

ILLINOIS POLLUTION CONTROL BOARD
August 13, 1971

CALUMET STEEL, DIVISION OF)
BORG WARNER CORPORATION)
) #PCB71-169
)
v.)
)
ENVIRONMENTAL PROTECTION AGENCY)

ORDER

Calumet Steel, Division of Borg Warner Corporation, (Calumet) has filed a Petition for Variance with the Board seeking an extension of an existing Air Contaminant Emission Reduction Program (ACERP) to and including August 31, 1971, to install a canopy-type evacuation system on electric furnaces used in its operation. Calumet's ACERP, based on precedent established by the Board in other cases, expired on July 1, 1971, and this petition for an extension to August 31, 1971 was filed with the Board on June 30, 1971. Before the Board would have a chance to hold a hearing on this matter, the August 31, 1971 date will have been reached; therefore, a hearing will not be authorized by the Board at this time. However, it is important that the Board know that the control devices detailed in the ACERP and in the Petition for variance filed by Calumet have been installed. To insure that the Board receives the necessary information from Calumet, the following order is hereby entered:

1. Calumet is hereby ordered to file a written report with the Board and with the Environmental Protection Agency on September 3, 1971, indicating the status of the completion of the control devices detailed in the ACERP, hereinbefore granted by the prior Air Pollution Control Board, and the Petition for Variance filed by Calumet on June 30, 1971.
2. This action and order by the Board shall not be considered to be a grant or denial of the Petition for Variance filed by Calumet on June 30, 1971.

I, Regina E. Ryan, Clerk of the Board, certify that the Board adopted the above Order this 13th day of August, 1971.
