STATE OF ILLINOIS
Pollution Control Board

RECOMMENDATION

Now Comes the Illinois Environmental Protection Agency ("Illinois EPA") by James Allen Day, one of its attorneys, and pursuant to Section 125.204 of the Illinois Pollution Control Board's (Board) regulations files the following Recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204.

1) On December 24, 2002, the Illinois EPA received a request from UAP Richter for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204, and noted the request as log number TC-22-02. (Exhibit A)

2) The address of the applicant's facility is:

UAP Richter
1076 Corregidor
Dixon, Illinois 61021

3) The water pollution control facilities in this request are located at Section 7, Township 20 North, Range 10 East of the 4th Principal Meridian in Shelby County, Illinois at the above street address and include the following two separate facilities for purposes of this recommendation:

(a) Agrichemical containment structures consisting of two liquid agrichemical operational area containment structures; two bulk liquid agrichemical secondary containment structures; one minibulk/package agrichemical secondary

containment structure; the portion of the building over two liquid agrichemical operational area containment structures and two bulk liquid agrichemical secondary containment structures (excluding the portion of Building #1 that does not cover either of the two liquid agrichemical operational area containment structures or the bulk liquid agrichemical secondary containment structure within Building #1); and associated collection and recovery systems as approved under the Agency endorsed Agrichemical Facility Permit No. 92021656 (Log Nos. 02107261 and 03127704). (These facilities are further described in Exhibit A.)

(b) The portion of the building over the minibulk/package agrichemical secondary containment structure. (These facilities are further described in Exhibit A.)

4. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2000), defines "pollution control facilities" as: "any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: (a) eliminating, preventing, or reducing air or water pollution ...or (b) treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property."
5. Pollution control facilities are entitled to preferential tax treatment, 35 ILCS 200/11-5 (2000).

6. With respect to the facilities described in Paragraph 3(a) above (the containment structures, building and associated collection and recovery systems), based on the information in the application and the purpose of the facilities (to collect, transport, and store agrichemical rinsates, residues, or washwaters prior to reuse or disposal), it is the Illinois EPA's engineering judgment that the described facilities may be considered "pollution control facilities," pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200. Therefore, the facilities are eligible for tax certification from the Board.
7. With respect to the facilities described in Paragraph 3(b) above (the portion of the building over the minibulk/package agrichemical secondary containment structure), based on the information in the application and the purpose of the facilities (to warehouse products for future use), it is the Illinois EPA's engineering judgment that the described facilities are not "pollution control facilities," pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200. Therefore, the facilities are not eligible for tax certification from the Board.
8. Therefore, the Illinois EPA recommends that the Board issue the requested tax certification for the facilities described in Paragraph 3(a) above (the containment structures, building and associated collection and recovery systems) and deny the requested tax certification for the facilities described in Paragraph 3(b) above (the portion of the building over the minibulk/package agrichemical secondary containment structure).

	e. PERCENTAGE CONTROL FACILITY BEARS TO WHOLE FACILITY VALUE:	% 100	
Sec. F	The following information is submitted in accordance with the Illinois Property Tax Code, as amended, and to the best of my knowledge, is true and correct. The facilities claimed herein are "pollution control facilities" as defined in Section 11-10 of the Illinois Property Tax Code.		
SIGNATURE	<div style="display: flex; justify-content: space-between;"> <div style="text-align: center;">  Signature </div> <div style="text-align: center;"> 12/19/02  Title </div> </div>		
Sec. G	INSTRUCTIONS FOR COMPILING AND FILING APPLICATION		
General: Separate applications must be completed for each control facility claimed. Do not mix types (water and air). Where both air and water operations are related, file two applications. If attachments are needed, record them consecutively on an index sheet.			
Sec. A	Information refers to applicant as listed in the tax records and the person to be contacted for further details or for inspection of facilities. Define facility location by street address or legal description. A plat map location is required for facilities located outside of municipal boundaries. The property identification number is required.		
Sec. B	Self-explanatory. Submit copies of all permits issued by local pollution control agencies. (e.g. MSD Construction Permit)		
Sec. C	Refers to manufacturing processes or materials on which pollution control facility is used.		
Sec. D	Narrative description of the pollution control facility, indicating that its primary purpose is to eliminate, prevent or reduce pollution. State the type of control facility. State permit number, date, and agency issuing permit. A narrative description and a process flow diagram describing the <u>pollution control facility</u> . Include a listing of each major piece of equipment included in the claimed fair cash value for real property. Include an <u>average</u> analysis of the influent and effluent of the control facility stating the collection efficiency.		
Sec. E	List air contaminants, or water pollution substances released as effluents to the manufacturing processes. List also the final disposal of any contaminants removed from the manufacturing processes. Item (1) - Refers to pollutants and contaminants removed from the process by the pollution control facility. Item (2) - Refers to water pollution but can apply to water-carried wastes from air pollution control facilities. Submit drawings, which clearly show (a) Point(s) of discharge to receiving stream, and (b) Sewers and process piping to and from the control facility. Item (3) - If the collected contaminants are disposed of other than as wastes, state the disposition of the materials, and the value in dollars reclaimed by sale or reuse of the collected substances. State the cost of reclamation and related expense. Item (4) - State the date which the pollution control facility was first placed in service and operated. If not, explain. Item (5) - This information is essential to the certification and assessment actions. This accounting data must be completed to activate project review prior to certification by this Agency.		
Sec. F	Self-explanatory. Signature must be a corporate authorized signature.

