Proposed Rule. Proposal for Public Comment.

OPINION OF THE BOARD (by G.T. Girard):

SUMMARY OF TODAY'S ACTION

This identical-in-substance rulemaking consists of three separate consolidated dockets. The rulemaking would update the Illinois underground injection control, municipal solid waste landfill, and hazardous waste regulations to incorporate revisions to the federal regulations. The federal amendments that prompted this action were made by the United States Environmental Protection Agency (USEPA) during the period of January 1, 2005 through June 30, 2005. This proceeding proposes amendments to 35 Ill. Adm. Code 720 through 725, 728, and 738. This proposal for public comment would also make a series of non-substantive corrections and stylistic revisions to segments of the text that are not otherwise affected by the covered federal amendments, principally to the text of 35 Ill. Adm. Code 723 and 738.

This opinion and the related order propose identical-in-substance amendments in three distinct program areas:

1. Under Sections 7.2 and 13(c) of the Environmental Protection Act (Act) (415 ILCS 5/7.2 and 13(c) (2004)), the Board proposes amendments to the Illinois regulations that are "identical in substance" to underground injection control (UIC) regulations that the USEPA adopted to implement Section 1421 of the federal Safe Drinking Water Act (SDWA) (42 U.S.C. § 300h (2003)). The federal UIC regulations are found at 40 C.F.R. 144 through 148.
2. Under Sections 7.2 and 22.40(a) of the Act (415 ILCS 5/7.2 and 22.4(a) (2004)) require the Board to adopt regulations that are "identical in substance" to

municipal solid waste landfill (MSWLF) regulations adopted by the USEPA. These USEPA rules implement Subtitle D of the federal Resource Conservation and Recovery Act of 1976 (RCRA Subtitle C) (42 U.S.C. §§ 6941 *et seq.* (2003)). The federal RCRA Subtitle D MSWLF regulations are found at 40 C.F.R. 258.

3. Under Sections 7.2 and 22.4(a) of the Act (415 ILCS 5/7.2 and 22.4(a) (2004)) require the Board to adopt regulations that are “identical in substance” to hazardous waste regulations adopted by the USEPA. These USEPA rules implement Subtitle C of the federal Resource Conservation and Recovery Act of 1976 (RCRA Subtitle C) (42 U.S.C. §§ 6921 *et seq.* (2003)). The federal RCRA Subtitle C hazardous waste management regulations are found at 40 C.F.R. 260 through 266, 268, 270, 271, 273, and 279.

Sections 13(c), 22.4(a), and 22.40(a) also provide that Title VII of the Act and Section 5 of the Administrative Procedure Act (5 ILCS 100/5-35 and 5-40 (1998)) do not apply to the Board’s adoption of identical-in-substance regulations.

This opinion supports an order that the Board also adopts today. The Board will cause the proposed amendments to be published in the *Illinois Register* and will hold the docket open to receive public comments for 45 days after the date of publication. The Board presently intends to adopt final amendments based on this proposal on or before January 5, 2006, as is explained beginning on page 7 of this opinion.

CONSOLIDATION OF DOCKETS

The Board has determined that it is necessary to consolidate three separate dockets in this rulemaking. The following segment of this opinion outlines the various federal actions considered in this proceeding.

The actions involved in UIC update docket R06-5 are consolidated with those in the RCRA Subtitle C update docket R06-7 because they are closely related actions. The docket R06-5 actions are the UIC aspects of the hazardous waste-related actions in Subtitle C update docket R06-7. The federal action of February 24, 2005, incorporated a new hazardous waste listing into the federal regulations. USEPA followed its usual practice and instituted land disposal restrictions (LDRs) for the newly listed waste in the same rulemaking action, including restrictions on underground injection.

The actions involved in RCRA Subtitle D MSWLF update docket R06-6 are further consolidated with those in the RCRA Subtitle C update docket R06-7 because they are closely related actions. The docket R06-6 actions are the MSWLF aspects of the hazardous waste-related actions in Subtitle C update docket R06-7. The federal action of June 14, 2005, incorporated changes to the required analytical methods used for compliance with the federal regulations. USEPA incorporated the changes to the MSWLF regulations together with those pertaining to the hazardous waste regulations.

For the foregoing reasons, and on its own motion, the Board consolidates the UIC update docket R06-5 and the MSWLF update docket R06-6 with the RCRA Subtitle C update docket R06-7 into a single action. This will allow the most expeditious and efficient implementation of all sets of amendments.

FEDERAL ACTIONS CONSIDERED IN THIS RULEMAKING

The following listing briefly summarizes the federal actions considered in this consolidated UIC and RCRA Subtitle C update rulemaking:

Docket R06-5: January 1, 2005 through June 30, 2005, **UIC Amendments**

USEPA amended the federal UIC regulations once during the period January 1, 2005 through June 30, 2005, as is summarized below:

70 Fed. Reg. 9138 (February 24, 2005)

USEPA adopted a new hazardous waste listing for wastes from production of dyes, pigments, and food, drug, and cosmetic colorants (K181 wastes). The amendments included land disposal and underground injection restrictions.

Docket R06-6: January 1, 2005 through June 30, 2005, **RCRA Subtitle D Municipal Solid Waste Landfill Amendments**

USEPA amended the federal RCRA Subtitle D regulations once during the period January 1, 2004 through June 30, 2004, as is summarized below:

70 Fed. Reg. 34538 (June 14, 2005)

USEPA amended the hazardous waste, municipal solid waste landfill, used oil, and hazardous waste combustion rules. The amendments allow the use of alternative methods to “Test Methods for Evaluating Solid Waste, Physical/Chemical Methods,” which is also called “SW-846.” The amendments will require the use of SW-846 methods only when there is no viable alternative method. USEPA included a series of clarifications and technical corrections to the rules.

Docket R06-7: January 1, 2005 through June 30, 2005, **RCRA Subtitle C Amendments**

USEPA amended the federal RCRA Subtitle C regulations on five occasions during the period January 1, 2004 through June 30, 2004, as is summarized below:

February 24, 2005 (70 Fed. Reg. 9138)

USEPA adopted a new hazardous waste listing for wastes from production of dyes; pigments; and food, drug, and cosmetic colorants (K181 wastes). The amendments included land disposal and underground injection restrictions.

March 4, 2005 (70 Fed. Reg. 10776)

USEPA modified the hazardous waste manifest system.

June 14, 2005 (70 Fed. Reg. 34538)

USEPA amended the hazardous waste, municipal solid waste landfill, used oil, and hazardous waste combustion rules. The amendments allow the use of alternative methods to “Test Methods for Evaluating Solid Waste, Physical/Chemical Methods,” which is also called “SW-846.” The amendments will require the use of SW-846 methods only when there is no viable alternative method. USEPA included a series of clarifications and technical corrections to the rules.

