations and of certain Board notes that pertain to aldicarb, aldicarb sulfoxide, and aldicarb sulfone (the aldicarbs). That request is discussed in detail in the segment of this opinion that begins on page 9. The Board has amended the rules to address the substance of the Agency's suggestions. The Agency further requests that the Board make specific corrections to various segments of the rules. The Board has made those corrections, as requested, and will not discuss them in any detail. The corrections are itemized and indicated as suggested by the Agency, however, in the table that begins on page 87 of this opinion. In PC 2, USEPA expressed its agreement with the comments of the Agency and stated that the Agency comments addressed all of USEPA's concerns.

In addition to the comments received, the Board received a copy of the proposed amendments from the Joint Committee on Administrative Rules (JCAR) with suggested minor amendments and corrections to the text. The Board does not discuss any particular JCAR suggestion or change prompted by any JCAR suggestion. The revisions adopted are marked as suggested by JCAR in the table that begins on page 87 of this opinion. A table that begins on page 95 indicates suggestions that the Board has not incorporated, along with a brief description of the reasons that the Board chose not to follow each suggestion.

DISCUSSION

The following discussion begins with a description of the types of deviations the Board makes from the literal text of federal regulations in adopting identical-in-substance rules. It is followed by a discussion of the amendments and actions undertaken in direct response to the federal actions involved in this proceeding. This first series of discussions is organized by federal subject matter, generally appearing in chronological order of the relevant *Federal Register* notices involved. Finally, this discussion closes with a description of the amendments and actions that are not directly derived from the federal actions.

Discussion of the Federal Actions

Updated Methods for Analysis for Contaminants—Sections 611.101, 611.109, 611.510, 611.526, 611.600, 611.601, 611.611, 611.612, 611.645, and 611.720

On October 23, 2002 (67 Fed. Reg. 65220), USEPA amended the methods for analysis of contaminants in water and wastewater. This included analytical methods used for determining compliance with the SDWA drinking water requirements. The methods are for determining chemical, microbiological, and radiological contamination of water. USEPA noted that a number of entities updated their published methods: ASTM International, the United States Geological Survey (USGS), the United States Department of Energy (USDOE), the American Public Health Association (APHA), the American Water Works Association (AWWA), and the Water Environment Federation (WEF). In updating the references to the various methods, USEPA stated that previously approved versions of the methods are still available for use. On

October 29, 2002, USEPA approved two new methods for analysis of drinking water for various SOC contaminants. USEPA published a correction to the October 29, 2002 notice on November 13, 2002 (67 Fed. Reg. 68911). Persons interested in the details of the federal amendments should consult the *Federal Register* notices of October 23, 2002, October 29, 2002, and November 13, 2002.

The Board incorporated the October 23, 2002 and October 29, 2002 federal amendments into the Illinois drinking water regulations by revision of the various references to the methods, where necessary, and by updating the incorporations of the methods by reference. The principal amendments on October 23, 2002, included the addition of references to the new Twentieth Edition of the *Standard Methods for the Examination of Water and Wastewater* and updating several of the ASTM method references. The principal amendments on October 29, 2003, included the addition of USEPA methods 531.2 and 515.4 for SOC contaminants, two commercially available methods for total coliforms in water, two new methods for analysis of cyanide in water (one available from USEPA, and one commercially available), and a commercial method for analysis of a single SOC in water. These amendments prompted a plenary review of all the methods incorporated by reference and of the incorporations of those methods by reference. This has resulted in the addition and deletion of a number of incorporations of methods by reference based on substantive references to the methods for use in the text of the rules. The Board notes that new USEPA methods 531.2 and 515.4 are available for download from the USEPA website. This is the first time the Board has listed the Internet as a source for incorporated documents.

The table that appears below on page 12 itemizes the changes made by the Board to the text of the federal rules. The Board requested public comment on the October 23, 2002 and October 29, 2002 federal analytical methods amendments and the November 13, 2002 corrections. Although the Board received a number of suggestions for minor corrections to the text, there were no substantive comments.

Revised Health Effects Language for the Consumer Confidence Rule—Appendix A to Part 611

On November 27, 2002 (67 Fed. Reg. 70850), USEPA amended aspects of the health effects language for the consumer confidence rule. The principal amendments relate to two chemicals, di(2-ethylhexyl)adipate and di(2-ethylhexyl)phthalate. Other amendments are called minor corrections by USEPA. USEPA published a minor correction to the November 27, 2002 action on December 9, 2002 (67 Fed. Reg. 73011). Persons interested in the details of the federal amendments should consult the *Federal Register* notices of November 27, 2002 and December 9, 2002.

