RECEIVED
CLERK'S OFFICE

JUN 10 2005

STATE OF ILLINOIS
Pollution Control Board

Dear Ms. Gunn,

PC#29

I am writing to urge the Pollution Control Board to uphold their prior decision on the case no. 2004-186.

The site that the Kankakee County Board was considering to expand the landfill, was already determined by hydro-geologists and the EPA to be the worst possible site.

It would be a detriment to the counties residents as we get our municipal water supply from the river that sets dangerously near the landfill. We have enough problems with cancer

in this area as it is. I urge you to not allow this problem to be compounded and made worse.

Waste Management has approached the county board once again, but this time, they changed the conditions. It isn't even the same proposal. It should be given a whole new process.

But, again, I urge you to turn down any proposal that would be a health hazard to us, our children, grandchildren and future generations.

Thank you for your consideration.

Monica Peck