June 16, 2005 (70 Fed. Reg. 35032)

USEPA issued corrections to typographic errors in its February 24, 2005 (70 Fed. Reg. 9138) hazardous waste listing for wastes from production of dyes, pigments, and food, drug, and cosmetic colorants.

June 16, 2005 (70 Fed. Reg. 35034)

USEPA issued non-substantive corrections to its March 4, 2005 (70 Fed. Reg. 10776) modifications to the hazardous waste manifest system.

**One Later RCRA Subtitle D (MSWLF) and RCRA Subtitle C
(Hazardous Waste) Amendment of Interest to Date**

The Board engages in ongoing monitoring of federal actions. As of the date of this opinion and accompanying order, the Board has identified one other USEPA action since June 30, 2005, that further amended the RCRA Subtitle D MSWLF and RCRA Subtitle C hazardous waste rules in a way that would require immediate Board attention. That action is described as follows:

August 1, 2005 (70 Fed. Reg. 44150)

USEPA issued non-substantive corrections to its June 14, 2005 (70 Fed. Reg. 34538) amendments that allow the use of alternative methods to SW-846.

When the Board observes an action outside the nominal timeframe of a docket that requires expedited consideration, the Board will expedite consideration of those amendments in the pending docket. Federal actions that could warrant expedited consideration include those that directly affect the amendments involved in this docket, those for which compelling reasons would warrant consideration as soon as possible, and those for which the Board has received a request for expedited consideration.

The USEPA corrections directly affect amendments involved in this docket. The Board will include those corrections in this docket. If the Board identifies any additional federal actions that fulfill these criteria prior to final action on the present amendments, the Board may include those amendments in the present consolidated docket R06-5/R06-6/R06-7.

**Other Federal Actions Having a Direct Impact on the
Illinois UIC and RCRA Subtitle C Regulations**

In addition to the amendments to the federal UIC, RCRA Subtitle D MSWLF, or RCRA Subtitle C regulations, amendments to certain other federal regulations occasionally have an effect on the Illinois hazardous waste rules. Most notably, 35 Ill. Adm. Code 720.111 includes several incorporations of federal regulations by reference. The incorporated regulations include segments of various USEPA environmental regulations and United States Department of Transportation hazardous materials transportation regulations that USEPA has incorporated into the federal hazardous waste rules.

The latest available version of the *Code of Federal Regulations* is now the 2004 edition (issued January 1, 2005) for Title 10 (Nuclear Regulatory Commission (NRC)), the 2005 edition (issued July 1, 2005) for Titles 33 (U.S. Coast Guard (Coast Guard)) and 40 (USEPA), and the 2004 edition (issued October 1, 2004) for Title 49 (U.S. Department of Transportation (USDOT)). Each of these is incorporated by reference in Section 720.111 of the hazardous waste regulations. Title 40 is also incorporated by reference in Section 810.104 of the non-hazardous waste landfill regulations. The Board will amend the incorporations of these federal regulations by reference to include those editions of the *Code*. This will assure that all USDOT amendments through September 30, 2004, all NRC regulations through December 31, 2004, and all Coast Guard and USEPA amendments through June 30, 2005, will be included in the incorporations of the pertinent regulations by reference.

As of the date of this proposal for public comment, the Board has not found further significant amendments to the incorporated materials past these respective dates. Therefore, the amendments to the incorporations of federal materials by reference in Sections 720.111 and 811.104 will be largely restricted to updating the versions of the *Code of Federal Regulations* that are incorporated.

The hazardous waste regulations also incorporate segments of federal statutes by reference. The Board's review included a search for the latest version of each federal statute that is incorporated. The latest version of Section 11 of the Atomic Energy Act of 1954 (42 USC 2014) includes amendments through January 23, 2000. The latest version of Sections 201(v), 201(w), and 512(j) of the Federal Food, Drug, and Cosmetic Act (21 USC 321(v), 321(w), and 360b(j)) includes amendments through January 2, 2001. The latest version of Section 1412 of the Department of Defense Authorization Act of 1986 (50 USC 1521(j)(1)) includes amendments through January 24, 2000. The present amendments assure that the incorporations of segments of the *United States Code* by reference include these latest versions of the text.

**Summary Listing of the Federal Actions Forming the Basis
of the Board's Actions in This Docket**

Based on the foregoing, the federal actions that form the basis for Board action in this update docket are the following, listed in chronological order:

February 24, 2005 (70 Fed. Reg. 9138)	A new hazardous waste listing for wastes from production of dyes; pigments; and food, drug, and cosmetic colorants (K181 wastes). The amendments included land disposal and underground injection restrictions.
March 4, 2005 (70 Fed. Reg. 10776)	NESHAP for automobile and light duty truck surface coating operations.
June 14, 2005 (70 Fed. Reg. 34538)	Allowing the use of alternative methods to SW-846, requiring the use of SW-846 methods only when there is no viable alternative method, and including a series of clarifications and technical corrections to the rules.
June 16, 2005 (70 Fed. Reg. 35032)	Corrections to the February 24, 2005 (70 Fed. Reg. 9138) new hazardous waste listing for wastes from production of dyes, pigments, and food, drug, and cosmetic colorants.
June 16, 2005 (70 Fed. Reg. 35034)	Corrections to the March 4, 2005 (70 Fed. Reg. 10776) modifications to the hazardous waste manifest system.
August 1, 2005 (70 Fed. Reg. 44150)	Corrections to the June 14, 2005 (70 Fed. Reg. 34538) amendments that allow the use of alternative methods to SW-846.

PUBLIC COMMENTS

The Board will receive public comments on this proposal for a period of 45 days following its publication in the *Illinois Register*. After that time, the Board will immediately consider adoption of the amendments, making any necessary changes made evident through the public comments. The Board will delay filing any adopted rules with the Secretary of State for 30 days after adoption, particularly to allow additional time for USEPA to review the adopted amendments before they are filed and become effective.

TIMETABLE FOR COMPLETION OF THIS RULEMAKING

Under Section 7.2 of the Act (415 ILCS 5/7.2(b) (2004)), the Board must complete this rulemaking within one year of the date of the earliest set of federal amendments considered in this docket. USEPA adopted the earliest federal amendments that required Board attention on February 24, 2005, so that the deadline for Board adoption of these amendments is February 24, 2006. The Board scheduled adoption of this proposal for public comment for the Board meeting of October 20, 2005, to allow for timely adoption of the rule around January 5, 2006. This will allow filing of these amendments after February 13, 2006, before the February 24, 2006 deadline.