The Board incorporated the November 27, 2002 and December 9, 2002 federal amendments into the Illinois drinking water regulations with only minor stylistic changes that have no substantive effect.

The table that appears below on page 12 itemizes the changes made by the Board to the text of the federal rules. The Board requested public comment on the November 27, 2002 and

December 9, 2002 federal analytical methods amendments. Although the Board received a number of suggestions for minor corrections to the text, there were no substantive comments.

General Revisions and Deviations from the Federal Text

In incorporating the federal rules into the Illinois system, some deviation from the federal text is unavoidable. This deviation arises primarily through differences between the federal and state regulatory structure and systems. Some deviation also arises through errors in and problems with the federal text itself. The Board conforms the federal text to the Illinois rules and regulatory scheme and corrects errors in the text during these routine update rulemakings.

In addition to the amendments derived from federal amendments, the Board often finds it necessary to alter the text of various passages of the existing rules as provisions are opened for update in response to USEPA actions. This involves correcting deficiencies, clarifying provisions, and making other changes that are necessary to establish a clear set of rules that closely parallel the corresponding federal requirements within the codification scheme of the Illinois Administrative Code.

The Board updates the citations to the *Code of Federal Regulations* to the most recent version available. As of the date of this opinion, the most recent version of the *Code of Federal Regulations* available to the Board is the July 1, 2002 edition. Thus, we have updated all citations to the 2002 edition, adding references to later amendments using their appropriate *Federal Register* citation, where necessary.

The Board substituted “or” for “/” in most instances where this appeared in the federal base text, using “and” where more appropriate. The Board further used this opportunity to make a number of corrections to punctuation, grammar, spelling, and cross-reference format throughout the opened text. We changed “who” to “that” and “he” or “she” to “it,” where the person to which the regulation referred was not necessarily a natural person, or to “he or she,” where a natural person was evident; changed “which” to “that” for restrictive relative clauses; substituted “must” for “shall”; capitalized the section headings and corrected their format where necessary; and corrected punctuation within sentences.

In addition, the federal rules have been edited to establish a uniform usage throughout the Board’s regulations. For example, with respect to “shall,” “will,” and “may,” “must” is used when an action is required by the rule, without regard to whether the action is required of the subject of the sentence or not. “Shall” is no longer used, since it is not used in everyday language. Thus, where a federal rule uses “shall,” the Board usually substitutes “must.” An exception to this would be that the Board renders such phrases as “no person shall” as “no person may.” This is a break from our former practice where “shall” was used when the subject of a sentence has a duty to do something. “Will” is used when the Board obliges itself to do something. “May” is used when choice of a provision is optional, with the exception of proscriptive use of may as indicated in the above example. “Or” is used rather than “and/or,” and denotes “one or both.” “Either . . . or” denotes “one but not both.” “And” denotes “both.”

JCAR has requested that the Board refer to the United States Environmental Protection Agency in the same manner throughout all of our bodies of regulations—*i.e.*, air, water, drinking water, Resource Conservation and Recovery Act (RCRA) Subtitle D (municipal solid waste landfill), RCRA Subtitle C (hazardous waste), underground injection control (UIC), etc. The Board has decided to refer to the United States Environmental Protection Agency as “USEPA.” We will continue this conversion in future rulemakings, as additional sections become open to amendment. We will further convert “EPA” used in federal text to “USEPA,” where USEPA is clearly intended.

The Board has assembled tables to aid in the location of these alterations and to briefly outline their intended purpose. The tables set forth the miscellaneous deviations from the federal text and corrections to the pre-amended base text of the rules in detail. The tables are set forth and explained beginning at page 12 of this opinion. There is no further discussion of most of the deviations and revisions elsewhere in this opinion.

Agency or Board Action

Section 7.2(a)(5) of the Act requires the Board to specify portions of the program USEPA over which will retain decision making authority. Based on the general division of functions within the Act and other Illinois statutes, the Board is also to specify which State agency is to make decisions.

In situations in which the Board has determined that USEPA will retain decision-making authority, the Board has replaced “Regional Administrator” with USEPA, so as to avoid specifying which office within USEPA is to make a decision.

