Respondent. )

ORDER OF THE BOARD (by Dr. Satchell):

On January 28, 1980 General Electric Company (GE) filed a variance petition requesting relief from manifest requirements of Rules 301 and 302 of Chapter 9: Special Waste Hauling Regulations. Since the petition fails to specifically request or waive a hearing it is deficient under Procedural Rule 401(b). Furthermore, there is no compliance plan as required by Procedural Rule 401(a)(6). According to the petition GE manufactures lamps for photographic use at its Mattoon Lamp Plant, Coles County. It generates one to five loads of borosilicate glass scraps per day which are landfilled. It has obtained a special waste permit but seeks a variance from the manifest requirements. The petition does not contain a detailed estimate of the cost of compliance which may be necessary to support an allegation of arbitrary and unreasonable hardship. GE should investigate the cost of manifest forms with the necessary information pre-printed and savings which may be achieved by using a copy of the manifest for internal record keeping as was suggested by the Board in its Opinion of March 15, 1979 (33 PCB 131, 147).

Unless additional information is received within forty-five days of the date of this Order, the petition will be subject to dismissal.

IT IS SO ORDERED.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify the above Order was adopted on the 7<sup>th</sup> day of February, 1980 by a vote of 4-0.