Considering the proposal of these amendments on this date, the Board projects the following will occur in the progress towards completion of these amendments:

Due date:	February 24, 2006
Date of Board vote to propose amendments:	October 20, 2005
Submission for <i>Illinois Register</i> publication:	October 24, 2005
Probable <i>Illinois Register</i> publication dates:	November 4, 2005
Ends of 45-day public comment period:	December 20, 2005
Date of Board vote to adopt amendments:	January 5, 2006
End of 30-day hold period for USEPA review:	February 5, 2006
Probable filing and effective date:	February 13, 2006
Probable <i>Illinois Register</i> publication date:	February 24, 2006

DISCUSSION

The following discussion begins with a description of the types of deviations the Board makes from the literal text of federal regulations in adopting identical-in-substance rules. It is followed by a discussion of the amendments and actions undertaken in direct response to the federal actions involved in this proceeding. This first series of discussions is organized by federal subject matter, generally appearing in chronological order of the relevant *Federal Register* notices involved. Finally, this discussion closes with a description of the amendments and actions that are not directly derived from the federal actions.

General Revisions and Deviations from the Federal Text

In incorporating the federal rules into the Illinois system, some deviation from the federal text is unavoidable. This deviation arises primarily through differences between the federal and state regulatory structure and systems. Some deviation also arises through errors in and problems with the federal text itself. The Board conforms the federal text to the Illinois rules and regulatory scheme and corrects errors that we see in the text as we engage in these routine update rulemakings.

In addition to the amendments derived from federal amendments, the Board often finds it necessary to alter the text of various passages of the existing rules as provisions are opened for update in response to USEPA actions. This involves correcting deficiencies, clarifying provisions, and making other changes that are necessary to establish a clear set of rules that closely parallel the corresponding federal requirements within the codification scheme of the *Illinois Administrative Code*.

The Board updates the citations to the *Code of Federal Regulations* to the most recent version available. As of the date of this opinion, the most recent versions of the *Code of Federal Regulations* available to the Board are the September 30, 2004 edition for USDOT regulations, the December 31, 2004 edition for NRC regulations, and the July 1, 2004 version for Coast Guard and USEPA regulations. Thus, we have updated all citations to 40 C.F.R. 10 and 49 to the 2004 version and citations to 40 C.F.R. 33 and 40 to the 2005 edition, adding references to later amendments using their appropriate *Federal Register* citation, where necessary.

The Board substituted “or” for “/” in most instances where this appeared in the federal base text, using “and” where more appropriate. The Board further used this opportunity to make

a number of corrections to punctuation, grammar, spelling, and cross-reference format throughout the opened text. We changed “who” to “that” and “he” or “she” to “it,” where the person to which the regulation referred was not necessarily a natural person, or to “he or she,” where a natural person was evident; changed “which” to “that” for restrictive relative clauses; substituted “must” for “shall”; capitalized the section headings and corrected their format where necessary; and corrected punctuation within sentences.

In addition, the federal rules have been edited to establish a uniform usage throughout the Board’s regulations. For example, with respect to “shall,” “will,” and “may,” “must” is used when an action is required by the rule, without regard to whether the action is required of the subject of the sentence or not. “Shall” is no longer used, since it is not used in everyday language. Thus, where a federal rule uses “shall,” the Board substitutes “must.” This is a break from our former practice where “shall” was used when the subject of a sentence has a duty to do something. “Will” is used when the Board obliges itself to do something. “May” is used when choice of a provision is optional. “Or” is used rather than “and/or,” and denotes “one or both.” “Either . . . or” denotes “one but not both.” “And” denotes “both.”

The Joint Committee on Administrative Rules (JCAR) has requested that the Board refer to the United States Environmental Protection Agency in the same manner throughout all of our bodies of regulations—*i.e.*, air, water, drinking water, RCRA Subtitle D (municipal solid waste landfill), RCRA Subtitle C (hazardous waste), underground injection control (UIC), etc. The Board has decided to refer to the United States Environmental Protection Agency as “USEPA.” The Board will continue this conversion in future rulemakings as additional sections become open to amendment. The Board will further convert “EPA” used in federal text to “USEPA,” where USEPA is clearly intended.

The Board has assembled tables to aid in the location of these alterations and to briefly outline their intended purpose. The tables set forth the miscellaneous deviations from the federal text and corrections to the pre-amended base text of the rules in detail. The tables are set forth and explained beginning at page 21 of this opinion. There is no further discussion of most of the deviations and revisions elsewhere in this opinion.

Discussion of the Particular Federal Actions Involved in This Docket

Hazardous Waste Listing for Wastes from the Production of Dyes; Pigments; and Food, Drug, and Cosmetic Colorants (K181 Wastes)--Sections 721.104, 721.132, 728.120, and 738.118; Appendices G and H to Part 721; and Tables T and U to Part 728

The USEPA action of February 24, 2005 (70 Fed. Reg. 9138) adopted a new hazardous waste listing for wastes from production of dyes; pigments; and food, drug, and cosmetic colorants. The covered wastes are designated as USEPA hazardous waste number K181. On June 16, 2005 (70 Fed. Reg. 35032), USEPA issued corrections to the February 24, 2005 amendments.

The Board does not review the substance and merits of the underlying federal action in an identical-in-substance proceeding, except to the extent that it may be necessary to do so in

order to incorporate the federal provisions into the Illinois regulations. Persons interested in the details of the federal amendments should consult the February 24, 2005 and June 16, 2005 *Federal Register* notices. Having stated this, the Board observes for the benefit of the regulated community that the K181 waste listing is unusual among the various hazardous waste listings in 40 C.F.R. 261.32 (which corresponds with 35 Ill. Adm. Code 721.132).

Section 261.32 of the federal rules (and Section 721.132 of the State rules) lists wastes from specific sources as hazardous wastes. All the various waste listings in this provision designate wastes from the specified sources as hazardous. Only the listings for existing hazardous waste number K174 and newly listed hazardous waste number K181 differ.

Similar to the K174 listing, USEPA drafted exceptions within the listing and included a listing-specific definition in the rule. Thus, the wastes that would otherwise fall within the K181 listing fall outside that listing if they are disposed of in a RCRA Subtitle D municipal solid waste landfill or a RCRA Subtitle C hazardous waste landfill or if the wastes are burned in a permitted combustion unit. Further, the wastes are not hazardous if the annual mass loadings of specified hazardous constituents fall outside specified limits. The hazardous constituents of interest are aniline, *o*-anisidine, 4-chloroaniline, *p*-cresidine, 2,4-dimethylaniline, 1,2-phenylenediamine, and 1,3-phenylenediamine. The K181 listing further specifies a procedure for determination of whether waste is hazardous, and the nature of that procedure shifts depending on the anticipated annualized volume of waste produced.