In some identical-in-substance rules, certain decisions pertaining to a permit application are not appropriate for the Agency to consider. In determining the general division of authority between the Agency and the Board, the following factors should be considered:

1. Whether the person making the decision is applying a Board regulation, or taking action contrary to a Board regulation--*i.e.*, the decision is effectively granting relief from a Board regulation. It generally takes some form of Board action to grant relief from a Board regulation.
2. Whether there is a clear standard for action such that the Board can give meaningful review to an Agency decision.
3. Whether the action would result in exemption from the permit requirement itself. If so, Board action is generally required.
4. Whether the decision amounts to “determining, defining or implementing environmental control standards” within the meaning of Section 5(b) of the Act. If so, it must be made by the Board.

There are four common classes of Board decisions: variance, adjusted standard, site-specific rulemaking, and enforcement. The first three are methods by which a regulation can be temporarily postponed (variance) or adjusted to meet specific situations (adjusted standard or site-specific rulemaking). There often are differences in the nomenclature for these decisions between the USEPA and Board regulations.

Discussion of Corrective Amendments

The Board has traditionally used the occasion of these identical-in-substance updates to correct segments of the base text of the Illinois regulations. The Board has added to this proceeding a number of corrective amendments to sections of the rules not affected by the underlying federal amendments. These corrections are nearly exclusively non-substantive in effect.

When a necessary minor correction comes to the attention of the Board, Board staff makes a note of the correction, and it is set aside until the next opportunity to make the correction. The next opportunity generally presents itself when the section involved is next opened for amendment as a result of amendments to the corresponding federal text. Over the last few years, the Board has cataloged many changes, but the pace of completing the corrections has been slow, since only a limited number of all the sections involved in the wastewater pretreatment regulations have been the subject of federal amendments.

The Board is including a number of corrections in this docket. The overall length of the text of Part 611 is about 450 pages. The Board has reviewed the text of Part 611 in its entirety, and the proposal for public comment includes all corrections that came to the attention of the Board. In the future, as time allows, the Board will open other Parts of Subtitle F relating to drinking water for corrections if federally derived amendments prompt such action.

The Board will not discuss particular corrective amendments in this segment of this discussion. The corrections are each itemized in the table that begins on page 12 of this opinion. The Board requested that the Agency, JCAR, and the regulated community review the table and the text of the corrections and comment on the corrections. The Board also asked that the Agency, JCAR, and the regulated community aid in this process by submitting suggestions for correction of any errors of which they were aware. The Board received suggestions for corrections from the Agency, in PC 1, and from JCAR. The Board has made corrections to the text based on the suggestions received. The following discussion considers the Agency suggestions relating to the aldicarbs. The Board does not engage in specific discussion of the rest of the suggested changes, but the corrections made are reflected in table 3, which begins on page 87 of this opinion, and those not made are indicated in table 4, beginning on page 95.

Deletion of Requirements Relating to Aldicarb, Aldicarb Sulfoxide, and Aldicarb Sulfone

In PC 1, the Agency requested that the Board delete all references in the regulations that relate to aldicarb, aldicarb sulfoxide, and aldicarb sulfone (the aldicarbs). These references relate to the maximum contaminant level (MCL), monitoring, analytical methods, and laboratory

certification requirements for the aldicarbs (the aldicarb requirements). The Agency attached a letter from USEPA and asserts that Illinois does not need to retain the aldicarb requirements to satisfy USEPA requirements. The letter from USEPA briefly outlines the history and status of the aldicarb requirements. USEPA concludes that it is not necessary to the State to retain the aldicarb requirements until USEPA takes further action under a national primary drinking water regulation (NPDWR) relating to them.¹

USEPA established the aldicarb requirements in 1991 as part of the “Phase IIB” NPDWRs, at 56 Fed. Reg. 30266 (July 1, 1991). They were to become effective January 1, 1993. *See* 56 Fed. Reg. 30266, 30274 (adding 40 C.F.R. 141.6(g) for the Phase IIB NPDWRs). That action added the aldicarb requirements: the MCLs (40 C.F.R. 141.61(c)), the best available technology (BAT) designations (40 C.F.R. 141.61(b)), the laboratory certification requirements (40 C.F.R. 141.24(h)(19)), and the public notification requirements (40 C.F.R. 141.32(e)(25)-(e)(27)). The structure of the regulations was such that the existence of MCLs imposed analytical requirements for the aldicarbs. *See* 40 C.F.R. 141.24(h)(11) (1991).

