Respondent.)

ORDER OF THE BOARD (by J. Yi):

On February 24, 1995 the Union Oil Company of California (Unocal) filed a petition for variance from 35 Ill. Adm. Code 212.322 Existing Process Sources for particular matter emissions pursuant to Section 35 of the Environmental Protection Act (Act) for its Chicago Carbon Plant. (415 ILCS 5/35 (1992).) Unocal's facility is located at 317 W. New Avenue, near Lemont, Illinois and is approximately 30 miles southwest of Chicago.

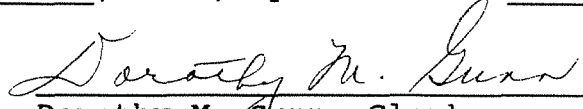

The Board's procedural rules at 35 Ill. Adm. Code 104.121 requires specific information to be contained in a variance petition. Unocal's petition is lacking the following information:

- 1) A clear and concise statement as to the starting date and ending date of the requested variance.
- 2) Location of the nearest air monitoring station maintained by the Agency.
- 3) An assessment, with supporting factual information, of the environmental impact that the variance will impose on human, plant, and animal life in the affected area, including, where applicable, data describing the existing air quality which the discharge may affect.
- 4) Past efforts to achieve compliance including costs incurred, results achieved and permit status.

Such supplemental petition containing at a minimum the above information, or any other appropriate motion, shall be filed with the Clerk of the Board on or before April 14, 1995. Failure to do so will subject this matter to dismissal.

IT IS SO ORDERED.

I, Dorothy M. Gunn, Clerk of the Illinois Pollution Control Board, hereby certify that the above order was adopted on the 9th day of March, 1995, by a vote of 4-0.

Dorothy M. Gunn, Clerk
Illinois Pollution Control Board