The Board incorporated the February 24, 2005 federal amendments and June 16, 2005 corrections without substantive deviation from the corresponding federal text. The deviations from the text of the federal amendments are restricted to those structural and stylistic changes needed to make the text comport with the *Illinois Register* format and the Board's preferred style. The table that begins on page 21 of this opinion itemizes the various revisions made in the federal text in adapting it into the State regulations.

The Board requests public comment on the incorporation of the February 24, 2005 federal amendments that initiated the K181 waste listing and the June 16, 2005 corrections.

Modifications to the Hazardous Waste Manifest System--Sections 720.110, 721.107, 722.120, 722.121, 722.127, 722.132, 722.133, 722.134, 722.154, 722.160, 723.120, 723.121, 724.170, 724.171, 724.172, 724.176, 725.170, 725.171, 725.172, and 725.176 and Appendix A to Part 722

The USEPA action of March 4, 2005 (70 Fed. Reg. 10776) modified the hazardous waste manifest requirements. USEPA changed the format of the manifest form and the manifest continuation form. The amendments standardize the appearance and content of the forms and provide for USEPA approval of printing of forms by private entities. The approval of printing by private entities was intended to make the forms available from a greater number of sources. On June 16, 2005 (70 Fed. Reg. 35034), USEPA corrected the March 4, 2005 amendments.

The Board does not review the substance and merits of the underlying federal action in an identical-in-substance proceeding, except to the extent that it may be necessary to do so in

order to incorporate the federal provisions into the Illinois regulations. Persons interested in the details of the federal amendments should consult the March 4, 2005 and June 16, 2005 *Federal Register* notices.

The Board incorporated the March 4, 2005 federal amendments and June 16, 2005 corrections without substantive deviation from the corresponding federal text. The deviations from the text of the federal amendments are restricted to those structural and stylistic changes needed to make the text comport with the *Illinois Register* format and the Board's preferred style. The table that begins on page 21 of this opinion itemizes the various revisions made in the federal text in adapting it into the State regulations.

Two aspects of the federal amendments warrant specific discussion, however, for the purposes of eliciting public comment on the Board's approach to the amendments. The first aspect relates to the federal effective date, and the fact that the structure of the federal amendments makes it impossible for the Board to complete the amendments in this docket. The second aspect relates to the federal scheme for USEPA approval of manifest forms and printers.

Effective Date Issues and Completing the Amendments: Due to the way USEPA adopted the new requirements, the Board cannot complete the update of the Illinois regulations to incorporate the federal amendments until after the federal effective date. That means that the Board must include certain segments of the present federal amendments in a future hazardous waste update docket.

The effective date of the federal manifest requirements is September 5, 2006. The federal amendments provide that until that date, the version of the regulations that appears in the 2004 edition of the *Code of Federal Regulations* remains in effect. See 40 C.F.R. 262.20(a)(2), 264.70(b) and 265.70(b), as added at 70 Fed. Reg. 10776, 10815, 10821, and 10823 (Mar. 4, 2005). Thus, USEPA has two versions of various provisions on the books; one of which will remain effective until September 5, 2006, and the other of which will become effective on that date. The 2005 and 2006 editions of the *Code of Federal Regulations* will include both versions of each federal provision, along with appropriate effective date notes. The 2007 version will dispense with the currently existing version.

While USEPA can codify multiple versions of a single provision in this way, this is not allowed in the *Illinois Administrative Code* format under Secretary of State regulations. The Board must codify one provision that is effective prior to September 5, 2006 and a second provision that becomes effective on that date. See 1 Ill. Adm. Code 100.340(b) and (f) (rule numbering requirements); see also 5 ILCS 100/5-30(e) (2004) (effective date of rules). Thus, the Board has found it necessary to split several federal provisions to present two versions of each; the first prefaced with "until September 5, 2006," and the other prefaced with "effective September 5, 2006." This occurred in Sections 720.110 (the definition of "manifest document number" will be replaced with a definition of "manifest tracking number"), 721.107(b)(1)(C)(i) and (b)(1)(C)(ii), 722.120(a)(1) and (a)(2) (an effective date statement), 722.121(a) and (b), 722.132(b)(1) and (b)(2), 722.133(b)(1) and (b)(2), 723.120(a)(1) and (a)(2) and (g)(1) and (g)(2), 723.121(b)(1) and (b)(2), 724.171(a)(1) and (a)(2) and (b)(4)(A) and (b)(4)(B), 724.172(a) and (b), 724.176(a) and (b), 725.171(a)(1) and (a)(2) and (b)(4)(A) and (b)(4)(B),

725.172(a) and (b), and 725.176(a) and (b). Only “effective September 5, 2006” appears in the certain new provisions: the material added to the Section 720.110 definition of “designated facility,” new Section 722.127, and the material added at Sections 722.134(m) and 722.160(d) and (e).

This has created an undesirable structural divergence between the federal and Illinois regulations. The Board added Board notes to the various provisions explaining the divergence from the structure of the federal regulations. This divergence will continue until the Board amends the various provisions in the future to remove the effective date statements and the past effective provisions.

The Board believes that administration of the program, compliance with the rules, and keeping the rules up to date is made easier with structural parity. Restoring the structural parity with the federal rules will require five basic actions to further amend the rules after completion of the present amendments. This can occur in a future update docket that will be completed after September 5, 2006, and which will:

1. Remove numerous provisions in the text that will become obsolete on September 5, 2006;
2. Renumber various provisions that will replace provisions becoming obsolete on September 5, 2006, in order to correlate with the numbering in the corresponding federal provisions;
3. Move the text of a small number of provisions that were moved to avoid appearing at the impermissible fifth indent level, so they will correlate with the numbering in the corresponding federal provisions;
4. Renumber various cross-references to provisions that will have been moved to correlate with the numbering in the corresponding federal provisions; and
5. Remove the September 5, 2006 effective date statements from numerous provisions becoming effective on that date.

The Board has two options for completing these amendments to restore structural parity with the corresponding federal rules. The first is to wait until the next time each of Parts 720, 722, 723, 724, and 725 open for new amendments. The second is to consider the current amendments incomplete until the parity is restored and to use the March 4, 2005 federal amendments as the basis for a future identical-in-substance update docket opening these Parts for the necessary amendments.