USEPA indefinitely postponed the effective date for the aldicarb requirements in 1992. *See* 57 Fed. Reg. 22178 (May 27, 1992). USEPA stayed the effectiveness pending its reconsideration of the MCLs for the aldicarbs. To effect the stay, USEPA amended the effective date statement for the Phase IIB requirements to postpone the effectiveness of the MCLs for the aldicarbs, but did not postpone the effectiveness of the public notice requirements. Further, USEPA added a footnote that required monitoring for the aldicarbs as unregulated contaminants. *See* 57 Fed. Reg. 22178.

The Board observes that 40 C.F.R. 141.24(h)(11) imposes monitoring requirements for the purpose of demonstrating compliance with the MCLs of 40 C.F.R. 141.61(c). If there is no effective MCL, the monitoring requirements cannot apply. Similarly, the requirements for public notice cannot apply if there is no effective MCL, and the federal laboratory certification requirements cannot apply if analyses for the aldicarbs are not required to demonstrate compliance.

When incorporating the Phase IIB requirements into the Illinois regulations, in Phase IIB, and Lead and Copper Rules (June 1, 1991 through December 31, 1991), R92-3 (May 5, 1993), the Board incorporated the substantive content of the federal regulations. To effect the federal stay, the Board added Board notes to references to the aldicarbs at Sections 611.311 (listings of the MCLs and BAT), 611.640 (definition of “Phase IIB SOCs”), 611.648(b) (sampling requirements), and Table Z to Part 611 (listing the federal effective date). The notes explained the stay of the effective date for the MCLs, but also stated that the monitoring requirements for the aldicarbs were to become effective on January 1, 1993.

The Agency requested in PC 1 that the Board remove all requirements pertaining to the aldicarbs from the Illinois regulations. The Agency especially requests that the Board remove the segment of the Board notes that states that the monitoring requirements became effective

1. USEPA indicated in the most recent semiannual regulatory agenda that it anticipates adoption of such an NPDWR in August 2005. *See* 68 Fed. Reg. 31108 (May 27, 2003).

January 1, 1993. The Board has granted the Agency's request in significant part in these adopted amendments, but the Board cannot grant the request in its entirety.

Sections 7.2 and 17.5 of the Act require the Board to adopt regulations that are identical-in-substance to the federal regulations. The federal regulations have retained the aldicarb requirements for several years, and USEPA has not taken action to remove them. USEPA instead amended the effective date requirement to indefinitely postpone their effective date for the MCLs for these contaminants. The MCLs, although not yet effective, remain codified in 40 C.F.R. 141.61(c). The laboratory certification requirements remain codified in 40 C.F.R. 141.24(h)(18) and (h)(19). The mandatory health effects language remains at 40 C.F.R. 141.32(e)(25) through (e)(27).²

Section 7.2 of the Act defines "identical in substance" as meaning State regulations that require the same actions by the same persons as the federal regulations would require if administered in Illinois. Thus, the removal of the aldicarb requirements from the Illinois regulations is possible because the federal aldicarb requirements would impose no requirements if they were implemented in Illinois because they never became effective. The federal aldicarb requirements will not become effective until USEPA amends its rules to remove the postponement language from 40 C.F.R. 141.6. While it is possible to remove all of the aldicarb requirements and maintain the Illinois regulations as identical-in-substance to the federal rules, removal of the aldicarb requirements would create a disparity between the language of the State and federal rules. The Board would prefer to avoid such a disparity, especially since there is a simple alternative that would avoid the disparity.

Rather than remove the aldicarb requirements from the Illinois regulations, the Board has chosen to more closely follow the structure of the corresponding federal regulations relative to the aldicarbs. The Board has retained the language of the aldicarb requirements, just as they appear in the corresponding federal rules. To reflect the federal postponement of the effective date, the Board has amended the Board note attached to the aldicarb MCLs and BAT designations at Section 611.311. The amended Board note clearly explains the postponed effective date for the federal MCLs for the aldicarbs, and it directly states that the aldicarb requirements are not effective in Illinois until the Board takes further action. The Board further attached a statement to each reference to the aldicarbs and each of the aldicarb requirements that directs attention to the Board note attached to Section 611.311. The following table indicates the action taken with respect to each reference to the aldicarbs and each of the aldicarb requirements.