	Illinois EPA P.O. Box 19276 Springfield, IL 62794-9276	Thomas McSwiggin Permit Section Division of Water Pollution Control	Donald E. Sutton Permit Section Division of Air Pollution Control

The pollution containment improvements consist of two buildings:

Building #1:

This building was constructed in 1992 and measures 42' x 116' feet. The pollution containment portion of this building consists of two operational containment structures and one secondary containment structure as described in the Agrichemical Facility Permit #. 92091656 (Log #.97105004). The operational containment structure measuring 42' x 102' x 1' includes all of the operational and secondary containment structures included in the permit number. The operational containment structure measuring 16.25' x 101.25' x 3' and the secondary containment structure measuring 16.25' x 101.25 x 3' are contained within the first operational containment structure (42' x 102' x 1') above. (See Attached building layout)

The portion of the building covering the 42' x 102' x 1' operational containment is included in the qualifying improvements. This building structure prevents rain water from washing into chemical spill collection sumps thereby maintaining the integrity of the collection devices. Also included are the associated collection and recovery systems as approved under the Agency endorsed Agrichemical Facility Permit No. 92091656 (Log # 997105004).

Building #2:

This building is a 110' x 130' x .5' secondary containment structure built specifically for the safe storage of mini-bulk and packaged agrichemicals. The entire concrete containment floor of the building and the building structure covering the concrete containment floor are included in the qualifying structures described in the Agrichemical Facility Permit #92061656 (Log # 86260).

Department of Agriculture
AGRICHEMICAL FACILITY PERMIT

AGRICHEMICAL FACILITY PERMIT MODIFICATION

Log#
86260

A permit modification is hereby granted to the above designated permittee to construct and/or operate an agrichemical facility which was previously approved under the above referenced permit number. The facility and associated permit has been modified as follows:

SECONDARY CONTAINMENT STRUCTURES

Installation and operation of a reinforced concrete secondary containment structure measuring 110' (width) x 130' (length) x 0.5' (height) with a total design capacity of 8148.6 cubic feet (SC). The floor shall slope to a single sump measuring 2' (width) x 2' (length) x 2' (depth) to facilitate the collection and recovery of all escaped product and/or agrichemical wastewater. All recovered effluent shall be transferred to a single 250 gallon recovery tank with a manually activated sump pump. All mini-bulk and packaged agrichemicals shall be stored within the said structure. This structure shall be referred to as SC-2.

This permit modification has also been reviewed and approved by the Illinois Environmental Protection Agency per the attached permit modification endorsement. The expiration date of this permit modification shall remain the same as issued on the original permit.

All Special Conditions on the original permit issued are also applicable to this permit unless specifically deleted or revised in this permit.

THE STANDARD CONDITIONS OF ISSUANCE IN THE ATTACHED PAGES MUST BE COMPLIED WITH IN FULL.

Permit is hereby granted to the above designated permittee to construct and operate an agrichemical containment facility as follows:

OPERATIONAL CONTAINMENT STRUCTURES

Operation of an existing reinforced concrete operational containment structure measuring 42' (width) x 102' (length) x 1' (depth) with a total design capacity of 880.0 cubic feet (ft.³). The floor shall slope to a single sump measuring 2.75' (width) x 5.5' (length) x 2' (depth) to facilitate the collection and recovery of all escaped product and/or agrichemical wastewater. All recovered effluent shall be transferred to one (1) of two (2) 200 gallon recovery tanks with a manually activated sump pump. Segregation shall be performed based upon the applicable target crop and label use. All loading, unloading and washing of bulk liquid agrichemical transportation and application equipment shall be performed upon the herein permitted structure. This structure shall be referred to as OC-1.

Operation of an existing reinforced concrete operational containment structure measuring 16.25' (width) x 101.25' (length) x 3' (depth) with a total design capacity of 4500.0 cubic feet (ft.³). The floor shall slope to the lowest elevation to facilitate the collection and recovery of all escaped product and/or agrichemical wastewater. All recovered effluent shall be transferred to one (1) of the two (2) aforementioned 200 gallon recovery tanks with a manually activated sump pump. Segregation shall be performed based upon the applicable target crop and label use. All repackaging of bulk liquid pesticides shall be performed upon the herein permitted structure. This structure shall be referred to as OC-2.