The Board favors this second approach because it assures that the amendments will be completed at the earliest possible time and structural parity with the federal rules more promptly restored. There is no way of telling when the affected Parts will be the subject of future amendments. Prior to this docket, Part 723 had not been opened since 1998, when amendments were filed in RCRA Subtitle C Update, USEPA Regulations (January 1, 1997, through June 30,

1997) (Consolidated with R97-21 and R98-3) (August 20, 1998), R98-5. Further, some of the amendments involving cross-references will require that Part 722, 724, and 725 be opened in the same docket. That might even take longer to occur naturally through future federal amendments.

The Board presently intends to include the amendments necessary to correct the structural divergence between the State and federal rules as soon as possible. The Board will consider the amendments in this docket incomplete until that future update docket, and the Board will include the completion of the federal amendments of March 4, 2005, in that docket.

A table that begins on page 147 of this opinion itemizes the 270 provisions that the Board must amend at a future date to complete incorporation of the March 4, 2005 federal amendments and June 16, 2005 corrections into the Illinois hazardous waste regulations. The Board presently intends to open the affected segments of Parts 720 and 722 through 725¹ based on the USEPA amendments of March 4, 2005, in a future RCRA Subtitle C update docket. The Board will complete the amendments as soon after September 5, 2006 as possible.

The Federal Scheme for USEPA Approval of Manifest Forms and Printers: The March 4, 2005 manifest amendments require USEPA to approve the forms and printers for manifests. Under the existing rules, USEPA specified the form of the hazardous waste manifest and manifest continuation form, and the manifest forms included extra spaces for information required by the states but not by USEPA. The existing requirements direct hazardous waste shippers to the appropriate state for copies of the manifest form.

This is changed in USEPA's newly amended requirements. The March 4, 2005 manifest form includes more federally required information spaces and none for optional information required by the states. USEPA did this to make the manifest requirements more uniform on a national basis to ease the burden of compliance. The new rules also specify the form and content of the manifest forms, including the type and weight of paper and ink color that must be used. Each manifest is to bear its own preprinted manifest tracking number. USEPA instituted a system through which a hazardous waste shipper may obtain approval for preparation of its own manifest forms or through which a commercial printer may obtain authorization to prepare them for sale. Under this approval scheme, the entity preparing manifest forms must submit a detailed application for registration with USEPA and obtain USEPA approval before beginning production of manifest forms. *See* 35 Ill. Adm. Code 722.121(b)(2) (corresponding with 40 C.F.R. 262.21(b), as amended at 70 Fed. Reg. 10776, 10821 (Mar. 4, 2005)). A hazardous waste shipper is required to use only manifest forms from approved sources. 35 Ill. Adm. Code 722.20(b)(1)(A) (corresponding with 40 C.F.R. 262.21(a)(1), as amended at 70 Fed. Reg. 10776, 10815 (Mar. 4, 2005)).

It is clear that USEPA did not intend to delegate the manifest form registration and approval process to the states. Thus, the Board has retained "USEPA" as the focus of each activity under Section 722.121. The only places where "the Agency" rather than "USEPA" appears in this provision is in Section 722.121(b)(2)(H), relating to notification of duplicated

¹ Sections 720.111, 722.121, 722.127, 722.132, 722.133, 722.134, 722.160, 723.120, 723.121, 724.171, 724.172, 724.176, 725.171, 725.172, and 725.176.

manifest tracking numbers, and Section 722.121(b)(13)(B), relating to required disclosure of manifest printing activities. It is foreseeable that the Agency might want to receive notification of duplicated manifest tracking numbers and might want to request information on manifest printing activities. All other activities in Section 722.121 appear reserved to USEPA.

The Board requests public comment on the incorporation of the March 4, 2005 federal amendments to the manifest system and the June 16, 2005 corrections. In particular, the Board requests comments on two specific aspects of these amendments. First, the Board requests comments on completing the March 4, 2005 federal amendments in a future docket after September 5, 2006 to restore the structural parity with the federal rules that will be lost through the present amendments. Second, the Board requests comments on Section 723.121. Specifically, the retention of USEPA for approval of applications for manifest printing registration throughout this provision but requiring notification of duplicated manifest tracking numbers to the Agency and USEPA, in Section 722.121(b)(2)(H), and disclosure of manifest printing activities to the Agency and USEPA when requested, in Section 722.121(b)(13)(B).

Methods for Analysis of the Physical and Chemical Properties of Waste; the Use of Alternative Methods to SW-846--Parts 703, 720, 721, 724, 725, 726, 728, 739, 810, and 811²

The USEPA action of June 14, 2005 (70 Fed. Reg. 34538), updated the USEPA reference, "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," USEPA publication number EPA-530/SW-846, also called "SW-846," to include Update IIIB, dated November 2004. The amendments also allow the use of alternative methods to those included in SW-846. Now, USEPA requires the use of SW-846 only where there is no viable alternative to the particular method in that document. Thus, USEPA will require the use of the following Methods in the specified generally applicable segments of the rules (including references to corresponding Illinois provisions):

The references to Appendix I of Part 726 in the above table are indicated in brackets. The six methods that included the bracket reference to Appendix I are referenced in appendix IX to 40 C.F.R. 266 for the purposes of the boiler and industrial furnace (BIF) rule. There is no similar

reference to those methods in corresponding Appendix I to Part 726. Federal appendix IX to 40 C.F.R. 266 is incorporated by reference in Section 720.111(b) of the Illinois rules. Corresponding Appendix I to Part 726 includes no more than a cross-reference to the incorporation of corresponding federal appendix IX by reference. Thus, while these six methods are listed in the amendments to the Illinois rules for use with Appendix I to Part 266, none are directly referenced in that segment of the rules.

The above-listed 14 methods are also used to demonstrate compliance with the conditions of federally granted hazardous waste exceptions in table 2 appendix IX to 40 C.F.R. 261 (corresponding with Table B in Appendix I to Part 721). One exception listed in that table pertains to waste from an Illinois facility. The subject facility is the Sterling operations of Conversion Systems, Inc. (CSI). In addition to the above-listed 14 methods, the following methods are referenced in the CSI hazardous waste delisting:

In addition to the amendments allowing the use of alternative methods to those of SW-846, USEPA incorporated a series of other revisions to the methods provisions. Among the amendments, USEPA has revised SW-846 by withdrawing specified segments and has approved the use of Update IIIB to SW-846 (approved in November 2004). USEPA also revised references in various rules to cite updated methods in SW-846. Unrelated to SW-846, USEPA approved the use of Method 25A (Determination of Total Gaseous Organic Concentration Using a Flame Ionization Analyzer) in appendix A to 40 C.F.R. 61 for measurements of air emissions. Finally, USEPA reorganized the references in 40 C.F.R. 260.11 (corresponding with Section 720.111 of the Illinois rules) by renumbering various of the subsections, adding references to particular methods, and pairing references to segments of the substantive regulations with the references to the various methods.