State Provision	Subject Matter	Corresponding Federal Provision	Board Action
611.101 "SOCs"	Definition of "SOCs"	None	Added a Board note directing attention to the note attached to Section 611.311

2. The newer requirements of 40 C.F.R. 141, Subpart O, which do not include requirements relating to the aldicarbs, recently superseded the mandatory health effects language of 40 C.F.R. 141.32(e)(25) through (e)(27).

611.311(b)	Designations of BAT	40 C.F.R. 141.61(b)	Added a Board note to the entire Section explaining the regulatory status of the aldicarbs
611.311(c)	Designation of MCLs	40 C.F.R. 141.61(c)	Added a Board note to the entire Section explaining the regulatory status of the aldicarbs
611.640	Definition of "Phase IIB SOCs"	None	Replaced former explanatory Board note with a note directing attention to the note attached to Section 611.311
611.648(b)	Aldicarb followup monitoring requirements	40 C.F.R. 141.24(h)(1)-(h)(3)	Added a Board note directing attention to the note attached to Section 611.311
611.648(g)(5)-(B)(ii)	SOC sampling requirement	40 C.F.R. 141.24(h)(6)(v)	Added a Board note directing attention to the note attached to Section 611.311
611.648(r)(2)	Detection limits for aldicarbs	40 C.F.R. 141.24(h)(18)	Added a Board note directing attention to the note attached to Section 611.311
611.648(s)(2)(B)	laboratory acceptance limits for aldicarbs	40 C.F.R. 141.24(h)(19)-(i)(B)	Added a Board note directing attention to the note attached to Section 611.311
611.Table Z	Federal effective date for "Phase IIB SOCs"	40 C.F.R. 141.6	Replaced former explanatory Board note with a note directing attention to the note attached to Section 611.311

Removal of Special Monitoring Requirements for Unregulated Contaminants

Review of the aldicarb requirements forced review of the unregulated contaminants monitoring requirements. Section 611.510(b)(11) set forth the Phase V unregulated organic contaminants and their respective analytical methods. Sections 611.631 and 611.658 direct attention to Section 611.510 for requirements relating to monitoring unregulated inorganic and organic chemical contaminants, respectively. The aldicarbs were listed in Section 611.510(b) as Phase V unregulated contaminants. The Board note attached to Section 611.510(b) indicated it was derived from 40 C.F.R. 141.40(n) (2000). Review of that version of the *Code of Federal Regulations* revealed that USEPA extensively amended 40 C.F.R. 141.40 in 1999 (at 64 Fed. Reg. 50556 (Sept. 17, 1999, effective January 1, 2001), and those amendments removed subsection (n).

In *Safe Drinking Water Update, USEPA Regulations (July 1, 1999 through December 31, 1999)*, R00-10 (Aug. 24, 2000), the Board noted that USEPA and the Agency urged the Board not to incorporate the 1999 federal amendments to 40 C.F.R. 141.40. USEPA and the Agency had asserted that the unregulated contaminants monitoring requirements were not a necessary

element of the State SDWA program. The Board did not incorporate those amendments, and the Board did not adopt the proposed amendments to Section 611.510.

Re-examination of the content of Sections 611.510, 611.631, and 611,658 results in the conclusion that the Board must repeal this Section at this time. The time for completion of the monitoring as required under the existing text is long past. The federal provisions on which Section 611.510 was originally based no longer exist in the USEPA regulations. Finally, the monitoring required by Section 611.510 is not required by USEPA as an element of the Illinois SDWA program. For these reasons, the Board has repealed Sections 611.510, 611.631, and 611,658 on adoption of these amendments.

In repealing the obsolete unregulated contaminants monitoring provisions of Sections 611.510, 611.631, and 611,658, the Board observes that unregulated contaminants monitoring will continue. USEPA will periodically adopt regulations that require such monitoring. USEPA will directly administer those requirements.

Discussion of Miscellaneous Housekeeping Amendments

Table 1 below list numerous corrections and amendments that are not based on current federal amendments. Table 1 (beginning immediately below) includes deviations made in this final order from the verbatim text of the federal amendments. Table 2 (beginning after table 1 immediately below) contains corrections and clarifications that the Board made in the base text involved in this proposal. The amendments listed in Table 2 are housekeeping amendments not directly derived from the current federal amendments. Table 3 (beginning on page 87 below) is a listing of revisions made to the text of the amendments from that proposed and set forth in the Board’s opinion and order of July 10, 2003. Table 3 indicates the changes made, as well as the source that suggested each of the changes. Table 4 (beginning on page 95 below) indicates suggested revisions that the Board has not made in adopting these amendments. Each entry gives a brief explanation why the Board did not incorporate the suggested change. Some of the entries in these tables are discussed further in appropriate segments of the general discussion beginning at page 6 of this opinion.

