Preliminary Order:

These four petitions request variances to connect new buildings to overloaded facilities in the North Shore Sanitary District. They are quite uninformative and should be amended to give the information required by our rules. In the interest of expedition we will not dismiss the cases but will hold them for disposition without hearing in the light of the Agency's recommendations. The burden of proof is on the petitioner, and given the scanty nature of these petitions the petitioners would be well advised to supply further information in the form of affidavits that will bring these cases, if possible, within the precedents set by this Board.

I, Regina E. Ryan, Clerk of the Pollution Control Board, certify that the Board adopted the above Preliminary Order this 14 day of October, 1971.