The primary emphasis of the June 14, 2005 amendments relates to the hazardous waste regulations. USEPA also amended segments of the MSWLF regulations relating to SW-846. USEPA added a cross-reference in 40 C.F.R. 258.28(c)(1) (corresponding with Section 811.107(m)(3)(A) of the Illinois landfill rules) to the incorporation of SW-846 by reference at 40 C.F.R. 261.11 (corresponding with Section 720.111). USEPA removed a footnote referring to SW-846 from appendix I to 40 C.F.R. 258 (for which there is no equivalent in the Illinois rules). Finally, USEPA removed the “suggested methods” and “PQL” columns from the table in appendix II to 40 C.F.R. 258 (incorporated by reference in Section 810.104(a)(1) of the Illinois landfill rules).

On August 1, 2005 (70 Fed. Reg. 44150), USEPA corrected its June 14, 2005 amendments relating to SW-846. Two of the amendments non-substantive errors in the text of appendices I and II to 40 C.F.R. 258 as published in the June 14, 2005 amendments. One corrects errors in the text of appendix IX to 40 C.F.R. 261 that relate only to facilities outside Illinois. Finally, USEPA made two corrections to the appearance of chemical names appendix IX to 40 C.F.R. 264 (corresponding with Appendix I to Part 724).

The Board does not review the substance and merits of the underlying federal action in an identical-in-substance proceeding, except to the extent that it may be necessary to do so in order to incorporate the federal provisions into the Illinois regulations. Persons interested in the details of the federal amendments should consult the June 14, 2005 *Federal Register* notice and August 1, 2005 corrections.

The Board incorporated the June 14, 2005 federal amendments and August 1, 2005 corrections without substantive deviation from the corresponding federal text. The deviations from the text of the federal amendments relate primarily to those structural and stylistic changes needed to make the text comport with the *Illinois Register* format and the Board’s preferred style. Other deviations include the addition of references to substantive rules where the methods are cited to the citations of particular methods in the incorporations by reference in Section 720.111. The table that begins on page 21 of this opinion itemizes the various revisions made in the federal text in adapting it into the State regulations. Further, the following discussion of corrective amendments specifically discusses a limited number of the revisions to the federal text.

The Board requests public comment on the incorporation of the June 14, 2005 federal amendments and August 1, 2005 corrections relating to the use of SW-846 analytical methods.

Discussion of Corrective Amendments

The Board has traditionally used the occasion of these identical-in-substance updates to correct segments of the base text of the Illinois regulations. These corrections are non-substantive in effect. The Board is including a significant number of non-substantive corrections in this docket. Some were prompted by the current federal amendments.

When a necessary minor correction comes to the attention of the Board, Board staff makes a note of the correction, and it is set aside until the next opportunity to make the

correction. The next opportunity generally presents itself when the section involved is next opened for amendment as a result of amendments to the corresponding federal text. Over the last few years, the Board has cataloged very many changes, but the pace of completing the corrections has been slow, since only a limited number of all the sections involved in the hazardous waste regulations have been the subject of federal amendments.

In preceding RCRA Subtitle C update dockets, the Board included necessary corrections to many segments of the text of the rules that were not already involved in the pertinent docket as a result of federal amendments. The Board has continued this process through the following RCRA Subtitle C update dockets:

RCRA Subtitle C Update, USEPA Regulations (January 1, 2002 through June 30, 2002), R03-7 (Jan. 9, 2003)

RCRA Subtitle C Update, USEPA Regulations (July 1, 2002 through December 31, 2002), R03-18 (June 5, 2003)

RCRA Subtitle C Update, USEPA Regulations (July 1, 2003 through December 31, 2003), R04-16 (Apr. 1, 2004)

RCRA Subtitle C Update, USEPA Regulations (January 1, 2004 through June 30, 2004 and October 25, 2004), R05-2 (Mar. 3, 2005)

In this ongoing review of the rules, the Board has so far reviewed the entire text of Parts 703, 705, 720, 721, 722, 724, 725, 726, 728, 733, and 739 of the RCRA Subtitle C and UIC regulations. The Board included all the necessary corrections to the base text of which the Board was aware. The Board believes that prompt completion of the corrections benefits the Agency's implementation of the rules and the regulated community.

The Board is continuing this approach in this current docket. The Board has made corrections to two more Parts of the regulations: Parts 723 and 738. Thus, after completion of this rulemaking, the Board will have reviewed the entire text of Parts 703, 705, 720, 721, 722, 723, 724, 725, 726, 728, 733, 738, and 739 of the hazardous waste and UIC regulations and made necessary corrections. The Board will continue this process of making corrections to the text of open Parts at a reasonable rate in future UIC and RCRA Subtitle C update dockets until all of the corrections are complete.³

The Board will not discuss particular corrective amendments in this segment of this discussion. The corrections are each itemized in the table that begins on page 55 of this opinion. The Board requests that the Agency, JCAR, and the regulated community review the table and the text of the corrections. The Board requests comment on the corrections. The Board also

³ After completion of the amendments in this docket, the Board will have reviewed and made necessary revision to all the RCRA Subtitle C hazardous waste and UIC regulations except for Parts 702, 704, and 730. The Board has not yet had occasion to open these three Parts for review.

asks for the assistance of the Agency, JCAR, and the regulated community in this process; the Board requests that they submit suggestions for correction of any errors of which they are aware. The Board will catalog any suggestions relating to parts and sections not already involved in this proceeding for future use.

Corrective Amendments Prompted by the Current Federal Amendments

As mentioned above, the current federal amendments prompted several corrections to the Illinois regulations. These federally prompted corrections relate to analytical methods and documents incorporated by reference. This segment of the discussion briefly describes those corrections in broad terms.

USEPA added to many of its incorporations by reference in 40 C.F.R. 260.11 citations to several substantive regulations that cite each document or method. Thus, USEPA added language like “approved for [citation]” at the end of each method or document listed in 40 C.F.R. 260.11. Review of these incorporations, however, indicates that the federal amendments did not completely list all substantive citations to all materials incorporated by reference. To avoid potential confusion to the regulated community, the Board has added several cross-references to the incorporations by reference not included by the federal amendments.