Table 1:
Deviations from the Text of the Federal Amendments

Illinois Section	40 C.F.R. Section	Revision(s)
611.102(a) “Membrane Filter . . .”	141.21(f)(3) table, notes 13 and 14	Corrected the spelling of “Escherichla” to “Escherichia”
611.102(a) “Readycult Coliforms . . .”	141.21(f)(3) table, notes 13 and 14	Corrected the spelling of “Escherichla” to “Escherichia”
611.102(b) “EM Science”	141.21(f)(3) table, notes 13 and 14	Corrected the spelling of “Escherichla” to “Escherichia”

611.526(f)(2)	141.21(a)(6)(ii)	Changed “the 18th edition (1992) may be used . . . as described in Method 9221B (paragraph 3) of Standard Methods (18th edition)” to “Standard Methods, 18th ed.: Method 9221 B may be used . . .”
611.531(a)(2)(C)(i)	141.74(a)(1) table note 2	Changed numeric “8” to written “eight”
611.Appendix A “chlorine dioxide”	Appendix A to Subpart O	Corrected “.8” to “800”; added “containing” before “chlorine dioxide”
611.Appendix A “chlorite”	Appendix A to Subpart O	Added “containing” before “chlorite”
611.Appendix A “di(2-ethylhexyl)adipate”	Appendix A to Subpart O	Added commas before and after “such as . . . enlargement” to offset the parenthetical
611.Appendix H, ¶E.33 “di(2-ethylhexyl)adipate”	Appendix B to Subpart Q	Added commas before and after “such as . . . enlargement” to offset the parenthetical

611 table of contents, 611.320 entry	JCAR	Added “repealed” in parentheses
611 table of contents, Subpart I heading	JCAR	Changed “and” to upper-case “AND”

611 table of contents, Section 611.591 entry	Board	Added the indefinite article “a” before “State”
611 table of contents, Section 611.680 entry	Board	Added a comma after “analytical” to offset the final element of a series
611 table of contents, Subpart R heading	Board	Changed an em-dash to a colon
611 table of contents, Section 611.870 entry	Board	Added “repealed” in parentheses
611 table of contents, Section 611.881 entry	Board	Removed “of this Subpart”
611 table of contents, Section 611.902 entry	Board	Changed an em-dash to a colon
611 table of contents, Section 611.903 entry	Board	Changed an em-dash to a colon
611 table of contents, Section 611.904 entry	Board	Changed an em-dash to a colon
611 table of contents, Subpart X heading	Board	Changed an em-dash to a colon
611 source note	Board, JCAR	Added a comma before “effective” in the entry for R00-10
611.100 heading	Board	Added a comma after “scope” to offset the final element of a series
611.100(a)	Board, JCAR	Changed “which” to “that” for a restrictive relative clause; corrected the citation “42 U.S.C. 300f et seq.” to “42 USC 300g-1(b), 300g-3(c), 300g-6(a), and 300j-4(a)”;
611.100(b)	Board	Changed “which” to “that” for a restrictive relative clause; added the statutory citation “415 ILCS 5/7.2(a)(6)” in brackets
611.100(c)	Board	Added a comma after “(‘non-CWS’)” to offset the final element of a series
611.100(c)(2)	Board	Added “or DPH”
611.100(c) Board note	Board	Updated the <i>Code of Federal Regulations</i> citation to the most recent edition available
611.100(d)(4)	Board	Changed “which” to “that” for a restrictive relative clause
611.100(d) Board note	Board	Updated the <i>Code of Federal Regulations</i> citation to the most recent edition available
611.101 preamble	Board	Changed “the term” to “the following terms have the given meanings”
611.101 “Agency” Board note	Board	Added the alternative abbreviated terms “Public Health or DPH” in parentheses
611.101 “approved source of bottled water”	JCAR	Changed “state” to capitalized “State”

