RE: Jo'Lyn Corporation/Falcon Waste & Recycling, Inc.
Petition for Adjusted Standard, AS 04-02

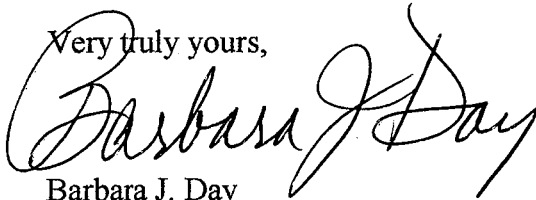

Dear Ms. Gunn:

I write to support the adjusted standard petition submitted by Jo'Lyn Corporation and Falcon Waste & Recycling, Inc. Jo'Lyn and Falcon use granulated bituminous shingle material (GBSM) to produce a useful and clean paving product. GBSM is a clean and consistent material generated at the end of the manufacturing of roofing shingles. GBSM contains no post-consumer material, and is not shingle tear-offs. Jo'Lyn and Falcon purchase GBSM from shingle manufacturers, and then use a grinding and compaction process to create a paving product called Eclipse Dust Control. Eclipse Dust Control has a number of applications, including paving of driveways, parking lots, feed lots, and bike and walking paths. The paving product is proven effective.

There is no downside to the process used by Jo'Lyn and Falcon: It converts GBSM into a useful paving product, while utilizing a material which might otherwise be landfilled for the lack of a market. There is a demonstrated market for this product, and Jo'Lyn and Falcon have standing orders for it.

I urge the IPCB to grant this petition for adjusted standard. Jo'Lyn and Falcon use an innovative process, which is environmentally friendly and provides a market for GBSM. Granting the petition for adjusted standard will allow Jo'Lyn and Falcon to use this innovative process, while protecting the environment and providing business opportunities in the State of Illinois.

Very truly yours,

Barbara J. Day