First, USEPA did not include all the methods used in 40 C.F.R. 260.11. For example, USEPA lists ASTM 2879-92 as used for 40 C.F.R. 265.1084, but it is also used for sections 264.1063 and 265.1063. Similarly, SW-846, discussed extensively in the foregoing segment of this discussion as cited for specific methods, is further generally referenced in Appendices I and IX to 40 C.F.R. 261 and in 40 C.F.R. 266.100, 266.106, 266.112, and 268.6. The Board has searched the text of the regulations and added any necessary additional references that are needed to assure that every citation in the entire body of the RCRA regulations appears for each document incorporated by reference in Section 720.111. The format of these references appears slightly differently than those cited by USEPA. The cross-references added by USEPA are rendered as “USEPA-approved for [citation].” The cross-references added by the Board are rendered as “referenced in [citation],” where the citation is specific to a particular section, method, or segment of the document, or as “generally referenced in [citation],” if the citation is to the entire document. Thus, “referenced in 35 Ill. Adm. Code 724.963 and 725.963” was added to the incorporation of ASTM D 2879-92 by reference, described above. Similarly, “generally referenced in Appendices A and I to 35 Ill. Adm. Code 721 and 35 Ill. Adm. Code 726.200, 726.206, 726.212, and 728.106” was added to the incorporation of SW-846, also described above. The Board further added citations to “NFPA 30” and the three documents from the Organisation for Economic Co-operation and Development (OECD) that are cited by USEPA.

Second, USEPA does not list in its incorporations by reference in 40 C.F.R. 260.11 all documents that are cited for use in RCRA compliance. Thus, USEPA did not list API Recommended Practice 1632 (used for compliance with 40 CFR 264.192, 264.195, 265.192, and 265.195, which correspond with Sections 724.292, 724.295, 725.292, and 725.295 in the Illinois rules. USEPA did not include an entry for the API document, “Guide for Inspection of Refinery Equipment” (used in 40 C.F.R. 264.191, 264.193, 265.191, and 265.192, which correspond with

Sections 724.291, 724.293, 725.291, and 725.292). There were similar omissions of API Recommended Practice 1615, two ASME/ANSI methods, 10 ASTM methods, the “Standard Classification Manual,” NACE Recommended Practice RP0285-85, five documents from USEPA, five OECD documents, “Standard for Dual Wall Underground Steel Storage Tanks,” and the Government Bill of Lading. The Board added citations to each substantive regulation in which there references are used. The Board use the format “referenced in [citation],” which was used for adding citations to the references USEPA omitted in 40 C.F.R. 260.11, as noted in the preceding paragraph.

Third, USEPA is not required to incorporate federal regulations and statutes by reference, while the Board is required to do so. Thus, the Board reviewed the entire text of the hazardous waste regulations for references to federal regulations and statutes. The Board added to each incorporation by reference a citation to every segment of the rules where that reference is used. As with the additions discussed in the preceding two paragraphs, the Board used the format “referenced in [citation],” where the citation is to a particular section, table, appendix, or subsection of the listed federal rule or statute. Where the citation is to an entire part of the federal regulations, the Board used the format “generally referenced in [citation].”

Finally, 40 C.F.R. 260.11 includes incorporations used for the purposes of the federal RCRA Subtitle C hazardous waste regulations only. Corresponding Illinois Section 720.111 also includes the incorporations by reference used for the UIC and permit regulations. For this reason, the Board added to each pertinent incorporation by reference a citation to any segments of Parts 703, 704, or 730 in which that reference is used. As with the other additions previously discussed, the Board used the format “referenced in [citation].” The added citations to permit or UIC regulations that use the incorporated references include following two federal publications and 10 federal regulations: the Standard Industrial Classification Manual (used in Section 702.110), the USEPA document “Technical Assistance Document: Corrosion, Its Detection and Control in Injection Wells” (used in Section 730.165), 10 C.F.R. 20.2006 (used in Section 702.110), table 2 in appendix B to 10 C.F.R. 20 (used in Section 702.110, 730.103, and 730.151), appendix B to 40 C.F.R. 52.741 (used in Section 703.213), Method 21 in appendix A to 40 C.F.R. 60 (used in Section 703.213), subpart EEE of 40 C.F.R. 63 (used in Sections 703.155, 703.205, 703.208, 703.221, 703.232, and 703.320), 40 C.F.R. 136.3 (used in Sections 702.110, 704.150, 704.187, and 730.103), 40 C.F.R. 144.70 (used in Section 704.240), appendix III to 40 C.F.R. 261 (used in Sections 704.150 and 704.187), appendix VI to 40 C.F.R. 264 (used in 703.306), and 40 C.F.R. 270.5 (used in Section 703.305).

The review of the incorporations by reference and the citations to those document incorporated in the text of the rules prompted another series of ancillary Board amendments. That series relates to the format for each incorporation by reference in Section 720.111 and for each citation to the incorporated documents in the text of the rules. The Board added or corrected any USEPA document number, any National Technical Information Service (NTIS), or other document reference number, where necessary and included any number found for a document. The Board also added the title in parentheses to each citation of the various federal methods and regulations. The Board further corrected any document citations to the full document title where partial or fragmentary citations once appeared. The intent is to make the

documents easier to identify and locate in the rules and to remove any ambiguity as to document identity.

The Board will not further discuss the corrective amendments in this segment of this discussion. The corrections are each itemized in the tables that begin on pages 21 and 55 of this opinion. The Board requests that the Agency, JCAR, and the regulated community review the table and the text of the corrections. The Board requests comment on the corrections. The Board also asks for the assistance of the Agency, JCAR, and the regulated community in this process; the Board requests that they submit suggestions for correction of any errors of which they are aware. The Board will catalog any suggestions relating to parts and sections not already involved in this proceeding for future use.

Agency or Board Action

Section 7.2(a)(5) of the Act requires the Board to specify those portions of the program over which USEPA will retain decision making authority. Based on the general division of functions within the Act and other Illinois statutes, the Board is also to specify which State agency is to make decisions.

In situations in which the Board has determined that USEPA will retain decision-making authority, the Board has replaced “Regional Administrator” with USEPA, so as to avoid specifying which office within USEPA is to make a decision.

In some identical-in-substance rules, certain decisions pertaining to a permit application are not appropriate for the Agency to consider. In determining the general division of authority between the Agency and the Board, the following factors should be considered:

1. Whether the entity making the decision is applying a Board regulation, or taking action contrary to, *i.e.*, “waiving,” a Board regulation. It generally takes some form of Board action to “waive” a Board regulation.
2. Whether there is a clear standard for action such that the Board can give meaningful review to an Agency decision.
3. Whether the action would result in exemption from the permit requirement itself. If so, Board action is generally required.
4. Whether the decision amounts to “determining, defining or implementing environmental control standards” within the meaning of Section 5(b) of the Act. If so, it must be made by the Board.