611.101 “best available technology”	Board	Added a comma after “techniques” to offset the final element of a series
611.101 “CT”	Board	Changed “mg/L” to “mg/ℓ”
611.101 “CT _{99,9} ”	Board	Changed “Section 611.Appendix B” to “Appendix B of this Part”
611.101 “CT _{99,9} ” Board note	Board	Updated the <i>Code of Federal Regulations</i> citation to the most recent edition available
611.101 “compliance cycle”	Board	Changed “begins” to past-tense “began” (twice); changed “ends” to past-tense “ended”
611.101 “compliance period”	Board	Changed “runs” to past-tense “ran”; removed the unnecessary comma after “1993”; removed the unnecessary comma after “1996”; removed the unnecessary comma after “1999”
611.101 “comprehensive performance evaluation Board note”	Board	Changed “appropriate” to “appropriately codified”
611.101 “contaminant”	Board	Added a comma after “biological” to offset the final element of a series
611.101 “diatomaceous earth filtration”	Board	Added “the following occur”
611.101 “disinfection contact time”	Board	Added “as follows”; changed the ending comma to a semicolon
611.101 “haloacetic acids (five)”	Board	Changed “mg/L” to “mg/ℓ”
611.101 “halogen”	Board	Added a comma after “bromine” to offset the final element of a series
611.101 “inactivation ratio”	Board	Added “as follows” (twice)
611.101 “initial compliance period”	Board	Added a comma after “thallium” to offset the final element of a series; changed “suppliers whose supplies have” to singular “a supplier whose system has”; changed “begins” to past-tense “began”
611.101 “ℓ”	Board	Changed “L” to “ℓ”
611.101 “maximum contaminant level goal” Board note	Board	Added the statutory citation “415 ILCS 5/17.5” in brackets
611.101 “MFL” Board note	Board	Updated the <i>Code of Federal Regulations</i> citation to the most recent edition available
611.101 “mg/ℓ”	Board	Changed “mg/L” to “mg/ℓ”
611.101 “Public Health”	Board	Added “or ‘DPH’” as an alternative defined term
611.101 “public water system”	Board	Added “the following”

611.101 “public water system” Board note	Board	Changed “Subpart F” to “Subpart F of this Part”
611.101 “radioactive contaminants” Board note	Board	Changed “Subpart U” to “Subpart U of this Part”
611.101 “residual disinfectant concentration”	Board	Changed “mg/L” to “mg/ℓ”
611.101 “sanitary survey”	Board	Added a comma after “operation” for a restrictive relative clause (twice)
611.101 “service connection” Board note	Board, JCAR	Updated the <i>United States Code</i> citation to the most recent edition available; changed the symbol “&” to written “and”
611.101 “SOC”	Board	Changed “benzo[a]pyrene” to “benzo(a)pyrene”
611.101 “SOC” Board note	Agency	Added a cross-reference to a Board note explaining the regulatory status of requirements pertaining to the aldicarbs
611.101 “special irrigation district” Board note	Board, JCAR	Updated the <i>United States Code</i> citation to the most recent edition available; changed the symbol “&” to written “and”
611.101 “Subpart B system”	Board	Changed “Subpart B” to “Subpart B of this Part”; changed “611.Appendix B” to “Appendix B of this Part”; changed “611.Appendix C of this Part” to “Appendix C of this Part”
611.101 “SUVA”	Board	Changed “mg/L” to “mg/ℓ”
611.101 “total organic carbon”	Board	Changed “mg/L” to “mg/ℓ”
611.101 “total trihalomethanes”	Board	Changed “mg/L” to “mg/ℓ”
611.101 “USEPA”	Board	Removed the alternative defined term “or ‘U.S. EPA’”
611.101 “wellhead protection program”	Board, JCAR	Added the statutory citation “42 USC 300h-7” as a parenthetical offset by commas; added the statutory citation “415 ILCS 5.17.1” in brackets; removed the unnecessary comma from before “and 35 Ill. Adm. Code” that separated a two-element series; changed “35 Ill. Adm. Code 615 et seq.” to “35 Ill. Adm. Code 615-617”
611.102(a) “Kaleda 101”	JCAR, Board	Corrected the spelling of “Kaleda”; moved the comma inside the closing quotation mark after “Thiocyanate”
611.102(a) “Membrane Filter . . .”	JCAR, Board	Corrected the spelling of “Escherichia”; moved the comma inside the closing quotation mark after “Waters”
611.102(a) “QuickChem Method . . .”	Board	Moved the comma inside the closing quotation mark after “analysis”

611.102(a) "ReadyCult Coliforms . . ."	JCAR	Corrected the spelling of "Escherichla" to "Escherichia"; added a comma inside the closing quotation mark after "Waters"
611.102(a) "SimPlate Method"	JCAR	Changed "method" to capitalized "Method"
611.102(a) "Standard Methods"	JCAR	Removed the unnecessary comma after "Methods" that separated the subject and verb
611.102(a) "Syngenta AG-625"	Board	Removed the address and telephone information from the definition
611.102(a) "USEPA Organic Methods"	JCAR	Added a space to change "EPA815/B-00/001" to "EPA 815/B-00/001"
611.102(b) "Access Analytical Systems, Inc."	Board	Removed the entry for which no references are set forth
611.102(b) "Advanced Polymer Systems"	Board	Changed the ending colon to a period
611.102(b) "Advanced Polymer Systems" "Amco-AEPA-1 Polymer"	Board	Updated the <i>Code of Federal Regulations</i> citation to the most recent edition available
611.102(b) "American Public Health Association"	Board	Changed the ending colon to a period
611.102(b) "American Waterworks Association," "National Field Evaluation . . ."	Board	Moved the reference into correct alphabetical order; corrected the spelling of "Edburg" to "Edberg"
611.102(b) "American Water Works Association"	Board	Changed the ending colon to a period
611.102(b) "American Water Works Association" "Standard Methods," 13th edition	Board	Placed the reference title "Standard Methods . . . Wastewater" in quotation marks
611.102(b) "American Water Works Association" "Standard Methods," 13th edition, Method 302	Board	Added a comma after "suspended" to offset the final element of a series

611.102(b) "American Water Works Association" "Standard Methods," 13th edition, Method 305	Board	Added a comma after "suspended" to offset the final element of a series
611.102(b) "American Water Works Association" "Standard Methods," 17th edition	Board	Added references to approved methods from this edition
611.102(b) "American Water Works Association" "Standard Methods," 17th edition, "Method 7110 B"	Board	Added a reference to this approved method
611.102(b) "American Water Works Association" "Standard Methods," 17th edition, "Method 7500-Cs B"	Board	Added a reference to this approved method
611.102(b) "American Water Works Association" "Standard Methods," 17th edition, "Method 77500- ³ H B"	Board	Added a reference to this approved method
611.102(b) "American Water Works Association" "Standard Methods," 17th edition, "Method 7500-I B"	Board	Added a reference to this approved method
611.102(b) "American Water Works Association" "Standard Methods," 17th edition, "Method 7500-I C"	Board	Added a reference to this approved method

611.102(b) "American Water Works Association" "Standard Methods," 17th edition, "Method 7500-I D"	Board	Added a reference to this approved method
611.102(b) "American Water Works Association" "Standard Methods," 17th edition, "Method 7500-Ra B"	Board	Added a reference to this approved method
611.102(b) "American Water Works Association" "Standard Methods," 17th edition, "Method 7500-Ra C"	Board	Added a reference to this approved method
611.102(b) "American Water Works Association" "Standard Methods," 17th edition, "Method 7500-Ra D"	Board	Added a reference to this approved method
611.102(b) "American Water Works Association" "Standard Methods," 17th edition, "Method 7500-Sr B"	Board	Added a reference to this approved method
611.102(b) "American Water Works Association" "Standard Methods," 17th edition, "Method 7500-U B"	Board	Added a reference to this approved method
611.102(b) "American Water Works Association" "Standard Methods," 17th edition, "Method 7500-U C"	Board	Added a reference to this approved method

611.102(b) "American Water Works Association" "Standard Methods," 18th edition	Board	Placed the reference title "Standard Methods . . . Wastewater" in quotation marks; changed the ending colon to a period
611.102(b) "American Water Works Association" "Standard Methods," 18th edition, "Method 3500-Mg E"	Board	Corrected the method title from "EDTA Titrimetric Method" to "Calculation Method"
611.102(b) "American Water Works Association" "Standard Methods," 18th edition, "Method 4500-CI D"	Board	Added a reference to this approved method
611.102(b) "American Water Works Association" "Standard Methods," 18th edition, "Method 4500-CI E"	Board	Added a reference to this approved method
611.102(b) "American Water Works Association" "Standard Methods," 18th edition, "Method 4500-CI F"	Board	Added a reference to this approved method