There are four common classes of Board decisions: variance, adjusted standard, site-specific rulemaking, and enforcement. The first three are methods by which a regulation can be temporarily postponed (variance) or adjusted to meet specific situations (adjusted standard or site-specific rulemaking). There often are differences in the nomenclature for these decisions between the USEPA and Board regulations.

**Tabulations of Deviations from the Federal text and
Corrections to and Clarifications of the Base Text**

The tables below list numerous corrections and amendments that are not based on current federal amendments. The first table (beginning immediately below) includes deviations made in this proposal for public comment from the verbatim text of the federal amendments. The second table (beginning immediately after the first) contains corrections and clarifications that the Board made in the base text involved in this proposal. The amendments listed in this second table are not directly derived from the current federal amendments. Some of the entries in these tables are discussed further in appropriate segments of the general discussion beginning at page 7 of this opinion.

HISTORY OF RCRA SUBTITLE C AND UIC ADOPTION
ILLINOIS ENVIRONMENTAL PROTECTION AGENCY OR BOARD ACTION
EDITORIAL CONVENTIONS

It has previously been the practice of the Board to include an historical discussion in its RCRA Subtitle C and UIC identical-in-substance rulemaking proposals. However, in the last RCRA Subtitle C update docket, RCRA Subtitle C Update, USEPA Amendments (July 1, 1999 through December 31, 1999), R00-13 (May 18, 2000), the Board indicated that it would cease this practice. Therefore, for a complete historical summary of the Board’s RCRA Subtitle C and UIC rulemakings and programs, interested persons should refer back to the May 18, 2000 opinion and order in R00-13.

The historical summary contains all Board actions taken to adopt and maintain these programs since their inception and until May 18, 2000. It includes a listing of all site-specific rulemaking and adjusted standards proceedings filed that relate to these programs. It also lists all USEPA program authorizations issued during that time frame. As necessary the Board will continue to update the historical summary as a segment of the opinion in each RCRA Subtitle C and UIC update docket, but those opinions will not repeat the information contained in the opinion of May 18, 2000, in docket R00-13.

The following summarizes the history of the Illinois RCRA Subtitle C hazardous waste and UIC programs since May 18, 2000:

History of RCRA Subtitle C and State Hazardous Waste Rules Adoption

The Board has adopted and amended the RCRA Subtitle C hazardous waste rules in the following docket since May 18, 2000:

- R00-13 RCRA Subtitle C Update, USEPA Regulations (July 1, 1999 through December 31, 1999), R00-13 (May 18, 2000); published at 24 Ill. Reg. 9443 (July 7, 2000), effective June 20, 2000.
- R01-3 RCRA Subtitle C Update, USEPA Regulations (January 1, 2000 through June 30, 2000), R01-3 (December 7, 2000); published at 25 Ill. Reg. 1266 (Jan. 26, 2001), effective January 11, 2001.
- R01-23 RCRA Subtitle C Update, USEPA Regulations (July 1, 2000 through December 31, 2000), R01-23 (May 17, 2001); published at 25 Ill. Reg. 9108 (July 20, 2001), effective July 9, 2001. (Consolidated with UIC update docket R01-21.)
- R02-1 RCRA Subtitle C Update, USEPA Regulations (January 1, 2001 through June 30, 2001), R02-1 (Apr., 18, 2002); published at 26 Ill. Reg. 6667 (May 3, 2002), effective April 22, 2002. (Consolidated with RCRA Subtitle C Update docket R02-12 and UIC Update docket R02-17.)
- R02-12 RCRA Subtitle C Update, USEPA Regulations (July 1, 2001 through December 31, 2001), R02-12 (Apr., 18, 2002); published at 26 Ill. Reg. 6667 (May 3, 2002), effective April 22, 2002. (Consolidated with RCRA Subtitle C Update docket R02-1 and UIC Update docket R02-17.)
- R03-7 RCRA Subtitle C Update, USEPA Regulations (January 1, 2002 through June 30, 2002), R03-7 (Jan. 9, 2003); published at 27 Ill. Reg. 3496, effective February 14, 2003.
- R03-18 RCRA Subtitle C Update, USEPA Regulations (July 1, 2002 through December 31, 2002), R03-7 (June 5, 2003); published at 27 Ill. Reg. 12683, effective July 17, 2003.
- R04-6 RCRA Subtitle C Update, USEPA Regulations (January 1, 2003 through June 30, 2003), R04-6 (Aug. 7, 2003). (Dismissed because no federal actions in the period.)
- R04-16 RCRA Subtitle C Update, USEPA Regulations (July 1, 2003 through December 31, 2003), R04-16 (Apr. 1, 2004); published at 28 Ill. Reg. 10693, effective July 19, 2004.

- R05-2 RCRA Subtitle C Update, USEPA Regulations (January 1, 2004 through June 30, 2004 and October 25, 2004), R05-2 (Mar. 3, 2005); published at 29 Ill. Reg. 6290, effective April 22, 2005.
- R05-13 RCRA Subtitle C Update, USEPA Regulations (July 1, 2004 through December 31, 2004), R05-13 (Feb. 3, 2005) (Dismissed because no federal actions in the period.)
- R06-7 RCRA Subtitle C Update, USEPA Regulations (January 1, 2005, through June 30, 2005), R06-7 (This docket; consolidated with UIC Update docket R06-5.)

The Board has taken other actions since May 18, 2000 relating to administration of the Illinois hazardous waste program. The Board has made solid waste determinations by granting the following adjusted standards:

- AS 01-7 Petition of Progressive Environmental Services, Inc. for an Adjusted Standard under 35 Ill. Adm. Code 720.131(c), AS 02-7 (Jan. 10, 2002) (used automotive antifreeze).
- AS 02-2 Petition of World Recycling, Inc. d/b/a Planet Earth Antifreeze for an Adjusted Standard under 35 Ill. Adm. Code 720.131, AS 02-2 (May 2, 2002) (used automotive antifreeze).

The Board has also granted relief from a permit requirement applicable to hazardous waste management facility:

- AS 00-15 Petition of Heritage Environmental Services, LLC. for an Adjusted Standard from 35 Ill. Adm. Code 702.126(d)(1), AS 00-15 (Feb. 1, 2001) (alternative permit application certification language).

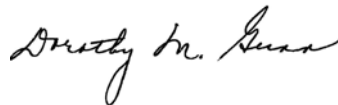

History of UIC Rules Adoption

The Board has adopted and amended Underground Injection Control (UIC) regulations in the following dockets since May 18, 2000:
